AMPROBE EXTECH INSTRUMENTS

CO_2, Humidity, and Temp. Loggers

Display and record air quality factors where high levels of carbon dioxide are generated. Maintenance-free, dual-wavelength NDIR (nondispersive infrared) CO_2 sensors. LCD displays CO_2, temperature, and relative humidity.

Item	Carbon Dioxide Concentration	Relative Humidity Range	Temp. Range	Brand	Mfr. Model	Item No.

MACURCO GAS DETECTION

Gas Detection Systems

Gas Detector/Controller/ Transducers—Dual-relay electronic detection systems monitor gas concentrations. Automatic fan/ louver/valve control helps maintain safe levels in parking garages, warehouses, and other commercial sites. 4-20mA current loop and alarm relay.

6-Series low-voltage units are for use in boiler rooms, vehicle maintenance areas, kitchens, and battery rooms.

12-Series line-voltage systems with internal switching power supply mount to 4" x 4" electrical boxes.

Gas Detectors for Fire/Security Systems—Low-voltage electronic detectors connect to alarm controls.

Exhaust Fan Control Panels—Automatic controls provide up to 3 ventilation control zones, choice of sensor- or time of day-based control, and include drivers for external horn or strobe alarms. Lockable NEMA 1 enclosure with external keypad, externally visible status, system, and alarm indicators. Control up to 12 gas sensors (sold separately).

Air Particle Counters

TSI | ALNOR   EXTECH INSTRUMENTS

- Flow rate: 0.1 cfm

Data sets can be stored and downloaded for analysis and reporting. Each includes zero filter, software, carrying case, AC power supply, and battery.

23V750—6-channel instrument has easy-to-use graphical interface. Stores up to 5000 sample records on micro SD card (4 GB card included). Includes tripod and USB cable.

4WDT2—Intuitive keypad for easy setup: Up to 3 channels of simultaneous data with selectable middle channel. Internal memory stores up to 1500 sample records. Includes probe, tubing, and NIST calibration certificate.

30JZ52—Simultaneously measures and displays 6 channels of particle sizes. Measures air temperature, humidity, dew point, and wet bulb. Includes NIST traceable calibration certificate.

Indoor Air Quality Screening Kits

Test indoor areas for airborne pollutants that may pose potential health or safety risks, such as mold, dust, gases, or vapors. These kits are commonly used to screen facilities that use HVAC systems to ensure filtration and ventilation systems are working properly. Collected samples are sent to a lab for processing and results.

Air Quality Meters and Analyzers

AMPROBE EXTECH INSTRUMENTS TSI ALNOR

Help monitor indoor air quality (IAQ) in occupied spaces. Each instrument employs a nondispersive infrared (NDIR) carbon dioxide sensor.

Amprobe Handheld CO_2 Meter—Portable meter provides instant feedback in offices, production floors, schools, and hospitals. Features easy-to-read large LCD with simultaneous CO_2, temperature, and relative humidity (RH) readings. Includes hard carrying case.

Extech IAQ Analyzer—Features continuous and manual datalogging including min./max. with time stamp. High/low audible and visual alarms. Stores 99 manual/20,000 continuous readings. Includes software and RS-232 cable.

Extech IAQ Carbon Dioxide Meter—Checks for CO_2 concentrations, measures temperature and relative humidity, and displays calculated dew point and wet bulb. Programmable CO_2 audible alarm. Transmits continuous readings to PC via USB cable. Includes data acquisitions software.

Extech Portable IAC CO_2 Meter—Measures carbon dioxide, temperature, humidity, dew point, and wet bulb. Calculates 8-hr. and 15-min. TWA. Programmable audible alarm and backlit triple LCD. Includes software, RS-232 cable, and carrying case.

TSI Alnor IAQ Tester—IAQ-Calc cost-effective meter features a low-drift NDIR sensor and a sampling function that records multiple-point measurements. Includes calibration certificate and carrying case.

Extech IAQ CO/CO_2 Meter —Checks CO and CO_2 concentrations, measures temperature and relative humidity, and displays calculated dew point and wet bulb. Calculates 8- hr. and 15-min. time-weighted average (TWA). Datalogs up to 32,000 points. Includes USB cable, software, and case.

Indoor Air Quality Meters

Diagnostic tools help control indoor environments and manage energy use, providing automated measurements, data collection, and analysis.

FLUKE CO-220 CARBON MONOXIDE METER

Beeper triggers with increasing frequency as CO level rises. Bright backlight makes it easy to view the large LCD screen under dim lighting.

FLUKE 971 TEMPERATURE HUMIDITY METER

- Measures dew point, wet bulb temperature, and humidity
- 99-record storage capacity
- 0.1°F/0.1°C resolution

Backlit dual display.

FLUKE 922 AIRFLOW METER/MICROMANOMETER

- Measures differential and static pressure, air velocity, and flow readings
- Min./max./avg./hold

Duct shape and size are user-defined for maximum air flow accuracy. Colored hoses help with proper interpretation of pressure readings.

Pocket Anemometers

Waterproof Fold-Up— Simultaneously display air velocity and temperature or wind chill, and feature selectable averaging mode. 1RK12 also measures relative humidity from 10% to 95% and dew point from 32° to 122°F.

Heat Index—Measures humidity and temperature (air and PT1000 thermistor), plus heat index and barometric pressure. Also measures visible light from 0 to 1860Fc (20,000Lux).

Mini Vane—Has a built-in compass and provides wind direction and 360° readings.

CFM/CMM Thermo-Anemometers

TSI Alnor®—Store up to 12,700 samples. 12A182 also measures humidity and stores 26,500 readings.

Amprobe®—Pocket size unit also measures humidity, dew point, wet bulb, and wind chill.

Kestrel—49KA91 has a compass, and measures crosswind and headwind/tail-wind. 8UME8 measures 3 second average wind speed. 9U521 measures dew point, relative humidity, wind chill, and heat stress index. 8D481 measures water and snow temperature, as well as wind chill.

Westward—Includes interchangeable probes.

UEI Test Instruments™—Also measures relative humidity, and wet and dry bulb.

Cone Kit—Quick, easy air flow measurements for common size ducts.

AcuRite®—Also measures humidity, altitude, and wind chill, calculates heat index, and keeps records for high and low temperatures. Can be mounted on tripods with ¼" 20-thread fitting.

Hot Wire Thermo-Anemometers

Dual-purpose instruments measure temperature and air speeds in ducts and ventilating systems.

DWYER®

Shows simultaneous air velocity or air flow and temperature on high-contrast backlit LCD. Stores up to 99 readings. 8" stainless steel probe is etched with insertion depth marks.

EXTECH®

3MPE6,5GCD3, 4KC29 and 5ZT04—Simultaneously display air temperature and air velocity down to 40 ft./min. Telescoping probe is designed to fit into small openings.

3MPE6 and 5GCD3 also measure air flow in cfm/cmm and display instantaneous or 20-pt. average air flow down to 40 ft./min. Probe extends to 3 ft.

4KC29 and 5ZT04 include 37" telescoping probe and 40" cable.

Optional Data Acquisition Software 1CLF1 is available on Grainger.com.

13G530 and 36FW25—Selectable sampling rate of 1 to 3600 sec. Display simultaneous air velocity and temperature. Telescoping probe. Accept Type J/K thermocouple for high-temperature measurement. Retain up to 99 readings, or use included SD card to data log up to 20 million readings in Excel® format.

TSI ALNOR®

1UCY4—40" telescoping straight probe.

1UCY6 and 1UCY7—Both have 42" articulated probe. 1UCY7 also measures relative humidity to 95% (±3% accuracy) and calculates dew point and wet bulb temperature.

UEI TEST INSTRUMENTS™

Directly captures air temperature, relative humidity, and air velocity. Calculates wet bulb temperature, dew point temperature, and air volume. Air volume is displayed in real-time, or choose a timed average with start/stop capabilities to traverse ductwork. Also features 0.7" small diameter air vane on 39" long telescoping probe. Includes hard carrying case, 9V battery, and manual.

TESTO

Determines air velocity, temperature, and volume flows. Via Bluetooth®, readings are transmitted wirelessly to convenient app-based operation on smartphone or tablet.

Ultrasonic Leak Detectors

Diagnose problems before they result in major breakdowns. Units detect ultrasonic sound produced by pressurized leaks, vacuum leaks, arcing electrical power distribution equipment, and faulty seals and gaskets.

Amprobe®—Parabolic shield reduces background noise. Extension tube for difficult or dangerous areas.
- 20,000 to 90,000 Hz AC frequency response

Spectroline®—Solid-state circuitry enhances sensitivity and simplifies operation. Touch-control pad with 5-LED signal-intensity indicator and audible alarm. Contact probe helps diagnose internal components without disassembly. Probe reaches into tight spaces.
- 10 to 10,000 Hz AC frequency response

Bacharach®—6JHN8 simultaneously detects vacuum and high-pressure leaks. Includes a foldable headset. Other instruments have an internal sensor and hard hat-compatible headphones. 6JHP2 employs 2 software-controlled sensors. 6JHP4 has multiple detection bands, including unique acoustic bands.
- 34,000 to 42,000 Hz AC frequency response

Portable Combustion Analyzers

Units all utilize the B-Smart carbon monoxide (CO) sensor. INSIGHT Plus sensor measures 0 to 4000 ppm with integral NOx filter. InTech has 0 to 2000 ppm CO sensor. Feature internal sampling pump and print capability.

Fyrite INSIGHT Plus Combustion Analyzers—5-in-1 residential/commercial testers analyze steady-state combustion and efficiency of 9 selectable fuels. Backlit LCD with zoom and full-color display with dynamic graphing enhance combustion process analysis. O_2 sensor life indication. Proprietary Tune-Rite troubleshooting software is included.

- Color graph screens show stack hot spots and trending
- Measure combustion/ambient and flue gas temperature, O_2, CO, and draft/differential pressure
- Draft pressure: 100" WC
- Calculate CO_2, CO air free, and excess air

Fyrite InTech Residential Analyzers—Basic electronic analyzers calculate the efficiency of residential furnaces and combustion appliances. Lightweight and easy to use for routine service calls. Turn it on, select 1 of 6 fuels, and see quick results on the digital display.

- Measure stack and ambient temperature, O_2, and CO
- Calculate CO_2, CO air free, and excess air

Combustion System Analyzer Kits

TESTO

- Measure O_2, CO, temperature, and draft pressure
- Calculate CO_2, excess air (EXA), and efficiency

Testers are ready to use after a fast, 30-sec. warmup. Magnetic back for hands-free operation. 2-line backlit display. Available with an IR printer.

36H452 and 36H453

- Measure O_2, carbon monoxide (CO), temperature, and draft pressure
- Calculate CO_2, excess air (EXA), and efficiency

Testers are ready to use after a fast, 30-sec. warmup. Magnetic back for hands-free operation. 2-line backlit display. Available with an IR printer.

TEST PRODUCTS INTL.

- Measure CO and CO_2
- Calculate O_2, efficiency, excess air, and ratio
- Analyze CO

Full-system diagnostic analyzers help reduce fuel costs.

UEI TEST INSTRUMENTS

787DK4 and 787DK5

- Measure O_2, CO_2, CO, inlet and flue temperature, and differential pressure
- Calculate efficiency, net temperature differential, excess air, and CO/CO_2 ratio

36H167

- Kit for gas leak detection and pressure measurement
- Dual-input to measure pressure to ±60 InWC (inches water column)

Senses combustible, noncombustible, and toxic gases. Includes combustible gas leak detector and electronic manometer. Measures in 11 scales: inH_2O, psi, bar, mBar, kPa, inHG, mmHG, ozin, FtH_2O, cmH_2O, and kgcm.

AMPROBE EXTECH INSTRUMENTS WESTWARD

Digital Sound Level Meters and Data Loggers

Type 2 meters are suitable for workplace and environmental noise measurements. Dual-range meters take environmental and workplace noise measurements and can be used for product evaluation/certification and audio system installation.

DIGITAL SOUND LEVEL METERS

Use for general noise measurements and basic assessments. Feature analog bar graph with 50dB range updates every 40 msec, Min./Max. values over time, and AC analog output.

4FKR5

Designed to be used by safety engineers, health, industrial and safety officers, and quality control professionals to perform acoustic analysis and check for compliance with safety regulations. Meter uses two different audio weighting filters: A weighting for general noise sound level, and C weighting for measuring sound level of acoustic material control. Features Min./Max. recording and Data Hold. Includes carrying case, user manual, and 9V battery.

EXTECH

Digital Sound Level Meter Kits

Good for noise ordinance enforcement, workplace noise surveys, and installing fire alarms and speaker systems, kits pair Digital Sound Level Meter 9WTE8 with a 94dB sound calibrator to verify and calibrate meter operation.

Sound Level Data Logger

Captures time stamp at selectable sampling rate. Manual or programmed start.

Sound Level Meters

8ZRU0 provides real-time sound exposure level (SEL) and time-averaged (Leq) measurements on 4-digit LCD with analog bar graph. 9- to 25-pin gender changer, male and female voice. 9TDL6 tripod-mountable 6-range instrument has a background noise absorber mode for machine noise measurements. Analog bar graph and Min./Max. values. Optional software/cable package 3LYE6 is available on Grainger.com®.

Sound Level Meter with Display

2-range meter has backlit LCD.

Sound Level Monitor and Alarm

Bright LEDs alert user when sound level is too high or too low. Reads LEDs from 30m (100-ft). Continuous monitoring of sound level. Wall, desk, or tripod mount. User settable high or low limit (30 to 130dB).

32ZN13

Fluorescent Light Testers

AMPROBE FLUKE.

21NN15—Tests lamps and filaments in a simple 1-handed, 1-button operation. Visual and audio alerts help guide you to the problem's source. Detachable 4-ft. antenna helps you stay on the ground for safer testing. Compatible with all sizes of fluorescent lamps.

32ZN13—Performs all 5 essential lighting tests—lamp test, ballast test, noncontact voltage test, pin continuity test, and ballast-type test—with a single, easy-to-use tool. Bright indicator light and audible alert give quick, easy-to-read results, so you know, in seconds, when fluorescent lamps and ballasts need replacing. Saves time and replacement costs.

EXTECH INSTRUMENTS AMPROBE

Light Meters

4FKR3—Portable, digital light meter measures visible light. Easy-to-use, one-handed operation. Silicon photodiode sensor and filter. Features data Hold and Max. memory.

13G531 and 15E590—Light meter data loggers record data (up to 20M records) in Excel format for easy transfer to a PC for analysis. Selectable sample rate: 1 to 3600 sec.

3MY54 and 2HZC2—EasyView light meters include large LCD with analog bar graph. Wide range ideal for use in bright daylight. Peak function captures short-duration flashes. Color- and cosine-corrected sensor. Features include Min./Max., data Hold, and zero for relative measurements.

1AEV6 and 22DC07—Light meters with remote light sensor on 12" coiled cable. Feature backlit LCD with analog bar graph. Min./Max. feature stores highest and lowest readings; data Hold freezes reading in display.

1M946 and 5ZT02—Heavy-duty light meter has four lighting type settings for enhanced accuracy. Precision photodiode and color correction filter. Features data Hold, Min./Max./Average, and percent reading of the differential from a reference point.

1H153—Light meter measures light levels using a precision diode and color correction filter (cosine/color corrected). Features fast/slow response time and an analog output for capturing readings to a recorder.

6NZG0—Digital meter is designed specifically for measuring light output from LED sources. Features include data Hold and Max. recording. With large, 3½-digit display and protective sensor cap.

2ENE5 and 2ENE7—Feature data Hold, Min./Max., backlit LCD with bar graph, and a built-in data logger that automatically stores up to 16,000 readings or manually stores/recalls up to 99 readings. Software helps transfer readings to a PC for analysis.

30ZP39 and 30ZP40—UV-A/UV-C light meter data loggers designed to record and transfer data to PC for analysis. Sample rate: 1 to 3600 sec.; manually stores 99 readings. Suitable for blue light radiation hazards in welding, UV sterilization, phototherapy, graphic arts, photochemical matching, photo resist exposure, curing of inks, adhesives, and coatings.

5URG1—Environmental light meter with data logging makes it easy to transfer and store data on PCs for future analysis. Additional features include Auto-Ranging, data Hold, and Min./Max.

5URG0—Mini environmental light meter is a palm-sized, low-power consumption meter. Backlit LCD features Auto-Ranging and Max. Hold functions with low-battery alert.

21YE34 and 21YE35—LED light meters both feature a 4000-count display. 21YE34 can be used for white LEDs and standard lighting. 21YE35 measures white and color LEDs (red, yellow, green, blue, purple), as well as standard lighting, and stores/recalls up to 99 records.

4FKR4—Auto-ranging light meter measures visible light from a variety of light sources and illumination levels. Simple one-handed operation. Silicon photodiode sensor and filter. Features include data Hold, Min./Max., manual range, and zero function.

Automatic temperature compensation.

Conductivity, TDS, and Salinity Testers

- LCD display
- Auto temp. compensation, except 1ZKY6

Waterproof testers feature high-accuracy, multiranging sensors with auto power off, data hold, low-battery indication and replaceable electrode module. Adjustable Conductivity to TDS ratio factor from 0.4 to 1.0. Batteries included.

Note: See page 628 for Conductivity Standards.

MULTIPARAMETER

1ZKY6 stores up to 25 readings. Dual-display shows selected parameter and temp.

5AY46 alerts user when electrode needs replacement and stores up to 25 readings. Electrode replacement alert. 3VXN7 includes pH buffers and conductivity standards.

56AT42 is a 3-in-1 tester that displays readings simultaneously. Intuitive interface gives self-diagnostic error messages.

11L566

Handheld pH Meters

All models have automatic temperature compensation.

EXTECH

4FB74—Flip-up case provides an adjustable viewing angle. Includes pH mini-electrode, temperature probe, neck strap, and low-battery indicator.

4TXG4—Features automatic/selectable calibration, wide measuring range, and stores 200 sets of readings.

11L566—Dual-display features min./max., data hold functions, and auto power off. Stores 20M readings on SD card with date and time stamp that transfers directly into Excel. Includes pH electrode, temp. probe, SD card, (6) AA batteries, and case.

OAKTON

61UG49—Waterproof meter measures pH, ORP, and temperature. Memory of 500 data sets and backlit LCD. Includes electrode, calibration solutions, and (2) AA batteries.

793NE5—Waterproof meter measures ion concentration, mV, pH, and temperature. Has stability, calibration, and low-battery indicators. Includes LCD display, temperature probe and (3) AA batteries.

55EP30, 55EP32 and 55EP34—Waterproof meters with dual line LCD.

Benchtop Water Quality Meters

Laboratory meters display selected parameter and temperature simultaneously. Automatic temperature compensation maintains reading accuracy.

PH METERS

Automatic buffer recognition for U.S. and NIST pH buffers.

Oakton—Measure pH, temperature, and millivolts (mV). Memory for 100 data points. Accepts any pH or ORP electrodes with a BNC connector. Kit 6CAU6 includes meter, a single-junction all-in-1 temperature/pH electrode, and AC adapter. Kit 6CAU7 includes meter, double-junction pH electrode, temperature probe, electrode holder, and AC adapter. For more Oakton electrodes, see page 630.

Thermo—Orion Star meters have AUTO-READ that locks in readings. Each includes a Triode 3-in-1 pH/ATC probe.

PH/CONDUCTIVITY METER

6CAV4—Measures pH, mV, EC, and total dissolved solids (TDS). Autoranging automatically sets the best resolution for conductivity and TDS measurements. Automatic buffer recognition for both U.S. and NIST pH buffers. Includes pH electrode, conductivity/temperature probe, and probe stand.

CONDUCTIVITY METER

Read across 5 measurement ranges. Water-resistant membrane keypad.

pH Process Electrodes

- Flat tip
- 0 to 14 pH measurement range

600 Series—High-quality electrodes provide compatibility for harsh applications. Configurable for general purpose applications, low ionic conditions, or samples containing HF (hydrofluoric acid).

Note: Additional cable lengths are available; see Grainger.com

8000 Series—Modular, flat surface, self-cleaning S8000 platform features high-temperature electrolyte and enhanced ERP (extended reference path) technology that protects the reference in the presence of heavy metals, proteins, silver, and sulfides. Double junction provides extra protection in dirty applications. Ryton PPS body.

Hydrometers

DURAC

Made of lead-free ballast and glass. 12M017 features a built-in, mercury-free thermometer for measuring API. 8AMV6 is a dual-scale hydrometer used in the chemistry, pharmacology, food and beverage, starch, and similar industries. This serialized, plain form hydrometer is packaged with a multilanguage Statement of Accuracy indicating accuracy traceable to NIST. Use 8AVZ6 to determine specific gravity in battery acid. 46Z362, 13K183, and 46Z366 measure sodium chloride saturation of salt brines in food, fishing, and transportation industries.

Note: Enclosed thermometers should be used as a general reference only. For temperature-critical applications, a calibrated standard thermometer is recommended.

THERMCO

Individually serialized instruments are tested and calibrated by the manufacturer, and each is supplied with a statement of accuracy. Use a separate thermometer for taking temperature measurements, and correct for any temperature variations. Shatterproof polycarbonate construction.

VEE GEE

20KL66 provides battery acid testing. Includes thermometer, glass syphon tube, rubber bulb, nozzle, and clamp. 20KL54 gives the ratio of the mass of a solid or liquid to the mass of an equal volume of distilled water.

Electrodes

- Find more electrodes and probes on Grainger.com

Oakton—9NNX5 and 8AD42 are for water with heavy metals, organics, and sulfites. 9EZ17 and 9GFM1 for dirty water, heavy metals, and organics. 8UN13 is for high and low sodium levels.

Thermo Scientific—AquaPro 8FP12 is a clog-resistant electrode and is good for environmental and field testing of water and wastewater samples.

8XGJ3 is environmentally friendly, meets RoHs requirements. Contains no lead, mercury, or other hazardous substances.

Sure-Flow 8DRL1, 9CT13, 9JFA8 and 8DRL0 are free-flowing. For use in dirty or viscous samples.

Triode 9TJM3 and 9ANU6 have built-in temperature sensors. Use with TRIS buffers and proteins.

Fluoride 6AGG5 measures free fluoride ions in aqueous solutions.

Sensorex—Double-junction models are recommended for dirty applications.

Extech—1MN59 measures for any application that requires direct contact such as food, paper, cement, and wet surfaces. 1H143 fits virtually any pH meter that accepts a BNC connector.

3VXH4 replacement refillable pH electrode module aids in eliminating the problem of limited electrode shelf life, contamination, and usage life.

YSI—Digital pH electrode for high accuracy laboratory measurements. Sensor can be moved from instrument to instrument while maintaining its calibration data; for use with YSI MultiLab meters. Use electrode in surface water, groundwater, coastal, aquaculture, and wastewater.

Colorimeters

Include sample cells, reagents, and batteries. For cuvettes, go to Grainger.com.

Note: Copper Colorimeter 15F844 and IR interface module 15F849 are available on Grainger.com.

Lovibond Single Parameter—Improve resolution for a specified range, account for known interferences, and calibrate to any government standard such as NIST or ISO. Accuracy: ±2% full scale. Memory: 16 data sets.

LaMotte Multiparameter—Allows 25 users tests with over 75 preprogrammed tests, including absorbance and %T modes. Memory: 500 data sets.

Lovibond Multiparameter—Offers more than 90 preprogrammed methods from alkalinity through zinc, and an additional 20 methods can be user-defined. Memory: 1000 data sets.

Turbidity Meters

Testers determine cloudiness of water; for drinking water, wastewater, and environmental applications.

Note: Calibration solutions available on Grainger.com.

490W91 and 490W92—LCD display and 500-point memory. Lithium-ion rechargeable battery.

9TD12—Sealed optical system has infrared light source and 4-point push-button calibration. Includes 4 primary standards and 3 cuvettes with light-shield caps.

9NXP3—Has signal averaging and simple calibration.

25KC71—2-point calibration with LCD display. Auto power off.

MICRO ESSENTIAL LABORATORY

pH Test Paper, Pencil, and Strips

Standard Test Kit includes two 15' L rolls of 7/32" W tape; one 0.0–6.0 pH roll and one 6.5–13.0 pH roll, with two color charts.

pH Pencil gives 30-sec. color match of acid or alkali residue on paper, lumber, concrete, cement, plasterboard, painted and prepainted surfaces, textile, ceramics, and skin.

Strips give instant, easy-to-read results, with bright, long-lasting single-color matches across the entire pH range.

Description	Range	W	No. of Tests	Item No.	Pkg. Qty.
pH Paper

Automatic Water Samplers

- Peristaltic sampling pump: flow rate 1Lpm at 4 ft. head
- 15 sample sizes from 15mL to 2L
- Pickup hose: 15-ft. reinforced PVC tubing, ¼" I.D.
- Stainless steel strainer

Description	Mfr. Model	Item No.
Samplers		
Single Bottle Water Sampler, 2-gal.	WS700	36K444
Refrigerated Single Bottle Water Sampler, 2-gal.	WS700R	36K448
Dual Bottle Water Sampler, (2) 1-gal.	WS750	36K445
Sampler Accessories		
Stormwater Sampling Kit; Includes Auto-Drain Rain Gauge, Flow Sensor, Rain Sensor Rain Sensor, Flow Sensor, and Rain Gauge	WSSWK	8EPH9
Sample Bottle,	00-835	8NK17
Flow Probes		
Flow Probe with 2.5 to 5.5 ft. Extendable Handle	FP311	36K455
Flow Probe with 3.7 to 6 ft. Extendable Handle	FP111	36K453
Flow Probe with 5.5 to 14 ft. Extendable Handle	FP211	36K454

Systems take composite and discrete samples for wastewater, industrial, and environmental applications. Size and interval controls set the individual time-weighted composite samples or full-bottle discrete grab samples. An external-trigger mode controls sampling from a water level sensor, rain sensor, or other external source (not included). Automatic 15-sec. backflush cycle clears debris from the strainer and empties water from the hose to prevent contaminating the next sample.

Dual-bottle sampler has 2 pumps and allows user to set sampling mode for each pump and bottle individually.

BRIGHT DYES

Biodegradable Dye Tracers

Fluorescent dyes make water flow patterns easy to see, track, and map in lakes, reservoirs, septic systems, piping, and other bodies of water. Bright, vivid colors are easily detected in clear, deionized water in the range of 100 ppb of active ingredient—or just 10 ppb under a handheld laboratory black light (UV).

Description	Size	Color	Concentration @ 1 PPM	Item No.
Dye Tracer Liquid	16 oz	Red	1 pt to 6250 gal	8NDU0

Dippers

- Will not rust or corrode

Lightweight, durable dippers for collecting samples from streams, tanks, drums, and other hard-to-reach areas. HDPE dippers provide excellent chemical resistance—and float. Molded graduations and dual-pouring spouts to make it easier to take samples from large tanks.

3KWF6

Capacity	Graduation Subdivisions	Handle	Item No.

500 mL	50 mL	6 ft	3KWF9
500 mL	50 mL	12 ft	3KWG3
1,000 mL	100 mL	6 ft	9PWR1
1,000 mL	100 mL	12 ft	9J093

3KWL9

CONBAR Bomb Samplers

Use to extract liquid samples at specific depths from tanks, lakes, ponds, wells, etc. Composite sampler can be used to collect an average sample of a tank's contents.

Description	Cap.	Dia.	L	Item No.
Stainless Steel	125 mL	1 ⅛ in	15 in	3KWL6
Stainless Steel	1,000 mL	2 ½ in	22 in	3KWL9
Brass/Bronze	16 oz	2 ½ in	12 in	3KWJ3

SUPPLIER DIVERSITY

ecobailer

9MFC5

Disposable Bailers

- For nylon twine, see page 1097
- For sample vials, see page 657

EcoBailer—Clear PVC models allow visual inspection of well samples. They sink rapidly without requiring additional weighting material. Longer bottom spout helps prevent silt from interfering with check ball and causing potential leakage. A custom emptying device regulates discharge flow. High-density polyethylene models are designed with a thick tube wall that is less likely to bend when handled.

EcoBailer Pro—Hydrodynamic design with wide spout opening for fast sink rate while minimizing dissolved oxygen in the well sample. Easy-to-handle emptying device provides more accurate control of liquid flow into the sample bottle. Pour spout and ball retainer allow easy pouring from top of bailer.

WHEATON®

Drum Sampler

Draws and collects sample in one step to simplify sampling unknowns from drums and tanks. Filling ports are located above the screw-in bottle for a complete fill without trapped air. Chemical-resistant polypropylene sampler protects users from exposure to drum contents. 43½"L. Complete with 125mL borosilicate glass bottle with PTFE-lined cap.

Water Purification Systems

Produce purified water for laboratory, industrial, and commercial applications. All Type I water systems, start-up cartridges, and final filters are sold separately.

WATER PURIFICATION SYSTEMS

- Produce Type 1 laboratory grade water on demand

Aries Type I—Quiet recirculation pump assures constant water purity. Large capacity cartridges are spring loaded. VP Series filter cartridges sold separately.

- Bacteria removal: < 10 CFU/mL

Phoenix Type I—Ultrahigh-purity water systems deliver lab quality water on demand. The water goes through a staged purification process which includes high-purity ion exchange resins to remove dissolved minerals and internal recirculation to maintain purity. Intuitive touch screen and easy maintenance. Filter cartridges sold separately.

- Bacteria removal: < 1 CFU/mL

DEIONIZERS

- Produce Type II purified water

Hydra DI—Preassembled high-purity systems provide deionized water from city and tap water supplies using a 3-stage process. Include cartridges and water quality light.

VP SERIES SINGLE CARTRIDGE HOLDER

Unix modular, wall-mounted system employs quick-connect VP Series cartridges (sold separately) to treat water and process fluids. Holders can be easily linked together for staged filtration in downflow and upflow applications.

Rotary Evaporators

- 1300W heating capacity

Offer a digital display for set and actual heating bath temperature.

HEI-VAP EXPERT

Large dial controls to adjust rotation speed and bath temperature. Adjust the required angle of the evaporating flask individually according to your needs. Patented flask clamp Easy-Clip cannot get lost due to a connection to the vapor tube coupling ring.

HEI-VAP CORE

3.5" LCD indicates rotation speed, heating bath, and vapor temperature. Preprogrammed timer turns off evaporator and removes evaporating flasks from bath on motor lift models. Motorized models feature lift that adjusts height with the press of a button.

Disposable Glove Chambers

Hands-in-Bag atmospheric chambers are constructed of sturdy 0.003" gauge polyethylene and are polished for clarity. Seams are heat sealed for strength and inflation-tested to be leak-free. Ideal for laboratory, field sampling, and emergency isolation applications. Include sealing tape.

XPERT FILTERED BALANCE SYSTEM WITH GUARDIAN AIRFLOW MONITOR DUCTLESS FUME HOODS

Provide user protection by containing airborne powders and particulates. Help keep particles contained during weighing and power transfer. Include a built-in blower and exhaust HEPA filter. This system returns filtered air to the laboratory and requires no outside ducting.

CE (COMPACT) DUCTED FUME HOODS

Reduced hood size with vented enclosure duct, pulls contaminants out of the building for occupant safety. 1-pc., seamless liner ensures efficient airflow and has excellent chemical resistance and flame retardation.

BASIC DUCTED FUME HOODS

Designed for mobile labs, classrooms, or areas with low ceilings or narrow aisles. 16-ga., powder-coated steel liner and counterbalanced clear tempered safety glass sash. Built-in blowers are sized for up to 100-ft. duct run. Hoods include air foil, 2-pc. adjustable baffle, 100W incandescent light fixture, and 10.3" O.D. duct collar for connection to exhaust.

ISOLATOR³ HIGH-PERFORMANCE DUCTED LABORATORY FUME HOODS

Have precise baffle pressurization to help achieve superior capture and containment at standard or low volume applications. Hoods have 43½"H "full view" sash with tempered glass and a full-length handle. Slotted rear baffle helps provide even plenum balance with a 24"D interior. Hoods come prewired and include a white poly glass liner. Accessories sold separately on Grainger.com.

TELESCOPING BASE STANDS

Provide sturdy support of up to 1000 lb.

Biosafety Cabinets

Help provide personnel, product, and environmental protection from biological particulates. For use with agents that require Biosafety Level 1, 2, or 3 containment.

Purifier Logic+—Feature ADA-complaint touchpad control on right-hand side post for manual activation of blower, lights, timer, and electrical receptacles, audible arm mute, and menu selection. Built-in interval or elapsed timer for experiment monitoring, fluorescent light, or UV light control.

Labculture RELIANT—Shorter height and smaller footprint optimizes lab space. Allow preparation of low to moderate risk agents. Has energy-efficient DC ECM motor technology. Feature simple switches, pressure gauge, and manual UV timer. Esco Isocide antimicrobial coating on all painted surfaces minimizes contamination.

Liquid-In-Glass & Bottle Thermometers

Liquid-in-glass thermometers need to be partially submerged to a known depth to accurately register temperature readings. They have a marked line that indicates what level they need to be submerged in order to provide a temperature reading. They are commonly used to measure temperatures readings in vessels and beakers when the sample to be measured is shallow.

Bottle thermometers are filled with a biosafe material intended to mimic the critical samples that need to be measured. Bottles are shatter-resistant.

Digital Laboratory Incubators

BOD Incubators—Refrigerated incubators keep low temperatures for applications such as fermentation studies, or plant and insect studies. Include color touch screens, except 48VG33 has a digital display.

Cell Culture Incubators—Maintain your desired temperature, humidity, etc to grow and maintain cell cultures. 422V22 has a European plug.

Incubators—Ideal for testing sewage, wastewater, and other low and room temperature applications. Mechanical convection system for even air distribution. Microprocessor control system, PID temperature control, and LED display. Meets APHA specs for BOD testing.

Forced Air Convection Basic Oven 13R401

Gravity Convection Programmable Oven 20H915

Vacuum Convection Oven 39J318

Natural Gravity Convection Box Furnace, Benchtop 38L773

Convection Ovens and Box Furnaces

Provide controlled heat for drying, baking, sterilizing, heat treating, evaporating, annealing, and testing.

Basic Digital Ovens—Shel Lab ovens feature microprocessor temperature control and digital electronic timer. LSS ovens include PID controller and PT 100 sensor.

Programmable Ovens—Adaptive multifunctional digital PID-microprocessor controller with high-definition TFT-color display. Include adjustable overtemperature protection and 7-day timer.

Vacuum Convection Ovens—Feature cross-flow ventilation, overtemperature protection, stainless steel chamber, and vacuum gauge. Digital models offer microprocessor temperature control.

Box Furnaces—Yield consistent temperatures throughout the working chamber zone.

BriskHeat® Chemglass Life Sciences

Heating Mantles and Beaker Heaters

- 120V, except 21TW61 is 240V
- Required Benchtop Temperature Controllers sold separately

Provide uniform heat across the surface of a flask or beaker.

Heating Mantle 13N549

Beaker Heater 13P744

HEATING MANTLES

- Max. temp: 850°F

Fiberglass liner is molded to fit snugly on round-bottom flasks. The heating element is topped by ceramic and wool insulation layers and a fiberglass cloth cover.

Lower Hemisphere—For use with basket ring stands. 3" lead wire with NEMA L1-15R connector and 4-ft. power adapter cord with NEMA 1-15 plug.

Spherical—Opening adjusts for 1-, 2-, or 3-neck flasks on these full-coverage zippered mantles for basket ring stand. 6-ft. cord with NEMA 1-15 plug, except 13N559 and 13N560 have 4-ft. cord.

BEAKER HEATERS

- Max. temp: 450°F

Heaters wrap around Griffin and standard beakers and are snugged in place with a hook-and-loop closure. The heating element is laminated between two layers of fiberglass-reinforced silicone rubber that is moisture- and chemical-resistant. 2-ft. power leads with 2-prong NEMA 1-15 plug.

BriskHeat®

Heat Tape

- Suitable for electrically conductive surfaces
- Optional Benchtop Temperature Controllers sold separately

Provide fast, efficient direct-contact heating on any surface or body. CE Certified and RoHS Compliant.

Fiberglass Heat Tape—Heavy insulated tape is exceptionally flexible and durable and provides rapid thermal response. Has power leads on same end. High-temperature tie-downs for easy installation.

HSTAT Silicone Rubber Heating Tape—Include adjustable thermostat control. Rapid heat-up and thermal response.

Heated and Refrigerated Circulators

12C262

12C221

12C227

Each unit includes a controller with easy-to-read LCD displays and menu prompts to guide users. Circulators limit excessive over-temperature protection by stirring. All circulators are made from powder painted steel.

Heated Circulators are ideal for warming reagents and culture media, thawing or tempering samples, biological incubation, cell culture, enzyme assays, or controlling the temperature of laboratory equipment such as chromatography columns, viscometers and densitometers. Users can set their own temperature setpoints. The chemical resistant deck surface is cooler to the touch when operating at high temperatures.

Refrigerated Low-Profile Circulators offer quiet, energy efficient operation to regulate the amount of cooling needed. Low-profile models offer a space-saving design.

Heated and Refrigerated Circulators have large bath openings and chemical resistant decks on the units for easy cleaning.

Chillers

12C376

56DM24

60EL70

Benchtop Chillers—Provide consistent cooling for a variety of applications ranging from lasers and analytical equipment to reactors and manufacturing equipment. All units include displays and liquid level gauges or monitors.

Durachill Portable Chillers—Direct steady cooling to remove heat for a variety of applications including laser etching, AA furnaces, ICP, rotary evaporators, vacuum systems, reaction vessels, plasma etching, and condenser cooling. They feature a self-cleaning filter system, front reservoir, and a liquid level monitor that prevents pump failure. The compact design takes up less floor space.

Recirculating Chillers—Have a powerful, speed-controlled pump to cool fluids. The pump has an indirect continuous adjustment of the maximum pressure and flow rate to keep temperatures stable. Chillers include insulated bath reservoirs that allow the use of thermofluid in the external cooling circle without refilling. They have a visible fluid level display and a drain valve for safe emptying along with an accessible air filter for cleaning.

Benchtop Autoclaves

Self-contained design eliminates external plumbing and hardwiring. 316 stainless steel chamber ensures high corrosion resistance. Fast exhaust allows quick cycle time of solids and slow exhaust prevents media and liquid boil-over. Closed-door drying system maintains sterility. Drying cycle removes residual moisture after sterilization. Continuous pressure purge eliminates air pockets. Large-capacity water reservoir helps avoid frequent fill-ups. Auto shut-off feature saves energy. Standard safety features include a heat-insulated, double locking door; automatic low-water level shut-off; over-temperature cut-off; and over-pressure valve. UL Classified.

Analog—Manually-operated sterilizers include a 60-min. cycle timer, temperature selection from 100°C to 134°C (212°F to 273°F), and combination pressure and temperature gauge with peak indicator.

Electronic—Digital display shows temperature, pressure, and running time. Up to 59-min. sterilization time and temperature selection from 105°C to 137°C (221°F to 279°F). In-line particle filter protects valves. Low-water alarm sounds when reservoir needs refilling. Feature electronic pressure and temperature sensors. Standby heating keeps chamber warm for quicker cycles. Models with printer meet GLP requirements. EA models have preloaded cycles for sterilizing packs, pouches, pipette racks, and instruments.

BioClave Research Benchtop Autoclaves

Benchmark Scientific

Provide automatic, full-cycle operation—fill, sterilize, exhaust, dry—at the push of a button. Self-contained reservoirs for clean and used water do not require direct hookup to water service. Chamber pressure, temperature, and cycle state/remaining time are shown on large, clear digital displays. Safety interlock keeps door closed until pressure reaches 0 psi. Include stainless steel rack, trays, tray handle, draining hoses, and spare door gasket and fuses.

Standard 4-cycle options are preset for sterilizing liquids, wrapped instruments, or unwrapped instruments/plasticware, and can be adjusted as needed for special applications. 5th option, Dry Only, can extend drying time at the end of a cycle. A USB drive can be inserted and used as a method for storing a report of the cycle. CE Certified.

LABCONCO

Labware Washers

- 22.6 in x 21.3 in x 18.8 in interior clearance
- 93°C (199°F) rinse temp.
- 12.9 L of water used
- 304 stainless steel construction
- See Grainger.com for optional racks and other accessories

Dual washing and draining pumps reduce cross-contamination risk. Purified water pump brings nonpressurized or pressurized purified water into the tank for rinsing. 96 gpm recirculation rate. Fine-mesh drain filter traps debris. Steam cycle penetrates and removes dried residue. Scrubbers are designed to wash and dry beakers and other wide-mouth or specialized glassware.

SteamScrubber washers include upper and lower standard racks. Upper rack has side release latches for easy lift-out and an extra wash arm. Feature a forced air drying system, 25° to 80°C (77° to 176°F). **FlaskScrubber** models offer a lower spindle rack and forced air drying through spindles, 25° to 80°C (77° to 176°F).

Ultrasonic Cleaners

Inaudible ultrasonic vibrations safely clean metal and plastic instruments, machinery, and parts. Size, timing, and heat options are available for a variety of industrial and laboratory cleaning tasks, and models include a cover.

Note: Operation requires a basket or tray for both Branson and Elma Ultrasonics models, sold separately. Search on "Branson Baskets" or "Branson Trays" or "Baskets for Elma Ultrasonics" on Grainger.com.

Ultrasonic Cleaning Concentrates

Designed for maximum effectiveness with ultrasonic cleaners.

Metal Cleaners—Metal 1 works on copper, brass, and steel substrates. Removes cutting and polishing oils and makes soils easy to remove.

Metal 2 and 3 work on ferrous metals, copper, and stainless steel, plus alloys of copper, steel, and titanium. Metal 3 acts as an emulsifier to prevent soil from redepositing.

General Purpose Cleaner—Removes soils, fingerprints, dust, light oils, and greases.

Industrial Strength Cleaner—Removes grease, oils, and particulates from mechanical components. Cleans shop oils and light carbon deposits from valves and fittings.

Alconox Detergents—Concentrated formula removes soil, grease, oils, solvents, chemicals, blood, and tissue. Use on glass, metals, ceramics, plastic, and fiberglass.

Citranox Detergents—Contain acid ingredients for removing scale, metal oxides, salts, and inorganic residues. Phosphate-free.

LUXO MICROSCOPES by UNITRON

Digital Microscopes

MIDAS Color handheld inspection system captures and documents images using a polarizing filter and 5.0 MP USB 2.0 camera. Has a monocular eyepiece and is used for inspection, verification, and examination in criminology, restoration, currency, and gemstone and mineral applications. ESD-safe. Each includes Windows and Mac software plus instructions.

Microscopes

Instruments for use in research laboratories, industrial processes, clinical analysis, and educational configurations.

Clinical—Can magnify up to 1000X with 100X oil immersion lens. Includes dispersion filter and blue/yellow/green filters. Used for diagnosis and to identify pathogens in hospitals, medical and veterinary clinics, research laboratories, and universities.

Zoom Stereo—Gives two paths of light, allowing a 3D view of the specimen and provides focus and clarity for critical applications, such as dissection, microwelding, examining fossils and minerals, and in medical and biological applications.

DIVERSIFIED WOODCRAFTS

Microscope Storage Cases

Solid oak, hardwood, and oak veneer construction with a chemical-resistant and UV-resistant finish. Solid oak framed glazed doors are hinged with 3-pt. locking handles. 2 fixed and 3 adjustable 1"-thick shelves with weight capacity of 40 lb./sq. ft. Adjustable wire dividers allow for storage of microscopes of various sizes. 8GKY0 holds up to 15 microscopes, 8GKY1 up to 20, and 8RU83 up to 30.

Analytical and Precision Balances

Adventurer Series—Color touch-screen lets you access 9 application modes including weighing, parts counting, percent weighing, animal/dynamic weighing, and density determination. Analytical model has 2 draftshield doors that open wide on both sides for sample placement. USB ports in front for loading data and in back to connect the balance to a PC. Include AC adapter.

EX Explorer Series—Large 5.7" full-color touchscreen display is removable. Has 13 application modes, 21 weighing units. Frameless draftshield offers anti-static glass, flip-top and large side entry doors on top-mounted bearings on 3 and 4 place balances. 4 programmable touchless sensors for hands-free operation.

Adam Equipment HCB Series—Features capacity tracking, weighing, parts counting, percentage weighing and accumulation/totalization modes. Internal calibration with built-in mass and overload protection withstand up to 200kg. USB and RS-232 with cables. Stackable. Built-in rechargeable battery and AC adapter.

Lab Safety Supply—Features application modes for weighing, percent weighing, parts counting, check weighing, display hold, accumulate, and totalize.

CR Series—Balance provides basic weighing functionality. Built with slim, stackable design, and an enlarged platform. Also features stability indicator, mechanical and software overload/underload protection and auto shut-off. 3 AA batteries included.

CX Series—These balances have a battery life of up to 1,000 continuous hours, allowing for uninterrupted operation. They feature slim, stackable, and lightweight design. The streamlined 2-button operation means that the balance can be operated easily, and large backlit LCD display enables easy viewing of weighing results. 3AA batteries are included.

Scout SPX Series—Portable balances feature easy-to-use button operation, mechanical and software protection against shock and overload. Operate on AC adapter (included) or 4 AA batteries (not included) with auto-shutoff.

Moisture Analyzers

Instruments provide quick moisture content measurements for pharmaceutical, chemical, food, beverage, wastewater treatment, and research applications. GMP/GLP data output.

Ohaus—8MZ63 nonglass infrared heating element for drying samples. 49WD15 has halogen heating and is easy to set up with press/hold time buttons to set drying parameters. 49WD17 ensures data safety with set-up and lock temperature settings and method parameters with administrator access. Has 4.3" TFT color touchscreen display.

A&D—Feature timed or auto shut-off modes with process temperatures up to 200°C. RS-232 port. Has WinCT Moisture Software standard for 3KWP9 and 9LE54. Optional for 3KWP6.

Weighing Dishes and Paper

Round Weighing Dishes—Ideal for general purpose weighing, dispensing, storage, drying, and evaporating. Made of light gauge aluminum, no coating, and oil-free. Crimped sides.

Hexagonal Weighing Dishes—Designed for nonslip handling when weighing, dispensing, or pouring. Flat bottom for stability.

Square Weighing Dishes—General purpose, antistatic dishes withstand temperatures to 180°F. Flexible for easy pouring. Resistant to dilute acids, alcohols, and bases.

Pouring Dishes—Use for easy pouring and dispensing of samples. Withstand temperatures up to 200°F.

Weighing Paper—Semitransparent, high-gloss calendared glassine paper is an environmentally friendly alternative to styrene weigh boats. Very smooth surface does not absorb moisture while conveying gelatinous samples to and from balance. Easy to fold. Nitrogen free.

TROEMNER

Precision Weight Sets

- Class 1
- For individual calibration weights, go to Grainger.com

Precision analytical calibration weights are made of highly polished Troemner Alloy 8 stainless steel for low magnetic susceptibility, uniform consistency, and high corrosion resistance. NIST items include calibration certificate.

Scoops, Spatulas and Spoons

SCOOPS

Polyethylene—Nonspill shape scoops have a closed back and rounded corners for easy cleaning. Offer an ergonomically angled handle.

SPATULAS

Polyamide—Glass fiber reinforced. Resist solvents but not recommended for use with acids or oxidizing agents. 9MW38 is a double spatula and 9AU83 is a spoon/spatula.

Stainless Steel—Rounded blade end won't damage sensitive materials.

V-Shape—Strong enough to break up caked materials. 8RLU5 is individually wrapped, sterile.

SPOONS

Polypropylene—Steam autoclavable at 250°F (121°C). Chemical- and corrosion-resistant.

Polystyrene—Individually wrapped, sterile. 8DAL7 is flat-bottomed for use as a weighing dish.

Stainless Steel—Double-ended spoons have 2 bowl sizes. Spoon/spatulas feature a spatula end and a curved spoon end for retrieving solids and thick liquids in tall containers.

Magnetic and Hotplate Stirrers

DLAB Benchmark BURRELL elements Cole-Parmer stuart heidolph North America UNITED SCIENTIFIC SUPPLIES, INC. SUPPLIER DIVERSITY

- All models have 1 stirring position, except 22LC60 and 22LC59 offer 10

Durable Aluminum plates will not crack or chip. Ceramic plates have a chemical-resistant, reflective white surface that is easy-to-clean. Stainless Steel plates resist corrosion. Digital Magnetic Stirrers are equipped with powerful magnets and motor, giving fast and precise stirring operations. Allow digital PID feedback control for every single point. Provide strong magnetic coupling, ensuring constant stirring along with various time setting modes.

Shakers

Digital shakers are programmable and can be used in cold rooms and incubator or CO_2 environments. Platforms accommodate various flask clamp sizes. 53KC02 includes base tray. 53KC07 and 13R338 include clamps. 53KC17 and 13R340 include adhering rubber mat. 14N112 is a microplate shaker. Universal Platform 14N123 is designed for use with Erlenmeyer flasks and test tube racks. This unique magnetic attachment method is the easiest way to instantly change between flask clamps of different sizes.

Note: Clamps are available separately on Grainger.com; search for "lab shaker clamps."

Incubating Shakers

Use with platforms, flask clamps, test tube racks, microplate holders, and rubber mats.

Ohaus—Provide accurate and repeatable results. 404P69 to 404P72, and 404P75 have touchpad LED displays for temperature, speed/tilt angle, time, and all settings can be viewed simultaneously. Spill-resistant design with overload protection gives audio/visual alarm. 404P68 is a cooling orbital shaker and 404P74 is a cooling shaker.

Benchmark Scientific—14N136 MultiTherm shaker offers heating and cooling capabilities. Speed, time and temperature settings are continuously visible on the LCD, simultaneously showing both actual and selected values. Integral over-temperature control ensures long life, safety and sample integrity. 14N131 Incu-Shaker provides digitally regulated temperature with precisely controlled, circular (orbital) mixing, optimized for the culture of a wide variety of cell types. Includes standard rubber mat platform.

Rockers and Rotators

ROCKERS

Produce reliable results in staining, destaining, blotting, and gentle mixing. Available with 2-dimensional see-saw action and 3-dimensional gyrating (swirl) action.

BlotBoy 3D—Tridirectional tilt angle and speed are optimally set for blot washes and gel staining/destaining. Supplied with 12" x 12" platform and autoclavable flat mat.

BenchRocker 3D—Provides variable speeds and tilt angles required for molecular and biological mixing. Includes 12" x 12" platform and 2 mats (flat and dimpled).

VSR-50—Has a rhythmic side-to-side motion. Interchangeable tables can be tilted 15°. With 12" x 14" platform. Includes nonslip rubber mat.

ROTATORS

Rotator Genies hold a wide variety of tubes, flasks, microplates, bags, and odd-shaped vessels at any angle. 13R325 has a spring-clip plate system. 13R322 can quickly convert from rocking to rotating motion in seconds. Magnetic platform and clip plate system securely holds a variety of containers.

Heavy-Duty Vortex—Designed for continuous-duty operation and has the ability to handle accessory components over entire speed range. Include detachable 3-wire cord and plug, universal holder, foam insert for 1.5 to 2mL microtubes and cup head, and tube rack.

Microplate Vortex—Provides high-speed and small orbit for effectively and consistently mixing of microplates. Delivers continuous duty throughout the speed range. Includes microplate adapter, cup head, and detachable 3-wire cord and plug.

Microtube Vortex—Features a Multi-Head cup head for general-purpose mixing of up to eight microcentrifuge tubes and includes a microtube holder.

Mini Vortex—Sturdy design provides stability and reliability vortexing action. Offers gentle shaking or high speed mixing for vigorous vortexing of samples.

Multi-Tube Vortex—Allows multiple samples to be processed simultaneously. Digital display of time and speed. Microprocessor controlled with interval pulse mode to allow more vigorous mixing.

Reax Vortex—Standard model 38RU12 has 5mm vibration orbit for use with high-viscosity media or solids. Features continuous/automatic switch modes and includes a plate for 20mm dia. test tubes. 38RU14 features an analog dial speed control with accurate rpm numbers setting and electronic speed control with constant rpm output. All-purpose 38RU16 has 3mm vibration orbit and includes an attachment for 26 vessels (10 to 16mm) and 12 vessels (16 to 32mm). Digital process timer allows for unattended operation from 1 to 999 min.

Vortex—Counter-balance system creates instant vortexing action while providing smooth vortexing including large sample sizes such as full 50mL tubes. Has cold room incubator compatibility and suction feet securely hold samples, preventing spillage. Speed range from 200 to 3200 rpm and 3mm vibration orbit.

Sieve Shakers

Meinzer II Tabletop Sieve Shaker—Portable electromagnetic vibrating shaker accommodates 8 full-height or 15 half-height sieves, plus pan and cover. Mechanical timer.

DuraTap Motorized Sieve Shakers—Made with rugged steel and alloy materials. Digital timer.

Sonic Sifter Separators—Settings can be varied for different dry particle densities and textures with automatic timing that ensures repeatable and reproducible results. Oscillating column of air tries the particles 60 times per sec. allowing for reduced testing times. Precise sieving instrument for fine particle separations ranging from 5.6mm to 3 microns.

Endecotts Sieve Shakers—Analog model has a 0- to 60-min. timer, or can be set for continuous sieving. Digital models have an electromagnetic drive and are suitable for wet or dry sieving.

Centrifuges

Microliter Centrifuges—For use in molecular biology applications such as PCR, DNA and RNA extraction. Available with or without temperature control.

MyFUGE Mini Benchtop Centrifuges—Space-saving personal centrifuge has easy lid-activated Start/Stop control. Near-silent operation.

- Includes adapters for 0.5 and 0.2mL
- Choose lid color: blue, green, red, purple, or clear

Benchtop Centrifuges—General purpose centrifuges are for spinning blood, urine, cell/tissue culture, plates, and bottles. 38LZ08, 38LZ41, and 38LZ39 have a robust temp. control system and feature a Versa-Rotor, one rotor for multiple applications.

USA E8 Variable-Speed Benchtop Centrifuge—Angled table top unit spins up to 8 tubes with precision results.

USA E8 Portable Centrifuges—Angled 8-place centrifuges include a car power cord and a car seat for easy operation in the field.

Overhead Mixers

- Mixer motors, support stands, and mixing paddles, sold separately

Digital speed display with speed and torque abilities for a wide range of volumes and viscosities. Compact units are ideal for fume hoods or enclosed work stations. Mix reactions, samples, dissolutions, and dilutions. 38C831 has a countdown timer. Mixes reactions, pharmaceuticals, and suspensions. 38C834 mixes emulsions and serves as an alternative to a homogenizer. 38C833 mixes creams, lotions, and personal care products. 38C832 mixes tars, gravel, polymers, and adhesives.

Consistometers

- 30 to 30,000 cP viscosity range
- Ambient test temperature

Use these instruments to accurately check laboratory or production samples against consistency, viscosity or flow rate standards. Made of 316 food grade stainless steel engraved with a series of precise graduations at 0.5 cm intervals. Equipped with two leveling screws and a spirit level for accurate set up. Spring-loaded gates prevent premature flowing of samples and are portable and easy to clean.

LSS · Dynalon Labware quality . value . service

Plastic Bottles

- Round shape except 3UEH3 and 3UEH6

Screw-on caps make a leak-resistant seal to keep liquid samples safely contained.

Note: Detailed information on chemical resistance, plasticware compatibility, and labware cleaning and disposal is available on Grainger.com.

NARROW- AND WIDE-MOUTH

Amber HDPE bottles protect light-sensitive samples.

Graduated bottles have printed mL and oz. graduations and a write-on label area.

ENVIRONMENTAL SAMPLING

Leakproof bottles resist breakage for safe sampling, transport, and storage.

OCTAGONAL-SQUARE BOTTLES

Optically clear, easy-grip transport bottles take up less shelf space than round bottles. Graduations are molded in.

Bottle Top Dispensers

WHEATON® · DLAB

- Dispensers provide superior chemical resistance

Wheaton—Designed for handling liquids safely and provides reliable measuring. Feature in-lab calibration and instant volume setting. Attaches directly to bottles.

DLAB—Dispense common laboratory solvents and reagents with high accuracy and repeatability. Attach directly to bottles with standard GL45 thread.

Volume	Graduations	Accuracy	Includes	Brand	Item No.

Wash Bottles

- LDPE bottles with polypropylene caps

Integrated spout squeeze bottles provide quick, handy cleanout of laboratory glassware and plasticware.

Printed bottles save time and help eliminate cross-contamination.

Items beginning with "24J" are printed with chemical name and formula, Chemical Abstract Service number, and NFPA warning diamond for easy identification and safety compliance.

Note: Labware imprinting indicates imprinting on bottle, cap color, or write-on label.

Solvent Dispensing Bottles MENDA

32EZ14

- HDPE bottles
- Stainless steel pumps
- Replacement bottles available on Grainger.com

Automatic dispensers operate one-handed without removing the lid. Imprinted units are labeled in nonsmearing ink with one of the three most commonly used chemical names.

One-Touch and Take-Along dispensers allow cotton or pad application, with excess fluid seeping back into the bottle.

Pure-Touch and Pure-Take dispensers reduce backflow risk with raised purity protector to keep fluid supply contaminant-free. Pure-Touch units reduce vapor escape; for use with noncotton brushes.

ESD (electrostatic dissipation) bottles are made of durAstatic HDPE and embossed with the ESD protective symbol for fast identification.

Buchner Porcelain Funnels

Funnels have heavy wall stems with a sealed-in porcelain fritted disc and is beaded at the top for additional strength. Not recommended for use where pressure would exceed 15 psi.

Glass Test Tubes

Culture Tubes are disposable screw-cap tubes suitable for tissue culture and general bacteriological use. Chevron marking area. Shrink-wrapped in plastic film and packed in convenient trays. Screw caps sold separately; see 9UDE6, 9PX55, and 9UDE8 on Grainger.com.

Kimble Chase Test Tubes are disposable.

Test Tubes with and without Rim are high-quality Type 1 borosilicate glass that stands up to repeated sterilization, extreme high temperatures, and thermal shock from sudden temperature changes. Low-expansion glass withstands temperatures up to 932°F (500°C).

Ampules

Standard—Commonly used for packaging certified standards. Made from low-potassium borosilicate glass that conforms to USP Type 1 and ASTM E 438 Type 1, Class A requirements.

Prescored—Prescoring eliminates filing. Stems can be pull- or tip-sealed. Clear models are made from low extractable borosilicate glass that conforms to USP Type 1 and ASTM E 438 Type 1, Class A requirements. Amber models are made from amber borosilicate glass that conforms to USP Type 1 requirements for light transmission to protect light-sensitive products.

Cryogenic—Cryule ampules allow for biological sample preservation in glass and storage at low temperatures. Can be used in the vapor phase of liquid nitrogen. For Cryogenic Gloves, sold separately, see page 1705. Made from low extractable borosilicate glass that conforms to USP Type 1 and ASTM E 438 Type 1, Class A requirements.

Serological Pipettes

LSS Dynalon Labware quality . value . service

- Easy-to-read markings

Ascending and descending graduations ensure accurate pipetting. Calibrated "to deliver" (TD) to within the tolerance shown. Sterilized with gamma radiation.

Lab Safety Supply—Polystyrene pipettes with easy-to-read graduations printed in black ink, and premium-material filter plug. Color-coded stripes and packaging enable quick volume identification.

Dynalon—Made of crystal-grade polystyrene for improved clarity. Drawn tips allow every drop to drain freely. Cotton plugged. Nonpyrogenic to 0.01EU/mL. Bulk pack 4YMV2 has inner packs of 25.

Single Channel Pipetters

Dragon Lab pipetters are easy to calibrate and maintain with the included tool. Digital display shows volume setting. Low-force design helps reduce repetitive strain injuries.

Eppendorf Research Plus high-precision pipetters have a spring-loaded tip cone and are autoclavable.

Nichiryo autoclavable pipetters feature excellent solvent resistance and one-touch calibration. Digital display allows easy incremental volume adjustment. They have ceramic pistons, filtered nozzles, and a nonmetallic tip ejector for safe disposal of used tips.

Wheaton Acura autoclavable pipetters feature ultrasoft plunger for tip ejection, ejector shaft height adjustment system, and swift-set user calibration.

Electronic Pipetters

Offer 6 working modes: Forward, Reverse, Stepper, Dilution, Tactile, and Mixing. These ergonomic units are designed with Right and Left display reading, variable working speed, cycle counter, and an easy-to-use tip ejector. Micropipetters have a reduced shaft length and conical end for easy access to microtubes and microplates. Macropipetters feature an interchangeable nozzle protection filter and adapters for Pasteur pipettes. 360° rotation for best working position.

Laboratory Syringes

Air-Tite Products Co., Inc.

All-Plastic Syringes—Contain no rubber or silicone oil that could contaminate chromatography or sensitive laboratory samples. Certified for use with most common organic and inorganic chromatography solvents. Positive safety stop helps prevent spills. More chemically and biologically inert than 3-part syringes. Polypropylene barrel and HDPE plunger.
- Individual sterile strip packs

3-Part Disposable Syringes—Positive safety stop helps prevent spills. Polypropylene barrel and lubricated synthetic rubber gasket provide smooth plunger movement. Free from latex, BPA, PVC, and phthalates.
- Individual sterile strip packs

Reusable Glass Syringes—High-purity borosilicate glass syringes are reusable for laboratory and research applications. Barrels and pistons are interchangeable.
- Individually boxed

Chromatography Autosampler Vials

Made of Type 1 borosilicate glass, which offers resistance to chemical leaching and heat shock. Amber vials are suitable for light-sensitive applications. 49AR35, 49AR36, and 49AR68 are convenience packs, packaged in a clear tray that fits into a bench drawer for easy access. The packaging helps keep products visible and particle-free. Bulk vials are designed for use in most autosamplers. 9MHC8 and 8XAV4 can also use a plastic snap-cap closure that does not need crimping or decapping tools.

Crimper and Decapper—Handheld Crimper 9EZ20 features an adjustable stop to determine seal tightness. Handheld Decapper 9A893 has a precision-tooled decrimping jaw.

Chromatography Vials and Syringes

J.G. Finneran Associates, Inc. — Supplier Diversity — HAMILTON — Supplier Diversity

Sample Vials—Type 1 borosilicate glass construction for resistance to chemical leaching and heat shock.

Vials—Feature an innovative StepVial design that precisely centers a limited volume insert in the vial neck to help ensure dependable use with auto samplers. Sturdy neck design allows use with Poly Crimp seals and helps minimize neck breakage while uncapping.

Syringes—Gas-tight syringes dispense liquids and gases. Each feature a precision-machined PTFE plunger tip that creates a leak-free seal, useful with heterogeneous samples to help reduce the chance of a deposit that could cause the plunger to freeze.

Microliter syringes are designed for liquids and feature a stainless steel plunger that fits the glass barrel with a tolerance smaller than 100 millionths of an inch to help extend syringe life. Fluid path is borosilicate glass and stainless steel.

Laboratory Wipes

For cleaning delicate surfaces and equipment in laboratories, research facilities, hospitals, and manufacturing settings.

GEORGIA-PACIFIC ACCUWIPE

Recycled Fiber—Made with 100% recycled fiber. May contain incidental, less than 0.5% nonrecycled fibers.

KIMBERLY-CLARK PROFESSIONAL

KIMTECH SCIENCE KIMWIPES Delicate Task—Light-duty wipes easily pick up liquids and dust. Antistatic dispensing helps reduce lint and electrostatic discharge.

KIMTECH SCIENCE Precision—Soft, absorbent wipes for general low-lint cleaning. Antistatic dispensing reduces lint. Coated packaging helps protect wipes from spills.

BERKSHIRE

General Cleaning—Nonwoven polyester/cellulose blend designed for spill control and wet wiping. Durx wipes are white; Bluesorb 750 are blue.

Presaturated—For use in wet cleaning and disinfecting of critical surfaces with no residue, where control of flammable solvents is required.

Polyester Knit—Excellent nonshedding wipes for applications where high concentrations of liquid are in use with rough surfaces. Ideal for aggressive cleaning and disinfecting.

Gentle Task—Extremely soft and gentle on surfaces. Very low lint. Contains no binders or additives. EcoClean 60 wipes are biodegradable.

Cleanroom Swabs

- Pkg. of 100

Swabs are made for a variety of cleaning tasks in critical applications and cleanroom environments. 100 ppi reticulated foam. Laundered to be clean and pure before use.

Sock-Tip Foam—Solvent-resistant polypropylene handles sandwiched between two layers of the polyurethane foam head material.

Closed-Foam—Generate low particles and fibers; free of silicone, amides, and DOP (dioctyl phthalate).

Open-Cell Foam—Polyurethane foam sock heads over a rigid core.

Polyester Knit—Continuous-filament polyester knit heads for low particles, fibers, ions, and extractables. Highly abrasion-resistant and autoclavable.

Polyester Nonwoven—Flexible tips; made of hydroentangled polyester with low particle generation.

Filters and Filter Paper Grades

Grade/Size	Characteristics	Application
Filters		
A	Fine porosity, fast flow rate	Radioimmunoassay and gravimetric determination of airborne particulates.
A-E	Fine porosity, fast flow rate, 99.98% DOP effic.	Primarily used in suspended solids and air monitoring.
C	Fine porosity, fast flow rate	RIA procedures and harvesting lymphocytes.
E	Fine porosity, fast flow rate	Suspended particle analysis in water, cell harvesting, prefiltration, and air monitoring.
F	Fine porosity, medium flow rate	Filter diluted aqueous solutions pre laser spectroscopy; TCLP analysis; & collect fine precipitated proteins including immunoglobulin.
TSS	High flow rate & cap., excellent wet strength	High-efficiency medium for testing dissolved and suspended solids in water and wastewater.
VSS	High loading capacity	Monitoring air pollution & high-temp. flue gas, filtering high-temp. solvents, determining fixed & volatile solids in high-heat applic.
Filter Paper		
CFP2, 8µm	Medium to slow flow rate	General filtration and absorbent conveyance, in plant growth trials, and in monitoring air and gases for contaminants.
CFP40, 8µm-10µm	Medium retention and flow rates	General liquid and gas procedures and liquid food tests.

Syringe Filters

Molded-in polypropylene housings for a reliable seal without adhesives. Supplied sterile in individual blister packs.

Anotop—Made of inorganic membranes; low protein binding. For organic solvents and aqueous materials.

Glass Fiber—Handles viscous solutions or turbid liquids.

Nylon—Universal filter for analytical procedures such as chemical and beverage filtration.

GD/X—Designed with a prefiltration stack and process 3 to 7 times more sample volume.

PES—Polyethersulfone material has a low affinity for proteins and extractables; faster flow rate than PVDF.

PVDF—Hydrophilic membrane for filtering nonagressive aqueous and mild organic solutions.

PTFE—Hydrophobic membrane has great temperature resistance.

MCE—For aqueous solutions, oil particulates, and bacteria. Effectively binds trace proteins.

Puradisc—Special tube tip allows the sample to be accurately dispensed into a microvial.

Dishes

11L825

Designed for optimum culture growth and media shelf life. Dishes made from polystyrene material are single-use, preventing risk of contamination.

Petri Dishes—Flat design provides uniform agar thickness, promoting culture growth.

Tissue Culture Dishes—Treated dishes are supplied sterile (gamma irradiated) and are vacuum-gas plasma treated for consistent hydrophilic cell attachment surface.

453U29

Batteries & Chargers

- Compatible with 20V MAX, 60V MAX, and 120V MAX tools
- LED state-of-charge display
- Lithium-ion batteries
- Rapid simultaneous charging

Dual-voltage battery provides extended run time for 20V tools and ample power for 60V tools. The battery capacity listed for FLEXVOLT batteries is the amp-hour (Ah) rating when operating at 20V. This capacity is reduced when operating at 60V.

Cordless Rotary Hammers

- SDS-max chuck
- Brushless motor
- 1 ¾" capacity in concrete
- 1 ¾" solid bit capacity

Hammers utilize SHOCKS Active Vibration Control technology. Ideal for horizontal serial drilling for #4–#8 rebar, dry coring, and chipping in any mid- to upper-wall and ceiling application. E-Clutch system provides enhanced control in bind-up situations.

DEWALT 20V MAX LITHIUM ION

Batteries & Chargers

- Lithium-ion batteries
- 3-LED fuel gauge shows state of charge
- XR batteries: 0°F min. operating temperature

Batteries fit DEWALT cordless tools with the same voltage. A 20V MAX* battery works with 20V MAX*, MAX* XR, and Atomic series tools. MAX XR* batteries have more capacity than standard MAX* batteries.

Tool Connect Tags & Router

- 100 ft. signal range

Tracking tags and battery connectors pair with the Tool Connect app to locate tagged tools and equipment. **Tool tags** attach to equipment with glue, screws, or zip ties. **Tracking connectors** slide onto the base of a compatible tool to form a new interface for the battery. They emit a Bluetooth signal that broadcasts up to 100 ft.

Subflooring 22A512

Corded Screw Guns

DEWALT SENCO Milwaukee

- ¼" drive size
- Variable speed
- Reversible
- 120V AC

An adjustable nose sets the drive to fasten screws to a consistent depth. Their clutch automatically disengages the drive at the set depth to prevent overdriving. **Drywall screw guns** set screw heads flush with the drywall paper surface. **Metal-fastening screw guns** drive sheet metal screws and other metal-to-metal or metal-to-wood fasteners. They provide more torque than drywall screw guns. **Subflooring screw guns** have an extension which allows the user to operate the device from a standing position to reduce back strain and speed screw installation. They're sometimes used for installing decking and drywall ceilings.

Free Speed	Torque Range	Current	Clutch Type	Includes	Brand	Item No.

Corded Joist & Stud Right-Angle Drills

- ½" chuck
- 2 speed settings
- ½" drilling capacity in steel
- 120V AC

These two-handled, high-torque drills drive wide drill bits and hole-saw attachments to make large holes for running duct, pipe, and wiring through framing and flooring. Users hold them at waist level and lean into them to increase drilling force. The chuck is oriented 90° to the tool body, so they have a slim profile for accessing corners or narrow spaces.

Auger Drill Bits for Aggressive Drilling

Feature wide flutes that can evacuate chips more efficiently and allow the bits to drill more deeply than other styles of drill bits for wood. A self-feeding tip pulls the bit into the workpiece and helps prevent it from moving or walking during drilling.

Pole Auger—Extra-long bits can drill deep holes through timber, pressure-treated lumber, and hollow fiberglass or composite utility poles.

Ship Auger—Long bits can drill through wood with embedded nails and they create deep holes in timber, pressure-treated lumber, and utility poles.

Quick-Change Hex-Shank Flat Spade Drill Bits

These bits have a flat head with two cutting spurs and produce clean holes at high drilling speeds faster than standard twist drill bits. A quick-change hex shank allows quick, toolless drill bit changeouts compared to bits with a standard hex shank. Commonly used in construction and maintenance applications to drill shallow holes for running wire and pipe.

Self-Feed Drill Bits for Boring

Have beveled saw teeth and a screw tip that pulls the bits into the workpiece to quickly bore holes in wood without applying pressure. The bits' teeth can be resharpened and their screw tip can be replaced for long bit life. A quick-change hex shank allows quick, toolless drill bit changeouts compared to bits with a standard hex shank. Commonly used in construction, electrical, and plumbing applications to drill holes for running pipe, wire, and vents.

Cable Drill Bits for Wire Systems

Bits can bend around obstructions when drilling holes for running wire and cable in hard-to-reach areas. Wire-fishing holes allow wires to be pulled through surfaces after drilling. All bits, except Interchangeable Head and Shank bits, have a tip that prevents it from moving or walking during drilling.

Auger-Style—Wide flutes evacuate chips more efficiently than other styles of cable drill bits.

Interchangeable Head and Shank— Allows users to exchange the bits' head with a compatible head of a different style or replace the bits' shank with a shank of a different length.

Screw-Point—The tips have sharper threads and provide more pulling power than other styles of cable drill bits.

Serrated-Head—The serrated head helps pull the bits through walls and other surfaces.

Drill Bits for Glass, Tile, and Stone

These bits are designed to avoid damaging the bits or the workpiece when drilling holes in glass, ceramic, tile, natural stone, and porcelain.

Arrow-Tip Drill Bits for Glass and Tile—Have a tip that helps stop them from moving or walking when starting a hole, and allows bits to drill holes that are smaller than their bit diameter. Create holes in tile, porcelain, ceramic, and mirror glass and are typically used for creating smaller holes than would be possible with diamond-tipped core bits for tile.

Diamond-Tip Core Bits for Tile—Bits have hollow centers surrounded by cutting edges that have been coated with diamond abrasives to allow the bits to grind through porcelain, tile, and other very hard materials. They cut through the perimeter of the hole during drilling and leave a solid slug of material that can be ejected through a side slot on the bits. Typically used for drilling larger holes than would be possible with arrow-tip drill bits for glass and tile.

Drill Bits for Natural Stone—Feature multiple cutting edges that allow them to create holes in natural stone tile, slate, granite, and other hard specialty tiles more quickly than standard drill bits for glass and tile. Bits have tips that help prevent them from moving or walking when starting to drill.

Drill Bit Kits for Porcelain Tile—Kits each have a drill bit for creating holes in porcelain tile with a scratch hardness of eight or less. They also come with a pilot bit for creating a starter hole prior to drilling which helps prevent the drill bit from moving or walking when starting to drill. Bits have spiral flutes that pull dust and chips out of the hole during drilling.

Step Drill Bits

These cone-shaped drill bits have steps of increasing diameter marked along their cutting head and allow for a range of different sized holes with a single bit. As the bit is pushed into a piece of sheet metal or other thin material each step on the bit widens the hole. They have a self-starting split point, except 3-Flat Shank Step Drill Without Point bits, that prevents the bits from moving or walking when starting to drill. Suitable for drilling thin materials up to 1/8" thick.

3-Flat Shank Step Drill Bits—Have shanks with three flats that help prevent the bits from slipping in the drill chuck during drilling.

3-Flat Shank Step Drill Without Point—Bits have no self-starting point and require a starter hole before drilling.

Hex-Shank Impact-Rated Step Drill Bits—Have a hex shank and install into impact drills with standard three-jaw chucks.

Understanding Hole Saws and Hole Cutters

Hole saws and **hole cutters** connect to handheld power drills and cut holes faster than drill bits in wood, metal, and other materials. Their narrow cutting edge forms a ring and removes a core of material from a workpiece. **Hole saws** have a linear-edge blade welded to the rim. **Hole cutters** have individual carbide-tipped cutting teeth, and generally have fewer teeth and a thicker body to cut more aggressively than hole saws. **Arbors** attach a hole saw or cutter to a drill. Their shank fits into the drill chuck and their collar holds the saw or cutter. An arbor may be **built-in** with its collar fixed to the saw or cutter, **included** so it can attach or detach for use on another tool, or **not included**.

Metal-Cutting Hole Saw Kits

Standard hole saws fit standard power drills to cut steel, mild alloys, and aluminum, such as sheet metal and thin plate metal. **Impact-rated hole saws** fit impact drivers to cut steel, aluminum, and some stainless steel.

Bit Holders

- Bit holder drive: Hex

Ceiling Lag Screwdrivers—For use when driving ceiling lag screws.

Covered Bit Holders—Have a non-marring cover that provides a protective barrier when using bits on finely finished workpieces

Bit and Flexible Extensions—Help extend your reach for hard-to-access fasteners. Flexible extensions allow access around obstructions to reach fasteners.

Drive Guides—A retracting sleeve helps steady long fasteners and aids in driving fasteners in hard-to-reach applications.

Hand Screwdriver Bit Sets 55KH40

Power Screwdriver Bit Set 3MJA9

Screwdriver Bit Sets

Hand screwdriver bit sets include various bits for driving screws and other fasteners by hand tool application. Models are available for industries such as automotive, electronics, and carpentry. Cushion-Grip handles offer greater torque and comfort. Industrial strength steel bits offer durability and long life. **Power screwdriver bit sets** maximize your drilling and driving capabilities with these versatile and durable bit sets.

Nutsetters and Sets

- Tool insertion size: ¼" Hex

These nonimpact-rated tools are used with power drills and power screwdrivers to generate more force (torque) in rotating hex head fasteners than a hand-operated tool.

Impact Wrench 4JB72

Impact Wrench 6KX41

Impact Wrench 1GUB3

Corded Impact Wrenches

- 120V AC

These wrenches combine a hammer-like impact with high rotational torque to drive and remove fasteners. The impact force is initiated when resistance with the fastener is detected, and the impact is delivered in bursts to reduce stress on the user. Wrenches use interchangeable impact-rated sockets and are for use in general maintenance, construction, and automotive applications. Tools allow long run times for repetitive tasks, maintain full power during operation, and have no batteries to recharge.

Corded Shear Wrench

- 120V AC
- 12 A

This tool is used with tension control bolts to ensure the correct tension is achieved. Wrench is nonimpact so it operates more quietly than impact tools and transfers less vibration to reduce the risk of hand injuries and fatigue. Requires no calibration and does not require adjustment prior to use. Tool allows long run times for repetitive tasks, maintains full power during operation, and has no batteries to recharge.

ROUND SHANK

Corded Hammer Drills

- ½" chuck
- 120V AC
- Reversible

Hammer drills spin their bits and vibrate them at high speed and low impact for drilling small-diameter holes in asphalt, brick, cinder block, tile, and light concrete more cleanly and easily than drilling alone. Tools have a rotate-only mode to drill wood, metal, plastic, and other non-concrete materials. For use in applications that require more power than a standard drill but don't require the large-diameter bits and heavy impact of rotary or demolition hammers. Tools allow long run times for repetitive tasks, maintain full power during operation, and have no batteries to recharge.

Details on page A1.

Impact Screwdriver Bit Sets

Provide a range of drilling and driving capabilities, and are precision machined for an exact fit allowing quick changeouts.

Impact Driver Bit Set 60HU17

Pivot Holder Bit Set 10Z808

Power Bit Set 30TH76

No. of Pieces	Hex Shank Size	Fastening Tool Material	Includes	Brand	Item No.
Impact Driver Bit Set					
34	¼ in	Chrome Vanadium Steel	Handle, Bit Holder, Metal Storage Box, Bits, PoziDriv (1) #1, (1) #2, (1) #3, Square (1) #1, (2) #2, (1) #3, Phillips (2) #1, (2) #2, (2) #3, Hex Metrix (1) 3.0mm, (1) 4.0mm, (1) 5.0mm, (1) 6.0mm, Hex Inch (1) ⅛ in, (1) 9/64 in, (1) 5/32 in, (1) 3/16 in, (1) 7/32 in, (1) ¼ in, Torx(R) (1) T10, (1) T15, (2) T20, (2) T25, (2) T30, (1) T40	Wiha Tools	**440A44**
100	¼ in	Alloy Steel	¼" Nut Driver, 5/16" Nut Driver, Hex ¼", Hex ⅛", Hex 3/16", Hex 3/32", Hex 5/32", Hex 7/64", Hex 9/64", PH1, PH2, PH3, PR2, SL #12, SL #4, SL #6, SL#10, SL#8, SQ1, SQ2, SQ3, T10, T15, T20, T25, T27, T30	Milwaukee	**60HU17**
Magnetic Drive Guide Set					
7	¼ in	Steel	3 in Magnetic Drive Guide, (2) PH2 Insert Bits, SQ2 Insert Bit, T20 Insert Bit, (2) T25 Insert Bits	Milwaukee	**419J71**
Pivot Holder and Bit Set					
11	¼ in	Steel	(1) Phillips Bit 1 in P1, (1) Phillips Bit 1 in P2, (1) Phillips Bit 1 in P3, (1) Slotted Bit 1 in SL ¼ in, (1) Slotted Bit 1 in SL ⅛ in, (1) Slotted Bit 1 in SL 3/16 in, (1) Slotted Bit 1 in SL 9/32 in, (1) Square Bit 1 in SQ, (1) Square Bit 1 in SQ2, (1) Bit 1 in T25, (1) Shockwave 30 Degree Knuckle Pivoting Bit Holder	Milwaukee	**10Z808**
Power Bit Set					
7	¼ in	Steel	(3) #2PH/#2PH, #2SQ/#2SQ 2⅜ in Bits Plus Magnetic Screw-Hold Attachment	IRWIN	**30TH76**
Screwdriver Bit Set					
22	1 in	High Speed Steel	(5) TORX(R) Bit 1 in T25, (3) Phillips Bit 1 in P2, (3) TORX(R) Bit 1 in T20, (3) Square Bit 1 in SQ2, (2) Phillips Bit 1 in P3, (1) SHOCKWAVE(R) Compact Magnetic Bit Holder, (1) Phillips Bit 1 in P1, (1) Square Bit 1 in SQ1, (1) Square Bit 1 in SQ3, (1) TORX(R) Bit 1 in T10, (1) TORX(R) Bit 1 in T15, (1) TORX(R) Bit 1 in T27, (1) TORX(R) Bit 1 in T30, (1) Slotted Bit 1 in SL ⅛ in, (1) Slotted Bit 1 in SL 3/16 in, (1) Slotted Bit 1 in SL 9/32 in, (1) Slotted Bit 1 in SL ¼ in	Milwaukee	**423P08**
26	¼ in	Steel	(1) Phillips Bit 1 in P1, (1) Phillips Bit 1 in P2, (3) Phillips Bit 1 in P3, (1) Square Bit 1 in SQ1, (2) Square Bit 1 in SQ2, (1) Square Bit 1 in SQ3, (2) TORX(R) Bit 1 in T20, (2) TORX(R) Bit 1 in T25, (1) TORX(R) Bit 1 in T30, (1) ¼ in Hex to ⅜ in Square Adapter, (1) ¼ in Magnetic Nut Driver, (1) Phillips Bit 2 in P2, (1) Square Bit 2 in SQ2, (1) TORX(R) Bit 2 in T20, (1) TORX(R) Bit 2 in T25, (1) Slotted Bit 1 in SL 3/16 in, (1) ⅜ in Drive: ½ in Socket, (1) ⅜ in Drive 9/16 in Socket, (1) ⅜ in Magnetic Nut Driver, (1) 5/16 in Magnetic Nut Driver, (1) SHOCKWAVE(TM) Compact Magnetic Bit Holder	Milwaukee	**19RK07**
35	¼ in	Steel	Impact Ready Socket Adapters ⅜ in, 7/16 in, ½ in, 9/16 in, Impact Ready ¼ in Hex Shank Adapter, Impact Ready Nutsetters 5/16 in, ⅜ in, ¼ in, 3 in Impact Ready Screw Lock Holder, 2 in PH2 Impact Ready Bits, 1 in Square Impact Ready Bits: SQ1, (4) SQ2, SQ3, 1 in Philips	DeWalt	**20UH15**
40	¼ in	Steel	¼ in Nutsetter, 5/16 in Nutsetter, Impact Ready Sleeve, 3 in Impact Ready Screw Lock Holder, 6-2 in PH2 Impact Ready Bit, 2 in SQ2 Impact Ready Bit, 2 in T25 Impact Ready Bit, 2 in SL8 Impact Ready Bit, (4) 1 in PH2 Bit, (2) 1 in SL8 Impact Ready Bit, 1 in	DeWalt	**20UH16**
50	¼ in	Steel	(1) Compact Bit Holder, (1) ¼ in Magnetic Nut Driver, (1) 5/16 in Magnetic Nut Driver, (1) ⅜ in Socket Adapter, (1) ½ in Socket Adapter, (1) Insert PH1 Bit, (4) Insert PH2 Bits, (2) Insert Phillips Recessed Bits, (2) Insert PH3 Bits, (1) Insert SQ1 Bit, (4) Insert SQ2 Bits, (3) Insert SQ3 Bits, (1) Insert T15 Bit, (2) Insert T20 Bits, (5) Insert T25 Bits, (1) Insert T30 Bit, (1) Insert SL#6 Bit, (1) Insert SL#10 Bit, (1) Insert 3/16 in Hex Bit, (1) Insert ¼ in Hex Bit, (2) 2 in PH2 Bits, (1) 2 in PH3 Bits, (2) 2 in SQ2 Bits, (1) 2 in SQ3 Bit, (1) 2 in T20 Bit, (1) 2 in T25 Bit, (1) 1/16 in Titanium Red Helix Bit, (1) 3/32 in Titanium Red Helix Bit, (2) ⅛ in Titanium Red Helix Bit, (1) 3/16 in Titanium Red Helix Bit, (1) 7/32 in Titanium Red Helix Bit, (1) ¼ in Titanium Red Helix Bit	Milwaukee	**48ZJ62**
60	¼ in	Steel	Compact Bit Holder, 6 in Bit Holder, Magnetic Nut Drivers ¼ in, 5/16 in, Socket Adapter ⅜ in, Hex Drill Bits 1/16 in, 3/32 in, ⅛ in, 5/32 in, 3/16 in, ¼ in, Double Ended Power Bits PH2/SQ2, PH2/T25, PH2/SL#10, T20/T25, Insert Driver Bits PH1, (6) PH2, PR2, (2) PH3, SQ1, (3) SQ2, SQ3, T10, T15, (2) T20, (3) T25, T30, SL#6, SL#10, Hex 3/16 in, Hex ¼ in, 2 in Power Bits PH1, (4) PH2, (2) PH3, SQ1, (3) SQ2, SQ3, (2) T20, (2) T25, T30, SL#10	Milwaukee	**415H78**
65	¼ in	Steel	Compact Magnetic Bit Holder, ¼ in Magnetic Nut Driver, 5/16 in Magnetic Bit Holder, ¼ in Socket Adapter, 1 in PH1, 1 in PH2, 1 in PH3, 1 in PR2, 1 in SQ1, 1 in SQ2, 1 in SQ3, 1 in T10, 1 in T15, 1 in T20, 1 in T25, 1 in T27, 1 in T30, 1 in T40, 1 in Slotted #8, 1 in Slotted #10, 1 in 3/16 in Hex, 1 in ¼ in Hex, 1 in Torx Security T7, 1 in Torx Security T8, 1 in Torx Security T9, 1 in Torx Security T10, 1 in Torx Security T15, 1 in Torx Security T20, 1 in Torx Security T25, 1 in Torx Security T27, 1 in Torx Security T30, 1 in Torx Security T40, 1 in 5/64 in Hex Security, 1 in 3/32 in Hex Security, 1 in 7/64 in Hex Security, 1 in ⅛ in Hex Security, 1 in 9/64 in Hex Security, 1 in 5/32 in Hex Security, 1 in 3/16 in Hex Security, 1 in 7/32 in Hex Security, 1 in ¼ in Hex Security, 1 in Spanner #6, 1 in Spanner #8, 1 in Spanner #10, 1 in Spanner #12, 1 in ⅛ in Clutch, 1 in 5/32 in Clutch, 1 in 3/16 in Clutch, 1 in PZ1, 1 in PZ2, 1 in PZ3, 1 in TRI-WING #1, 1 in TRI-WING #2, 1 in TRI-WING #3, 1 in TRI-WING #4, 1 in TRI-WING #5, 1 in TORQ-SET #4, 1 in TORQ-SET #6, 1 in TORQ-SET #8, 1 in TORQ-SET #10, 1 in Spline #4, 1 in Spline #5, 1 in Spline #6, 1 in Spline #8, 1 in Insert Bit HEADLOK Screw	Milwaukee	**415H87**
175	¼ in	Steel	Phillips Ribbed, Slotted , Phillips, Pozi Phillips, Hex, Torx(R), Spline, Roberts, Security Bits, Tri Wing, Clutch Bits, Quick Change Chuck, 1 and 2 in Drive Socket Adapter, 4 to 11/16 in Screw Guide Driver, Storage Case	Westward	**1VXP2**

Impact Screwdriver Bits

- Hex shank size: ¼"

For use with impact drivers and suitable for applications requiring a high level of torque.

Phillips Double Ended 55KG89

Slotted 787P76

SDS-Plus Concrete and Masonry Drill Bits

- Shank size: 25⁄64" dia.

Carbide-Head bits have a cutting head of solid carbide construction for long life compared to standard bits that only have a carbide tip. All bits have an SDS-Plus shank that prevents them from slipping in high-torque drilling applications and are compatible with SDS-Plus chucks that allow one-handed drill bit changeouts.

What is SDS-Plus?

SDS-Plus bits have grooves on the shanks that lock securely into a spring-loaded chuck that prevents bits from slipping during high-torque drilling applications. They can be inserted and removed from the tool without tightening or loosening the chuck for one-handed bit changeouts. Drill bits are only compatible with rotary or hammer drills having an SDS-Plus chuck.

SDS-Plus Concrete Screw-Installation Bits and Sleeves

4AL12

- 2 cutter head
- Shank size: 25/64" dia.

Feature a drill sleeve that slides over the bits to stabilize them when creating holes for self-tapping concrete and masonry anchor screws.

What is SDS-Max?

SDS-Max bits have grooves on the shanks that lock securely into a spring-loaded chuck that prevents bits from slipping during high-torque drilling applications. They can be inserted and removed from the tool without tightening or loosening the chuck for one-handed bit changeouts. SDS Max bits have an increased capability for tougher masonry work compared to SDS-Plus. They can withstand more torque and force than SDS-Plus bits which are shorter in length and suitable for lighter duty work and smaller diameter holes than the more rugged SDS-Max bits. The SDS-Max bits are only compatible with rotary or hammer drills having an SDS-Max chuck.

45L356

SDS-Max Concrete and Masonry Drill Bits

- 4 Cutter heads

Have variable-helix flutes that efficiently remove dust from the hole to minimize heat during drilling.

SDS-Max Dust-Extraction Hollow Core Bits

54FH82

- Shank size: 45/64" dia.

Have a hollow shaft and dust-extraction holes that allow dust to be removed with a dust extractor during drilling. These 4-cutter bits have long life compared to 2-cutter bits and are less likely to bind up if they hit embedded rebar when drilling into concrete.

2 Cutters
4LC67

Milwaukee DEWALT BOSCH SPLINE

Spline Concrete and Masonry Drill Bits

- Shank size: ¾" dia.

Feature a spline shank that prevents bits from slipping in high-torque drilling applications when creating holes in hard, brittle materials such as brick and cinder block for setting fasteners such as concrete anchors and tapping screws. They have fast-spiral flutes that dissipate heat as they grind through the materials.

2 Cutters—Suitable for drilling in concrete that does not contain embedded rebar.

4 Cutters—Can last longer than 2-cutter bits and are less likely to bind up if they hit embedded rebar when drilling into concrete.

BOSCH SPLINE

One-Piece Spline Large- & Shallow-Hole Core Bits

Have a spline shank that prevents bits from slipping in high-torque drilling applications when creating large, shallow holes in concrete, masonry, and limestone. They come with a centering pin that stops bits from moving or walking when starting a hole. Bits have wear-resistant carbide-tipped teeth that cut around the perimeter of a hole and create a plug of material that must be removed after drilling is completed.

Two-Piece Shankless Large- & Shallow-Hole Core Bit Heads & Shanks

4LD58

- Max. drilling depth: 3"
- Core body length: 4"
- Overall length: 4", except 20PL29 is 8"

Dewalt—Bit heads come with a center pin and require a compatible adapter or extension to install them on a compatible rotary hammer drill. They can create large, shallow holes in concrete, masonry, and limestone.

Bosch—Spline shank 20PL29 attaches to compatible two-piece shankless core bit head to create a two-piece core bit. They install into compatible rotary hammer drills.

Corded Core Drill Rigs and Motors

Core drill rigs have a core drill motor and a matching stand to create deep, large-diameter holes in concrete and masonry to run plumbing lines, HVAC ducts, electrical wires, and telecom cables. They grind out material around the edge of a hole and leave the core intact for removal.

HANDHELD CORE DRILLS

Hand grips allow more control to drill small holes for ventilation ducts, pipes, and other light applications. They can mount to a compatible stand that allows for larger, more uniform holes and reduce user fatigue.

CORE DRILL RIGS

Include a core drill motor and a matching stand that provides a stable base to hold the drill steady and create larger, more consistent holes than handheld core drills. 38D751 comes only with a matching stand and accepts a compatible motor.

CORE DRILL MOTORS

Mount to a compatible stand to form a coring rig where the stand holds the drill motor in a fixed position to create larger, more uniform holes than handheld core drills.

CORE DRILL STANDS

Provide a stable base that holds compatible core drills in a fixed position to improve control and create uniform holes. Stands pair up with core drill motors or handheld core drills to form coring rigs.

CORING BITS

Diamond-tipped bits have a hollow center surrounded by multiple cutting edges. They require less power and force than solid drill bits when making large holes in materials.

Masonry Saws

Masonry saws use a diamond saw blade to wet or dry cut stone, brick, cinder block, and concrete. Wet cutting reduces airborne contaminants and keeps the blade cooler, extending blade life. Dry cutting requires a dust collection system to keep dust to a minimum.

Gas-Powered Power Cutters

Gas-powered power cutters are handheld tools used to make vertical and horizontal cuts in concrete and masonry. They have an internal-combustion engine to provide more consistent power and longer run times than battery-operated saws. Must be used outdoors in well-ventilated areas. Wet cutting applies water to the cut to reduce airborne particles and lubricate the cut.

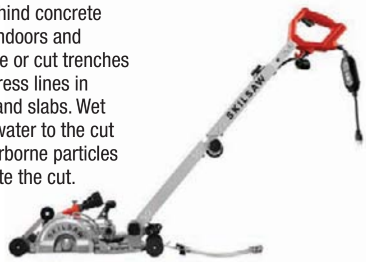
Corded Walk-Behind Concrete Saw

SKILSAW

- 7" Blade Dia.
- Wet/Dry Cutting

Corded walk-behind concrete saws are used indoors and outdoors to score or cut trenches and inlay and stress lines in concrete floors and slabs. Wet cutting applies water to the cut line to reduce airborne particles and help lubricate the cut.



Max. Cutting Depth	Arbor Size	Voltage	Current	Features	Item No.
2 in	⅞ in	120V AC	15 A	Collapsible Folding Capability, Worm Drive Design, Wrench Stored On Tool	462P51

Diesel 55FD93

Gas-Powered Walk-Behind Concrete Saws

Husqvarna

Gas-powered walk-behind concrete saws are used outdoors to cut trenches and inlay and stress lines in concrete sidewalks, driveways, and slabs. They are slightly more powerful than corded walk-behind concrete saws and can be used where access to an electrical power source is limited or unavailable. Because they produce fumes, they must be used outdoors in well-ventilated areas.

Concrete Floor Grinders and Polishers

Husqvarna

FLOOR GRINDERS

PG 280 and PG 280 SF

Provide efficient grinding due to high rpm levels, dust guard, and vacuum port. Include Redi Lock.

PG 540

Planetary design, adjustable grinding pressure, hour and RPM meter, protected electronics that are sealed to last.

PG 680 and PG 820

Dual-drive Technology allows for independent control of speed and direction on both planetary and satellite discs. Triple-headed grinders provide more downward pressure and power. Gear-driven planetary head and premium-quality belt.

DUST EXTRACTORS AND COLLECTORS

Extractors are for large-scale projects that demand substantial dust extraction. Tested and certified HEPA class H13 filters; required for silica dust are standard.

AIR SCRUBBERS

Air scrubbers can be used to supplement other dust suppression equipment. Can be used as negative air machine. Combination pre-filter and HEPA filter to ensure 99.97% efficiency at 0.3 microns.

SLURRY VACUUMS

Handles tough jobs with liquids such as concrete slurry, oils, and machining coolants. Integral strainer screens gravel to protect pump. For use with flat saws, core drills, power cutters, masonry hand tile saws.

Diamond Saw Blades

Diamond saw blades have diamond grit on the cutting edge to cut through concrete, tile, and brittle metal, such as cast iron, in construction and road work applications. Wet-cutting blades require a water source used to keep the blade cool, extending blade life and reducing airborne dust and contaminants.

Continuous rim diamond blades are used on tile, decorative stone, and brittle and glazed materials that chip easily.

Segmented rim diamond blades have slots cut into the rim of the blade to help dissipate heat and carry away dust and water slurry when cutting materials.

Turbo rim diamond blades have a continuous rim with narrow bands to help dissipate heat, carry material away from the cut, and cut through material faster than segmented blades.

Continuous Rim | **Segmented Rim** | **Turbo Rim**

Tuckpointing Blades

BOSCH Husqvarna

- Round arbor shape
- Segmented blade

Tuckpointing diamond saw blades have two parallel blades to remove weathered and damaged mortar. They are used in an angle grinder or circular saw. They cut channels ⅝" to ¾" deep. Wet cutting directs water to the cut to lubricates the cut and reduce airborne contaminants.

metabo DEWALT Milwaukee

Straight Die Grinders

These corded grinders set their grinding head in line with the tool body and have a slim profile to reach through openings where an angled head may not fit. This alignment makes it easier to apply pressure to the grinding head for greater control with detailed work. Provide light-to-moderate material removal where an angle grinder would be too large, and a rotary tool would be too small. They are corded to allow long run times with no batteries to recharge.

Angle Grinders

Tools rotate grinding wheels to remove surface material or rotate cut-off wheels to cut through material. Commonly used to grind welds, prepare metal and concrete surfaces, and cut metal plates and pipe. Corded for long run times compared to cordless tools.

Fillet Weld, Barrel Grip—Long, slim arm extends the disc from the gear head to minimize the grinding profile for reaching into tight spaces.

Flat Head, Barrel Grip—Flat head with low profile fits into tight spaces. Barrel grip positions the user's hand just behind the grinder head for detailed work and for one-handed use.

Flat Head, Rat-Tail Grip—Flat head has a low profile to fit into tight spaces. Rat-tail grip allows for better control and a comfortable hold to reduce fatigue during extended use. Designed for a two-handed grip with one hand on the body, other hand on the side handle.

Standard Head, Barrel Grip—Standard head for material removal and cutting on surfaces without tight angles and corners. Barrel grip positions the user's hand just behind the grinder head for detailed work and for one-handed use.

Standard Head, Rat-Tail Grip—Has a standard head for material removal and cutting on surfaces without tight angles and corners. Rat-tail grip allows for better control and a comfortable hold to reduce fatigue during extended use. Designed for a two-handed grip with one hand on the body, other hand on the side handle.

Abrasive Cut-Off Wheel Diameter Up to 5" Dia.

Cut ferrous metals and stainless steel with aluminum oxide abrasive wheels. Zirconia wheels can efficiently cut a variety of material from stainless and carbon steels to alloys and gray iron. Use a ceramic/zirconia alumina abrasive wheel in a right angle grinder to cut steel and stainless steel.

Aluminum Oxide abrasive is suitable for cutting and grinding ferrous metal, gray iron, stainless, nonferrous materials, aluminum, and pipeline. Ceramic abrasive is suitable for fast cutting on almost all materials, including stainless steel, mild steel, and aerospace alloys. Diamond abrasive is suitable for most metals, including steel, sheet metal, stainless steel, rebar, cast-iron, aluminum, and other non-ferrous metals. Silicon Carbide abrasive is suitable for cutting nonferrous materials. Zirconium Aluminum Oxide abrasive is suitable for aggressive material removal on stainless steel

Corded Reciprocating Saws

- 120VAC

Feature keyless blade clamp and rubber boot for superior gripping and operator comfort. Used in construction and demolition work to make fast, aggressive cuts in wood, metal, and nail-embedded wood. Corded reciprocating saws have longer run times and generally have more power than battery-operated tools. They are used in demolition, construction, metalworking, and other applications where precision is unimportant. Interchangeable blades are used to cut specific workpiece materials, such as wood or metal.

General Purpose Reciprocating Saw Blades

- One cutting edge
- Rigid for straight cuts
- Bi-Metal Tip Material

These blades are used to make aggressive cuts in sheet metal, wood, and other materials that are used in maintenance, metal fabrication, and demolition tasks. They are used with corded and cordless reciprocating saws.

Thick Metal Reciprocating Saw Blades

- Straight back style

These reciprocating saw blades cut thick metal 3⁄16" and over. They are used with corded and cordless saws, and have a lower teeth per inch (TPI) than blades designed for cutting thinner metals to prevent the blade from clogging, which can cause the cutting to stop or affect cut quality.

Wood & Pruning Reciprocating Saw Blades

Wood and pruning blades are used to make aggressive cuts through wood without embedded materials, such as tree limbs. These blades are used in corded and cordless reciprocating saws, and have fleam-ground blades that cut on both the extension and retraction movement to speed cutting.

Thin Metal Reciprocating Saw Blades

Reciprocating saw blades cut 1⁄8" and thinner metal. These blades are used with corded and cordless saws to aggressively and quickly cut through thin metal without grabbing the material and causing vibration.

Jigsaws

Make straight and curved cuts in lumber, walls, floors, and ceilings. The narrow, straight blade allows users to cut curves and join corners more accurately than other handheld saws.

Routers

Powerful tools spin cutting bits that remove material from wood workpieces to profile edges, create grooves and slots, cut joints, and trace shapes. Routers are corded for long run times and have no batteries that need recharging.

Fixed Base—Design locks the router body and the bit at set height for precise routing of workpiece edges. Routers are commonly used with guide bushings to cut along jigs and templates.

Plunge Base—Allows vertical movement of the router body to lower the bit into material anywhere along the top surface. Routers make grooves, insets, mortises, and other interior cuts. They can also do edgework but not as precisely as fixed-base routers.

Fixed and Plunge—Routers have a fixed base for edgework and a plunge base for interior cuts.

Cut-Out Tools

Tools spin their bits like a drill but cut like a saw into drywall, thin metal, or thin plywood. They make a plunge cut and then move up, down, or sideways to cut through material and feature an adjustable depth gauge to control how far the bit cuts into materials. Their barrel-grip body allows for fine control to cut along a straightedge, make curved freehand cuts, and follow the shape of electrical boxes, panels, and frames to make cutouts. Adjustable depth gauge is removable for making deep cuts. Corded for long run times compared to cordless tools and don't have batteries that require recharging.

Scroll Saws

- 1.3A current
- 5" blade length
- 2" cutting capacity

Thin, narrow blades make precise cuts in wood, metal, plastic, and laminates. The blade is held under high tension as the user moves the workpiece past the blade. Electronic variable speed adjusts for various materials. 52HR91 has a longer throat depth to accommodate larger workpieces. All models are corded for long run times compared to cordless tools and have no batteries to recharge.

SKILSAW · Fein · Milwaukee

Metal-Cutting Circular Saws

Used in metal fabrication and auto body shops to cut metal when precision is required. They rotate slower and have more torque than general purpose saws to make cleaner, faster cuts. Corded for long run times compared to cordless tools and have no batteries to recharge. **Left Blade Side** makes it easier to see sight lines when the saw is held with the right hand. **Right Blade Side** positions the blade away from the user's body when the saw is held in the right hand.

Left-Blade General Purpose Circular Saws

- 15A
- 120VAC

These general purpose circular saws are built with a left-side blade that makes it easier to see sight lines when the saw is held with the right hand. **Direct drive** saws have motors that transfer power directly from the rotation of the motor to rotation of the wheel which turns the blade. They are designed with the motor on the side of the saw and are wider but lighter than worm drive saws. **Worm drive** saws are constructed with the motor directly behind the saw and are more powerful than direct drive saws. They have a fully-enclosed gear system that rotates the blade, and narrow profile to reach confined spaces.

Corded Miter Saws

These saws make straight, mitered, beveled, and compound cuts on materials like wood and plastic. They plug into a 120VAC power source and are generally more powerful than cordless saws.

Standard Cabinet Table Saws

36HZ65

These table saws have a height-adjustable circular blade that's mounted below the table to make precise cross, bevel, and rip cuts. Built with extended surfaces to support large work-pieces and sheet goods, these saws provide more precise cuts and control than miter saws and portable table saws. They're plugged into a wired power source and not intended to be moved.

Cabinet Table Saws with Automatic Safety Blade Retraction

- 10" blade dia.
- ⅝" arbor size
- Max. blade speed: 4000 rpm
- Bevel angle range: 0° to 45° left
- 3 ⅛" max. cutting depth at 0°
- 2 ¼" max. cutting depth at 45°

Cabinet table saws have a safety feature that automatically retracts the saw blade when any part of the person's body, such as hands or arms, touches the blade. They have an extended surface on both sides of the blade to support large workpieces. Saws are plugged into wired power source and are not intended to be moved.

Fiber Cement-Cutting Circular Saw Blades

DeWalt Milwaukee Diablo

These saw blades cut through fiber cement panels such as Hardie board and Durock. They have have a low tooth count to help reduce silica and other dust when cutting. Poly-crystalline diamond (PCD) teeth cut through hard, abrasive material that cannot be cut using standard carbide blades. Fiber-cement board is used for backing panels and exterior siding.

Portable Band Saws and Blades

- ½" blade width
- 0.02" blade thickness

Corded, handheld saws cut pipe, conduit, threaded rod, and structural elements. They use a blade that rotates around two wheels to make clean cuts and preserve threads when cutting threaded rod.

Cold Saws and Blades

High-Speed
31XU77

These saws have toothed blades and make precise cuts in metal. Coolant keeps the blade and workpiece cool during high-volume cutting applications in metal fabrication and machine shops.

High-speed saws cut plastic, aluminum, and other nonferrous metals at high speeds. **Low-speed** saws spin at lower speeds than high-speed saws and cut steel, stainless steel, and other ferrous metals.

Chop Saws

21VJ43

- Toothed Blade

Make straight cuts in metal. These saws have a fence to support the workpiece, and they adjust for angled and miter cuts. They spin at a lower rpm and produce less sparking than cut-off saws, which reduces heat buildup in the blade and workpiece. Hose chop saws cut through rubber and plastic hose.

Abrasive Cut-Off Wheels Diameter 10" to 20" Dia.

Type 1
5LTZ8

Have various types of abrasive material for multiple cutting applications.

Aluminum Oxide—For cutting and grinding ferrous metal, gray iron, stainless, nonferrous materials, aluminum, and pipeline.

Zirconia Alumina—For aggressive material removal on stainless steel.

Silicon Carbide—Suitable for cutting nonferrous materials.

Ceramic—Use for fast cutting on almost all materials, including stainless steel, mild steel, and aerospace alloys.

Polishers

For additional polishing bonnets and pads, go to Grainger.com.

Random Orbital—Feature random, swirl free polishing action and suitable for cleaning and polishing vehicles, glass products, medical equipment, precision instruments, precious metals, and copper.

Right Angle—Models have their polishing head 90° to the tool body for working in corners, between surfaces, and in other tight spaces.

Wet—Use water for the wet polishing of granite, marble, and other types of rock. 53GK14 has a constant speed that automatically adjusts the motor strength for a constant and consistent RPM regardless of the pressure applied to the tool for better polishing results.

Surface Temperature Control Pistol-Grip Heat Guns

- Plug type: Two-prong

Variable temperature heat guns can automatically adjust their heat output to reach the target temperature required at the surface to heat, dry, or soften materials. Their sensor measures the temperature of the work surface rather than the temperature of air leaving the gun to help prevent scorching and overheating of temperature-sensitive materials.

Pistol-Grip Heat Gun for Polyolefin and PVC Shrink Wrap

- Plug type: Three-prong

Corded heat gun has a single temperature setting that generates high-temperature air and directs it through a nozzle to shrink wrap packages. The low-velocity air flow helps prevent components from blowing around the workstation. Includes an adjustable heat gun stand and a heat shrink attachment that eases applying heat shrink wrap to packages.

Maximum Temperature	Temperature Range	Air Volume	Current	Item No.
650 °F	650 °F	3.8 cfm	2 A	**5PYR3**

Pistol-Grip Heat Gun for Polyethylene Shrink Wrap

- Propane fueled

Variable temperature settings and generates high-temperature air and directs it through a nozzle to shrink wrap packages. The two-speed fan allows for more control in handling shrink wrap. Dual in-line safety fuses to protect both user and machine. Includes a 25-ft. hose and regulator.

Minimum Temperature	Maximum Temperature	Item No.
600 °F	1,000 °F	**5URU8**

Standard Pistol-Grip Heat Guns

Pistol-grip allows users to squeeze the trigger as they grip the tool and direct high-temperature air onto materials to heat, dry, or soften them. They provide ergonomic handling in a range of positions on vertical and horizontal surfaces. Heat guns can be used to install heat shrink tubing, shape PVC pipes, strip paint, and activate adhesives.

220-240VAC Pistol-Grip Heat Guns

- Plug type: Three-prong

Run on higher voltage for use in facilities that operate equipment on 220 to 240VAC power. They generate high-temperature air and direct it through their nozzle to heat, dry, and soften materials. Pistol-grip allows users to squeeze the trigger as they grip the tool and direct high-temperature air onto the material. They provide ergonomic handling in a range of positions on vertical and horizontal surfaces. Can be used to install heat shrink tubing, shape PVC pipes, strip paint, and activate adhesives. **Variable Temperature Setting** heat guns allow a range of temperatures for a variety of tasks.

Heat Blowers

- Air volume: 47 cfm
- Plug type: Three-prong

The larger barrel and more powerful motor produce a higher volume of hot air for greater surface-area coverage and more rapid action than heat guns. These heat blowers generate high-temperature air and direct it through their nozzle to heat, dry, and soften materials. Their built-in stand allows mounting on equipment and conveyor lines for hands-free, continuous use in industrial applications such as molding plastics, shrinking sleeves on wires and harnesses, applying shrink wrap film and bands, and drying ink or paint.

Compact Electro Magnet 40LJ21

Large Permanent Magnet 61KL86

Magnetic Drill Presses

These drill presses rotate annular cutters or other bits to make holes in structural steel, I-beams, pipe, and other metal workpieces. Their magnetic base sticks to ferrous metal surfaces and holds the drill in position as the cutting bit feeds into the material. Drill presses are corded to allow long run times for repetitive tasks. Compact presses fit into tighter spaces and have enough power and sufficient drill travel for most drilling applications. Large presses have a more powerful motor and longer drill travel (stroke) than compact models, drill into harder materials, and accept longer bits to drill deeper holes.

Jobsite Field Offices

- 16 ga.
- For a complete list of features see Grainger.com

Extra-large job boxes have space to store tools and supplies. An adjustable work surface lays flat or sits at an incline and provides space for assembly work and paperwork. Multiple shelves and compartments provide storage, and hinged doors close different parts of the box.

Jobsite Boxes

- Padlockable

Provide a large space to store and secure tools at indoor and outdoor worksites. Heavy-gauge steel. Weather-resistant.

Chest-style—A wide, undivided interior stores tool boxes, tool organizers, and long or bulky tools. Hinged lid lifts for access to load and unload the box.

Chest-style with drawers—Provide additional space to sort and organize tools.

Drop-front—Hinged lid lifts to fully open the top, and a front panel folds down to form a ramp for moving large tools and equipment in and out of the box.

Piano-style—Stand taller than chest-style boxes for increased storage capacity. Multi-panel, hinged lid lifts and folds together to open the front and top of the box.

Piano-style with drawers—Provide additional space to sort and organize tools.

Slope-lid—Angled sides allow the lid to slant downwards to keep water and debris from collecting on top of the box.

PACKOUT Modular Tool Storage System

Milwaukee

Totes, Carts & Tool Boxes—Interchangeable components from the Milwaukee PACKOUT system stack and lock in place to create mobile storage units. A rolling tool box, hand truck, or dolly forms the base and eases transport between locations. Add tool boxes, organizers, and totes to customize the system.

Socket Sets—Include sockets in a range of sizes, extensions, a ratcheting drive tool, and an organizer box for storage. The box base snaps onto the cross brace of a PACKOUT hand truck or the top of other PACKOUT components.

Accessories—Weather-resistant jobsite radio provides music or news for work crew. Includes ports to charge mobile devices and Milwaukee M18 batteries. Impact-resistant personal cooler stores and chills food and beverages.

System Components—Mounting plates and wall mount racks secure to flat surfaces to provide a dedicated space to store modular system components. Foam inserts cushion tools in tool boxes, and dividers can be configured to customize the drawer layout. Organizer trays hold small objects to prevent them from rolling around and getting lost inside a tool box or bag. Workstation tops provide a smooth, impact-resistant surface for completing assembly work and paperwork.

Plastic Tool Boxes

Lightweight, portable boxes have a deep body for tool storage. A hinged lid swings open for access to load and unload tools. They won't dent or rust, and they have no sharp corners that could gouge or scratch surfaces.

Plastic rolling tool boxes—Wheeled for transporting between locations. Extendable handle for pulling heavy loads.

Plastic tool boxes—Top handle for carrying between locations.

Plastic tool box sets—Include multiple boxes to store and organize tools, parts, and supplies.

Plastic rolling tool box sets—Consist of multiple storage containers that fit together for transport as a single unit. Wheeled bottom container provides a stable base for stacked containers.

Wide-Mouth Tool Bags

Top fastens closed to keep contents secure and opens fully for easy access when loading and unloading tools, parts, and supplies. Large center compartment holds bulky items, and smaller inside and outside pockets organize smaller items. Constructed of light but sturdy materials to support tools, parts, and supplies without adding weight to the load.

Truck/Van Storage Drawers

JOBOX

ALUMINUM
- 75-lb. capacity per drawer
- Aluminum top plate supports 200 lb. per sq.-ft. load
- Drawers can be locked with padlocks (not supplied)
- 0.125-ga. treadplate construction

Full-extension ball bearing drawer glides, fully welded treadplate, and mill finish. 12"W stacking units mount directly on either side of van for rear door access and maximum floor space. 50"L horizontal floor mounts. 1FEH6 is for full-size vans and pickups. 1FEH5 and 1FEH4 can be used in most vehicles.

STEEL
- 650-lb. capacity drawer with keyed lock
- Grip-and-Release handle safety system prevents drawer from slamming shut or rolling open when loaded
- Includes mounting brackets and hardware
- White powder paint finish

Reinforced 14-ga. cabinets. 12-ga. steel drawers glide on steel rollers. Antiskid strips. Removable 250-lb. heavy-duty conveyor roller bearings. Steel handles are flush-mounted. Weather stripping around drawer fronts.

weather guard

Pack Rat® Truck/Van Storage Drawers

- 14-ga. steel
- Total load rating: 750 lb.
- Fully weather stripped powder-coated finish

Low-profile units can be used separately or in combination with one another. Mount inside the rear of the vehicle to provide secure, concealed storage for large or heavy items, while keeping truck bed area relatively free to carry more cargo. Roll-out drawer provides easy access to and organization of contents. Antiskid strips provide traction for workboots. Easy 1-handed latch opening. Limited lifetime warranty.

Swivel STORAGE SOLUTIONS

Truck and Van Boxes

- All-steel construction with powder-paint finish
- Vibration-resistant construction

Drawers swing open easily on a single, greaseable hinge to provide full access to drawer contents and close securely every time. Include antiskid drawer mats. 12-ga frame and 14-ga. drawers, except 26X198 has 14-ga. frame. 26X196 and 26X198 are weather-sealed to keep out dirt and dust. 26X198 also features a secure locking system and main door opens to create a usable work table.

Socket Selection Guide

Bolt Extraction remove stuck, rounded, and rusted nuts and bolts. These sockets require a hand drive tool such as a ratchet or breaker bar to turn the socket.

External Torx fit standard Torx fasteners.

Flex or universal sockets, are hinged in the middle and rotate. They accommodate most angles to tighten and loosen fasteners in tight spaces that can't be reached with a regular socket.

Insulated protect against electrical shock from live electrical circuits when tightening or loosening fasteners near electrical components. These sockets require an insulated hand drive tool to turn the socket and rotate the fastener.

Nonsparking won't spark when tightening or loosening fasteners in locations where flammable vapors or combustible liquids are present. They require the use of nonsparking hand drive tools to turn the socket and rotate the fastener.

Pass-Through sockets and ratchet heads are hollow and allow threaded rod to pass through the tool for access to fasteners.

Power for use with power wrenches that deliver more speed and torque than a hand wrench when rotating fasteners. Not impact rated. Magnetic.

SAE Pipe Plug male pipe plug sockets feature a nub that fits into the square indentation on the head of the fastener. Female pipe plug sockets have an indentation to fit the square nub on the head of the fastener.

Tether-Ready allow the attachment of a tether where the tether is attached to the user or a fixed object to prevent the socket from falling and causing injuries or damage when working at height.

Torx Plus allow Torx Plus fasteners to be tightened to a higher torque compared to standard Torx fasteners.

1AC83

Flex Socket Sets

- Chrome finish
- ⅜" Drive size

No. of Pieces	Socket Size Range	Flex Socket Count/Style	Container Type	Brand	Item No.
Metric					
10	10 mm to 19 mm	(10) 6-Point	None	Westward	**1EZR9**
10	10 mm to 19 mm	(10) 6-Point	Rail	Proto	**5F416**
SAE					
7	⅜ in to ¾ in	(7) 6-Point	Rail	Proto	**1AC83**
7	⅜ in to ¾ in	(7) 12-Point	Rail	Proto	**1AC81**

SAE Insulated Socket Set 26X324

Metric Set with Drive Tools 32H733

Insulated Socket Sets

Drive Size	No. of Pieces	Socket Size Range	Standard Socket Count/Style	Container Type	Brand	Item No.
SAE & Metric Insulated Socket Sets						
⅜ in	16	5/16 in to ¾ in, 8 mm to 19 mm	(16) 12-Point	Plastic Case	Wiha Tools	**26X322**
SAE Insulated Socket Sets						
⅜ in	10	5/16 in to ¾ in	(12) 12-Point	Plastic Case	Wiha Tools	**26X324**

Drive Size	No. of Pieces	Socket Size Range	Standard Socket Count/Style	Drive Tools Included	Container Type	Brand	Item No.
Metric Insulated Socket Sets with Drive Tools							
½ in	12	8 mm to 19 mm	(9) 12-Point	10 5/16 in Round Head Ratchet	None	Facom	**32H728**
½ in	12	⅜ in to ⅞ in, 8 mm to 20 mm	(10) 12-Point	9 21/32 in Round Head Ratchet	Plastic Case	Jameson/Itl	**19MV24**
½ in	14	8 mm to 24 mm	(11) 12-Point	10 in Insulated Pear Head Ratchet	Plastic Case	Wiha Tools	**450G68**
½ in	19	⅜ in to 1 in, 8 mm to 25 mm	(16) 12-Point	9 21/32 Round Head Ratchet	Plastic Case	Jameson/Itl	**19MV23**
¼ in	11	5 mm to 14 mm	(11) 6-Point	T-Handle: ¼ in Drive	Plastic Case	Wiha Tools	**26X318**
¼ in	11	3/16 in to 9/16 in	(11) 6-Point	T-Handle: ¼ in Drive	Plastic Case	Wiha Tools	**26X317**
¼ in	13	5 to 14 mm	(10) 6-Point	5 ½ in Round Head Ratchet	Plastic Case	Wiha Tools	**26X316**
¼ in	13	3/16 in to 9/16 in	(10) 6-Point	5 ½ in Round Head Ratchet	Plastic Case	Wiha Tools	**26X315**
⅜ in	9	8 mm to 14 mm	(6) 12-Point	7 ½ in Round Head Ratchet	None	Facom	**32H733**
⅜ in	10	8 mm to 19 mm	(10) 6-Point	Drive Extension: ⅜ in Drive, T-Handle: ⅜ in Drive	Plastic Case	Wiha Tools	**26X323**
⅜ in	10	8 mm to 19 mm	(8) 12-Point	8 ¾ in Round Head Ratchet	Plastic Case	Wiha Tools	**26X321**
⅜ in	16	8 mm to 20 mm	(13) 12-Point	10 29/32 in Round Head	Plastic Case	Wiha Tools	**450G67**
⅜ in	17	8 mm to 19 mm	(9) 12-Point	7 ½ in Round Head Ratchet	None	Facom	**32H732**
SAE Insulated Socket Sets with Drive Tools							
½ in	14	⅜ in to 1 in	(11) 12-Point	10in Round Head Ratchet	Plastic Case	Wiha Tools	**450G69**
⅜ in	10	5/16 in to ¾ in	(8) 12-Point	Insulated Round Head Ratchet	Plastic Case	Wiha Tools	**26X320**
⅜ in	16	¼ in to ⅞ in	(13) 12-Point	10 29/32 in Flex Head Ratchet	Plastic Case	Wiha Tools	**450G66**

1TEC6

Nonsparking Socket Sets

- Plastic case

Drive Size	No. of Pieces	Socket Size Range	Standard Socket Count/Style	Drive Tools Included	Item No.
Metric Nonsparking Socket Sets with Drive Tools					
¼ in	15	4 mm to 14 mm	(13) 6-Point	5 in Pear Head Ratchet	**21XV92**
½ in	26	10 mm to 32 mm	(22) 6-Point	10 in Pear Head Ratchet	**1TEC6**
¾ in	11	36 mm to 60 mm	(7) 6-Point	18 in Pear Head Ratchet	**4RPK1**
SAE Nonsparking Socket Sets with Drive Tools					
¼ in	12	3/16 in to 9/16 in	(10) 6-Point	5 in Pear Head Ratchet	**21XV93**
½ in	9	½ in to 1 ¼ in	(5) 6-Point	10 in Pear Head Ratchet	**4DC12**
½ in	21	5/16 in to 1 ¼ in	(17) 6-Point	10 in Pear Head Ratchet	**1TEB6**
¾ in	15	1 5/16 in to 2 in	(11) 6-Point	¾ in Ratchet	**4RPJ9**

WORK HARD. SWEAT BLUE.

Pass-Through Socket Sets

Drive Size	No. of Pieces	Socket Size Range	Standard Socket Count/Style	Drive Tools Included	Item No.
⅜ in	16	5/16 in to ⅞ in, 8 mm to 22 mm	(13) 12-Point	8 in Round Head Quick Release Ratchet	**38UU83**

SAE Pipe Plug Socket Sets

- Chrome finish

Drive Size	No. of Pieces	Socket Size Range	Standard Socket Count/Style	Item No.
⅜ in	11	¼ in to ⅜ in	(11) Square	**42W711**

Hex Bit Sets

These hex socket bit sets contain an assortment of hex bit sizes for tightening and loosening fasteners with an hexagonal-shaped indentation in the fastener head. **Ball hex socket bit sets** contain bits that can be used at an angle to rotate fasteners in tight spaces. **Hex impact socket bit sets** attach to impact power wrenches. **Hex short socket bit sets** have a shorter bit length than standard socket bits.

Ratchets

Standard-head spud handle ratchets have a ratchet head on one end of the handle and an opposite end that is tapered to ease the alignment of lugs or drill holes before a fastener is inserted and tightened. **Standard-head hammering ratchets** combine a hammer and ratchet into one tool so they can be used to strike surfaces and turn fasteners. **Standard-head scaffolding ratchets** allow sockets to be connected to the drive with a through-hole and pin design that prevents the socket from separating from the ratchet even when the tool is used as a hammer. They have a hammer tip that protects fasteners from damage when struck. Ratchets are suitable for use in scaffolding and other construction applications. **Offset flex-head ratchets** have a bend in the handle that allows access around obstructions to reach fasteners. They come with a hinge close to the head that allows the head to swivel to access fasteners from multiple angles in tight spaces. **Friction spanner ratchets** have a handle with one end that accepts an insert ring sized to the desired fastener. They act like a ratcheting box wrench except the spanner tool is compatible with a variety of insert rings for a range of fastener head sizes. **Thumbwheel ratchets** are small size ratchets with a drive head and no handle for use in tight spaces. They can be rotated in the palm of the hand or with a thumb to tighten or loosen fasteners.

Socket Drivers & Speeder Handles

Connect to sockets to tighten or loosen fasteners.

Speeder handles have a large bend in the shaft for rapid rotation. **Nonsparking speeder handles** won't spark and can install fasteners where flammable vapors or liquids are present. **Socket drivers** tighten small nuts and bolts that only require hand tightening. **Flexible shaft socket drivers** bend around obstructions to reach fasteners. **T-handle insulated socket drivers** protect against electrical shock from live circuits and are suitable for use near electrical components. **Hand impact socket drivers** turn and loosen rusted, frozen, and over-tightened bolts and screws. They are struck with a hammer to rotate the socket and loosen the fastener.

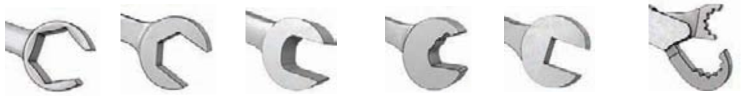
OPENING TYPE



6-Point Flare Nut | Hex | Rounded | Speed Style | Square | 12-Point Hinged Flare Nut

Wrench Selection Guide

6-point box end wrenches allow more contact with the fastener's sides than the 12-point style and prevents rounding the fastener's corners.

12-point box end wrenches with additional grooves make it easier to connect with the head of the fastener and at more angles for better accessibility compared to a 6-point wrench.

Spline wrenches can be used on 4-pt., 6-pt., 12-pt., or spline fasteners, and the box end can apply more torque than a 12-pt. design without stripping the fastener head.

Nonsparking wrenches won't spark during use, making them suitable for use in flammable environments.

Tether-ready wrenches are fitted with a heat shrink tether loop.

SAE, 12-Point, Tether-Ready
24AJ74

Combination Wrenches

- 15° opening angle
- Alloy steel material, nonsparking wrenches are aluminum bronze material

Box end for full grip around fastener head. Open end for access to fastener from either the top or the side.

For more information on Wrenches, see page 780.

Box End Wrench Sets

- Standard wrench length
- Straight
- 12-point box end
- Alloy steel material

Feature an enclosed head end that fits around the entire head of the fastener for a secure grip. A 15° head offset provides knuckle clearance while turning, and a 40° head offset clears obstructions and reaches nuts and bolts in tight spaces.

Double Ended, Insulated 40JD22

Ratcheting Box End Wrench Sets

- Alloy steel material
- Straight

Enclosed head with gear mechanism rotates freely without repositioning the wrench. Reversing wrenches change direction without removing the head from the fastener.

Box End Wrenches

- Alloy steel material, Nonsparking wrenches are aluminum bronze material

Enclosed head end applies more torque and is less likely to slip off the fastener than an open-end wrench.

Ratcheting Box End Wrenches

- Alloy steel material

Gear mechanism for free rotation in one direction without repositioning the wrench. 4-point box ends have a 4-in-1 style that allows the wrench to be flipped over to access a total of four different size square fasteners.

Striking Wrenches

- Alloy steel material, Nonsparking wrenches are aluminum bronze material

Short, thick wrenches have a block shape on the end of the handle that is struck with a hammer to loosen or tighten frozen and rusty nuts and bolts.

Open End Wrench Sets

- Rounded opening
- Alloy steel material

A fixed, U-shaped opening contacts a fastener on two sides before turning. Access fasteners from top, side, and in tight spaces. **Single-end with interchangeable handle** sets have small, slim heads that attach to an interchangeable handle and access fasteners that a large wrench can't access.

WESTWARD CRESCENT Milwaukee CHANNELLOCK JONARD TOOLS PROTO® IRWIN VISE-GRIP Wiha

Adjustable Wrench Sets

- Hang hole end style
- Alloy steel material

Crescent wrenches have adjustable jaws that provide a tight grip to turn a variety of bolts, nuts, and fastener sizes.

Adjustable Wrenches

Adjustable jaws tighten or loosen a range of fastener sizes. **Valve wheel end** wrenches grip the rims of hand-operated valve wheels to open and close valves. **Automatic locking** wrenches lock on the fastener head once tightly adjusted. **Insulated** handles reduce fatigue and protect from electric shock. **Insulated hammer head** wrenches have a flat side for striking surfaces. **Insulated nonsparking** wrenches won't spark during use in flammable environments. Iron-free and nonmagnetic, they are suitable for use with magnetic resonance imaging (MRI) equipment. **Lever-locking** wrenches have a lever that locks jaws in place to tightly grip the fastener.

Spanner Wrenches

Wrenches with pins or hooks tighten or loosen threaded collars, retainer rings, shafts, or pipes and faucets in hard-to-reach areas.

Adjustable-pin spanners—An adjustable head tightens or loosens a variety of bearings, lock nut rings, and servicing collars.

Multi-size adjustable pin spanners—Multiple interchangeable pins allow for installation or removal of a variety of nut sizes.

Fixed-pin spanners—A curved arm with a small pin or nub fits into the nut to loosen or tighten it.

Adjustable face spanners—Hinged and V-shaped to fit different diameters. They grip round holes on the face of collars, bearings, and other machine tool components to loosen or tighten them.

Adjustable-hook spanners—A hinged hook or adjustable head with a hook fits into a hole on the bearing, lock nut ring, and servicing collar to loosen or tighten it.

Fixed-hook spanners—A curved arm with a hook on the end fits into the nut to loosen or tighten it.

Pipe Wrenches

- Serrated jaw texture except where noted

Adjustable jaws grip and turn threaded pipe and pipe fittings. **Ratcheting** wrenches allow one-handed operation without repositioning. Slim **Swedish** wrenches adjust jaw size via a nut. **Hex** wrenches grip hexagonal bolts and screws. **End** pipe wrenches fit against a wall or in tight spaces. The jaws of **offset** wrenches open perpendicular to the handle for use overhead or in tight spaces.

Adjustable Micrometer Torque Wrenches

- Rotate clockwise and counterclockwise, except where noted

Apply a specific torque to fasteners. Handle twists to set torque value. As the wrench rotates, an audible click indicates that the desired torque has been reached. Ratcheting micrometer torque wrenches don't need to be repositioned during rotation.

Electronic Torque Wrenches

Feature a digital display for precise torque readings and electronic torque measurement for high accuracy. **Flex-head** works at an angle to reach fasteners in tight spaces. Avoid overtightening or undertightening fasteners and apply consistent torque.

Flat Beam Torque Wrenches

- Includes calibration certificate

Measures torque from a pivot point at the fastener to ensure proper fastener tension. As beam rotates, a pointer indicates torque. For use in fastener testing and assembly compliance testing for products with rotating components. Maintain calibration longer than other types of wrenches.

Torque Meters, Testers & Transducers

Torque testers and **torque meters** test and measure torque wrench performance and validate that it is operating within desired specifications. **Torque and angle meters** measure both torque and the specific angle of rotation. **Transducers** convert mechanical torque into an electrical signal so the torque reading from a tool can be reviewed and recorded for future reference.

Handheld Torque Meter 36WX49

Torque & Angle Meter 23NU45

Torque Multipliers

Internal gears increase the amount of torque applied to a fastener without additional manual force, extension handle, or cheater bar. Use in combination with a torque wrench and hand or nonimpact power tools. **Mountable torque multipliers** have mounting points for added stability.

Torque Wrench Accessories

SAE box end torque adapters allow a specific torque to be applied to a fastener that can't be accessed by a regular socket. **Dremometers** add a ratcheting function to a torque wrench. T-shaped **adjustment keys** adjust the torque value on key-adjustable preset torque wrenches. **Head extensions** extend the reach of torque wrenches. **Repair kits** include parts for torque wrench maintenance and repair.

Screwdriver Types

Ball-end have a ball end at the tip of the shaft that can tighten and loosen screws from multiple angles in hard-to-reach locations.

Ball-end hex have a hex ball end at the tip of the shaft that can tighten and loosen hex head screws from multiple angles.

Demolition have a steel shaft in the handle for prying, chiseling, and punching. The shaft transfers the impact force from the striking plate to the tip.

ESD-safe dissipate electrostatic charges when turning screws on static-sensitive electrical components.

Hex have a handle and a shaft end with an hexagonal (six-sided) tip.

Insulated have an insulated handle and shaft to protect against electrical shock from live electrical circuits.

Keystone-style have a slightly flared blade profile that tapers off at the end and provides extra stiffness withstanding torque.

Precision have handles with a rotating cap for precise turning and control when working in tight spaces or with tiny screws.

Screw starters hold small screws in place for initial installation in hard-to-reach locations.

Square self-centering, square tip that is less likely to slip out and damage the screwhead compared to a slotted head screwdriver.

Tether-ready have a loop for attaching a tether to prevent the tool from falling and causing injuries or damage when working at height.

Torx tips have a six-point star-shaped pattern. They provide a more secure grip on the fastener head, increase torque transfer, and are less likely to slip out of the head.

Multi-Tools

VICTORINOX SWISS ARMY · GERBER · LEATHERMAN · PROTO · WESTWARD · SOG · STANLEY

Pocket—Small and light enough to be carried in a pants pocket.

One-Hand Opening—Frees the other hand to hold workpieces in place.

Needle-Nose Plier-Based—Can be used at multiple angles.

Compact—Small enough to attach to a key ring.

Butterfly-Opening—Larger center-opening tools are built for a wide variety of jobs.

AVIATION SNIPS

Cut sheet metal, rolled steel and other metals. Nonslip, serrated jaws.

3-Pc. Sets—Steel jaws are hardened, tempered, and can be sharpened. Set 4PM06 includes 5MX59, 1UG17, and 1UG18. Set 5MD08 includes 4X863, 4X864, and 4X865.

2-Pc. Offset Set—Drop-forged, hardened alloy steel blades are offset to keep hands away from cutting surface. Comfort-grip PVC handles. Includes 1UG15 and 1UG16.

MULTIPURPOSE SNIPS

Cut a variety of materials from paper to aluminum, sheet metal, and screening.

TINNER'S SNIPS

For trimming light stock, paper, linoleum, and sheet metal. Set 4YP53 includes 7 and 10" snips.

Bolt Cutters

H.K. Porter bolt cutters have drop-forged tapered jaws with toggle joints and center cut blades. Threaded bottom straps increase blade rigidity. Adjustment screw adjusts gap after extended use. Rubber grip handles.

Note: Westward replacement cutter heads available on Grainger.com.

WESTWARD NICHOLSON Strauss Diamond Instruments Inc.

Specialty Files

Diamond-coated files are used for cutting or grinding hard, brittle, and abrasive materials. Diamond enables faster operation, extends tool life, and allows very accurate tolerances of shape and size.

Note: Diamond files are not suitable for grinding high-carbon steel.

Punch and Chisel Sets

STANLEY · WESTWARD · PROTO · GENERAL · MAYHEW

- See Grainger.com for specific sizes in each set

COLD CHISEL SETS

Remove or cut metal softer than the cutting edge itself.

NAIL SETS

Square head prevents rolling. Fully hardened precision-milled steel. 3ML05 has color-coded tools with shock-absorbing cushioned ribbed grip.

PUNCH SETS

Drift—Use for aligning holes, usually in metal. Also called aligning punches.

Pin—Drive pins, bolts, and rivets out of holes. Chamfer on struck-end helps reduce mushrooming and chipping. Identification panel marked with punch size. Solid punch for hole alignment.

Hollow—For punching holes in leather, rubber, canvas, cardboard, plastic, gasket material, and sheet metal.

Arch—Inside taper for clearance.

Transfer—Undersized by 0.0025". A matched set of precision-transfer punches allows the transferring of threaded, drilled, or reamed holes.

PUNCH AND CHISEL SETS

Packaged in a reusable vinyl pouch.

WESTWARD PROTO MAYHEW STANLEY DASCOPRO Quality Tools Since 1922 DEWALT

Chisels

Cape—Cut keyways and slots in metal.

Cold—Cut any cold metal softer than the chisel itself, such as wrought iron, cast iron, steel, brass, bronze, copper, aluminum, bolts, nuts, and rivets.

Diamond Point—Cut V-grooves and clean out inside corners.

Super-Duty Cold—Longer shank features a knurl for better grip. Polished identification panel is marked with tool number and size. Black oxide finish.

B.A.S.H. Sledge Hammers

The proprietary Unbreakable steel-core technology makes these hammers suitable for the toughest jobs. Tested to withstand more than 25,000 overstrikes. Nonslip rubber grip and safety plate help assure the safety of the user and of those in the immediate area. Available with drop-forged steel head in High-Vis green color, or nonsparking brass head.

Pro TIP

Choosing the Right Hammer

There are many different types of hammers, each made with a certain function in mind. Because some hammers have similar designs, it may appear that one hammer should be good enough for a variety of uses. However, choosing the right one for the job at hand is the only way to ensure you're getting the most out of your hammer.

For instance, **Claw** hammers are the most common and are used for woodworking and prying. They feature a smooth head for finishing work. The claw is curved for removing nails. **Framing** hammers, also called **Rip** hammers, are a type of claw hammer but with a straight rather than curved claw and a long handle. The head has a rough surface to keep it from slipping while driving nails. This hammer is suited for framing, splitting, and small demolition. Lightweight **Tack** hammers were made for attaching fabrics to furniture. **Dead Blow** hammers don't rebound after striking and are best for automotive applications, setting joints, and dent removal.

For descriptions of dozens of different hammers and their unique uses, see the article "Choosing the Right Hammer: Types of Hammers & Uses" at **grainger.com/hammertypes**

Sledge Hammers

Double-face hammers have forged steel heads with 2 large, flat striking surfaces.

Claw and Framing Hammers

Curved Claw—Ideal for pulling nails.

Framing—Long, heavy, straight-claw hammers have large faces for faster framing work.

Rip Claw—A straighter claw than curved models makes these hammers better for ripping or prying.

Specialty Hammers and Hatchets

Shingler's, and Builder's—Have a striking face on 1 end for driving nails and a hatchet-type face on the other end for demolition work. Replacement blades and gauges are available for Shingler's Hammers. Builder's Hatchets are for cutting, splitting, and trimming building materials.

Bricklayer's and Pick Hammers—Bricklayer's Hammers have a striking face on 1 end for driving masonry chisels and a curved blade with beveled edge on the other for chipping mortar and trimming bricks to size. Pick hammers are designed for chipping rocks and stone to a desired shape and size.

Tinner's Riveting Hammers—Use for setting rivets in sheet metal.

Welder's Scaling and Chipping Hammers—Have both a pick end and a chisel end. Generally used to remove slag, scale, and welding spatter from welded materials.

Hammers and Replacement Tips

Quick-Change and Soft-Face Hammers—2 replaceable striking faces (tips) are made of plastic, vinyl, or nylon, and come in a variety of hardnesses. Tip diameters match the size of the hammer and screw onto the hammer head.

Split-Head Hammers—Similar to Soft-Face, however, tips are contained in the split head. To replace tips, the head is disassembled into halves, and the tips are clamped rather than screwed in.

TIP SELECTION GUIDE	
Description	Replaces Hammer Type
Soft	Rubber, Wood, Soft Lead, Brass
Medium	Rawhide, Wood, Plastic, Lead
Tough	Rawhide, Hardwood, Plastic
Hard	Rawhide, Plastic, Micarta, Fiber
Extra-Hard	All Metal Working Applications

WILTON WESTWARD PALMGREN RIDGID

Combination Vises

- Replacement jaws and magnetic caps are available on Grainger.com
- All have serrated jaw face, except 61KD23 is knurled and 29YW78 is smooth

These vises combine the features of bench vises and pipe vises to securely clamp straight workpieces and irregular-shaped workpieces, as well as round tubing and pipe.

WESTWARD

Light-Duty Multi-Angle Vise

- Body casting tensile strength: 22,000 psi
- Replacement jaws and magnetic caps are available on Grainger.com

Allow positioning in 3 planes: you can tilt, turn, and rotate your workpieces with the simple turn of a handle. Applications include electronics and wood carving. Feature vacuum base and 360° swivel rotation.

Jaw Width	Max. Opening	Throat Depth	Construction	Item No.

WILTON WESTWARD

Standard-Duty Portable Vises

- Body casting tensile strength: 30,000 psi
- Replacement jaws and magnetic caps are available on Grainger.com

Clamp directly onto the work bench. These vises are ideal for very light-duty work with smaller workpieces. They can be positioned vertically and horizontally and can be removed after use to save valuable space or transport to another work location.

Jaw Width	Max. Opening	Throat Depth	Base Type	Pipe Jaw Included	Pipe Capacity	Swivel Angle	Jaw Face	Brand	Item No.

WESTWARD WILTON

Woodworking Vises

- Replacement jaws and magnetic caps are available on Grainger.com

Large jaws distribute pressure while securely clamping wood workpieces. The design allows for clamping both horizontally and vertically. Models with smooth jaws help to prevent marring. Ideal for general woodwork and carpentry.

WILTON

ATV All Terrain Vise

Lightweight all-terrain vise is designed for easy transport with an integrated carrying handle. Fits a standard 2-in. hitch (hitch pin included). Innovative mounting bracket allows you to mount the vise to a bench or trailer for greater versatility. The innovative 360° locking handle secures the handle while driving or repositions it while working. Set screws provide a tight fit in the hitch and reduce vibration while driving. Jaws include a V-groove for vertical clamping of round objects. Pipe jaws clamp objects up to 3 in.

Westward® Bessey®

I Beam Bar, I Bar, and Parallel Clamps

10D590

I Bar—Feature a rapid-acting clamp locking device. Compressed metal pawl engages in notches which are ¾" apart in web of slide.
- 3500 lb. load capacity

Parallel—Suitable where high pressure 90° clamping or spreading is required. Convert from a clamp to spreader without tools. Include jaw face pads, rail protector pads, and removable end stops.
- 1500 lb. clamping force

I Beam—Will not bend or twist like other clamps. Features tough, powder-coated ductile castings, corrosion-resistant nickel-plated rail, 5 strong clutch plates to aid with gripping the bar stock, strong crank handle, ACME threaded screws with 9⁄16" spindle dia., and large, easy-grip handles.

IRWIN® QUICK-GRIP Bessey®

Bar Clamps and Spreaders

52LA96

IRWIN 1-HANDED BAR CLAMPS/SPREADERS

Manufactured with high-tension I-beams and high-tech resin. Quick-change screw to maneuver from clamp to spreader. Large, removable resin pads. Quick-release trigger.

BESSEY 1-HANDED BAR CLAMPS/SPREADERS

Turn a dial to change function from clamping to spreading. Large, flat clamping jaws have soft pads. Squeeze-molded handle for clamping/spreading.

BESSEY CLUTCH-STYLE BAR CLAMPS

2-pc. clutch plates and nickel-plated serrated rail with ergonomic wood handle help enable clamping in tight spaces. Powder-coated ductile cast-iron jaws have nonmarring pads. Double-Head Clamps provide 3-point clamping for extra stability.

BESSEY GSM SERIES BAR CLAMP SET 44ZL53

Clamps have 2660-lb. nominal change pressure. Set includes 2 of Mfr. GSM20, 2 of Mfr. GSM30, and 2 of Mfr. GSM40.

KANT TWIST

Cantilever Clamps

T-handle and deep throat clamps have free-floating jaws that adjust to unparallel surfaces. They will not walk off center because there is no unsupported screw or loose pad. Copper-plated jaws and screws are ideal for welding. Clamps close completely. Stainless steel clamps are for corrosive and magnetic problem areas.

Face Frame Clamp

BESSEY

Face frame stiles can be tightened, aligned, predrilled, and fastened while the clamp is in place. Holds individual cabinet edges together while keeping the faces along the joint flush. Integrated pilot hole drilling guide on one end flips out of the way so you can drive screws to connect the cabinets without removing or repositioning the clamp. Features aluminum alignment plate, nonmarring felt pads, and ACME threaded screws.

BESSEY WESTWARD

L-, F-, Sliding-Arm Bar and J-Clamps

L-Clamps—Adjustable, rapid-acting sliding arm. All-steel, spring-tempered design. Hardened alloy steel spindles resist weld spatter. Adjustable swivel pads tilt to accommodate angular workpieces. Vibration-resistant.

F-Clamps—Heat-treated, spatter-resistant spindle and replaceable swivel-tilting pressure pad. 2JFU5 and 2JFU6 provide larger throat depth (reach).

Sliding-Arm Bar Clamps—Heat-treated, spatter-resistant spindle, swivel-tilting pressure pad, and a vibration-dampening design. Arc of the curve enables rail to hug workpiece. Fixed arm and pressure plate are tempered steel. 3YNA2 can be used at various angles for compressing and spreading.

Locking Clamps—Plier Style

IRWIN VISE-GRIP WESTWARD

Nickel-plated, heat-treated alloy steel clamps have micro-adjustment screw mechanism.

LOCKING C-CLAMPS

For welding sheet metal or woodwork. Swivel pads help to protect work surfaces. Large capacity 9" clamp has extra throat width and depth for greater reach.

LOCKING CHAIN CLAMPS

Hold and lock around any size or shape—won't slip or crush thin-walled pipe. Adjust in either direction.

LOCKING CLAMP SETS

1-handed locking mechanism, easy-turning adjusting screw, and spring-loaded release lever.

5-Pc. Sets—5MD28 includes (1) 10R locking pliers, (2) 11R C-clamps, and (2) 6R C-clamps. 2FDD4 includes (2) 2FDC6 6-in., (1) 10-in., and (2) 2FDD1 11-in. locking C-clamps.

LOCKING SHEET METAL CLAMPS

For bending, forming, and crimping jobs.

LOCKING WELDING CLAMPS

Clamps pipe, bars, or other metal work for welding or riveting. Deep-throated design; U-shaped jaws increase visibility and working space.

BESSEY

Locking Clamps—Sliding Arm Style

Sliding-arm chrome-vanadium steel SuperGrips jaws automatically adjust to remain parallel with each other. Handles have pressure adjustment screw and plastic-coated release levers. Ergonomically designed to prevent kickbacks.

Standard SuperGrips—Both models have a sliding-arm clamp jaw adjustment with grip-pliers design and removable nylon jaw pads.

Deep Reach—J-shaped jaws clamp over angle iron, channel iron, and other assemblies/obstructions.

Locking Pliers

All have guarded release trigger and adjusting screw. Heat treated alloy steel.

Fast-Release—1-handed release and locking functions with adjusting screw.

Curved Jaw—Use as wire cutter, pipe or speed wrench, clamp, pliers, or for holding small objects.

Straight Jaw—Lock to stud bolts for easy removal and to heavy-gauge wire for twisting.

V-Jaw—Ideal for twisting and turning applications.

Tongue and Groove Pliers

- Hardened steel
- Corrosion-resistant

Channellock—Undercut tongue-and-groove design assures strong no-slip jaw action. Laser heat-treated right-angle teeth for greater durability. GripLock jaw design accommodates many shapes.

Westward—Full polish and clear lacquering coating process provides corrosion resistance.

Knipex—Cobra pliers are self-gripping and feature high-leverage design. Feature push-button that locks adjustment position.

Milwaukee—Reaming head design for up to 2” pipe. Forged alloy steel and induction hardened jaws. Smooth transition grips and rust protection.

Safety Wire Twister Pliers

PROTO® WESTWARD®

Cut through tough stainless steel safety wire. Diagonal nose allows access in tight work areas. Automatic spring return pliers are ideal for aviation and other applications. Reversible pliers have right and left twist capability and meet SAE Aerospace Standard AS 567 twister requirements.

Thin Long Nose Serrated Jaw Pliers

Diagonal Cutter, Flush

Diagonal Cutter, Semi-Flush

ESD Safe Pliers and Cutters

Xcelite® KNIPEX® Erem® WESTWARD® PROTO®

For a wide range of electronic assembly requirements. Copper alloy rivet eliminates friction, while copper alloy joint maintains cutting edge and tip alignment. Plastisol, nonslip cushion handles, standard.

Mini Pliers Sets—Dual leaf spring design allows jaws to be maintained in open position. Fitted with slip-resistant electrostatic dissipative (ESD) cushioned grips. 2TJ50 includes 4¼" diagonal cutter with semiflush cut tapered head; 4¼" diagonal cutter with flush cut oval head; 4½" curved long nose with serrated jaw; and 4¾" long nose with cutter. 2TJ51 includes 4¾" diagonal cutter with semiflush cut tapered head; 4¼" diagonal cutter with flush cut oval head; 5¾" slim needle nose with nonserrated jaw; 4¾" slim needle nose with serrated jaw; 4½" transverse end cutter with flush cut; and 4½" angled cutter with flush cut.

Erem® GENERAL® slice™

Tweezers

Designed for toolmakers, repairmen, and electronic assemblers.

EREM

Tweezers are antimagnetic, acid-resistant, and temperature-resistant to 300°C.

ESD SAFE TWEEZERS

Meet the requirements for tools used in electrostatic-sensitive areas. Ergonomically designed soft foam handles. Stainless steel.

SLICE

Professional-grade tweezers are hand filed with aligned tips. 31DA15, 31DA16, 31DA18, and 31DA19 are autoclave friendly. 31DA15, 31DA17, and 31DA19 are soft-touch rubberized.

KNIPEX WESTWARD KLEIN TOOLS IRWIN VISE-GRIP HKP JONARD TOOLS GREENLEE

Cable Cutters

Note: Do not use cutters for ACSR unless specified.

High-Leverage—Offer strong cutting force with less pressure applied by the user. 3LY18 is Klein Tools' Journeyman Series.

Ratchet—Hold cable in place while allowing 1-handed cutting. 1ED70 is a 2-handed ratchet cutter.

2-Speed Ratchet—Close rapidly to the outer surface, then ratchet normally to complete the cut.

51-pc. Intermediate Tool Kit w/ Cordura Case 6C383

8-pc. Soft Grip Miniature Plier Set w/Case 5EWN5

Electronics Tool Kits

Each kit contains an assortment of professional hand tools to address most common issues encountered by technicians, service staff, and field engineers. Tools are mounted in pockets, with additional space provided for an individualized selection of other tools. For complete list of kit contents, see Grainger.com.

Crimpers

DIELESS CRIMPERS

Feature a wire cutter in the nose and plastic-covered handles. 1ED63 is for small lugs and splices, and fits in tool pouches.

CRIMPERS WITH DIES

49NV75 has a rotating, replaceable, color-coded dies for attaching lugs or connectors to wire and cable. 5KPH6 and 5KPN8 have pivot-action jaws and 2 die positions. 13H893 and 13H894 have revolving dies.

RATCHETING CRIMPERS

Put more crimping power into each squeeze. Kwik Cycle crimpers feature a ratchet-action mechanism that releases after proper crimp force is applied. Compound-Action Ratcheting Crimper with narrow-span handles has a built-in ratchet with safety release for uniform crimps every time. Full Cycle Ratcheting Crimper has color-coded wire size markings.

BATTERY TERMINAL CRIMPER

Features an all-in-one integral crimp nest with no removable parts to lose or rotating dies to set. User can set crimp depth with simple-to-use adjustment screw.

Electric Cable Pullers and Accessories

Attach to 1" and larger conduit with no loose parts. Self-contained units have high-torque integral motor. Circuit breaker on motor switch stops the puller motor if it becomes overloaded.

ELECTRIC CABLE PULLERS

Gardner Bender—Deliver smooth power with no chains or sprockets to break. Can be assembled in multiple configurations, so that it can be mounted almost anywhere, even in tight corners. Powerful motor can start under full load.

Greenlee—31AD38 offers high and low speeds for intermediate and continuous pulling. High speed is for loads up to 1000 lb. and low speed is for loads up to 2000 lb. Portable handle, wheels, and dolly base increase mobility around industrial facilities and offer self storage. There are no loose pieces, minimizing lost parts and set-up time. Boom extends up to 8 ft. Quick-adjust clamp easily connects to the outside of 1" or larger conduit sizes without need for adapters. Use with Greenlee 9/16" double-braided composite pulling rope. Turbo Puller 454N82 sets up in less than 60 seconds. 2-speed motor is designed for 6,000 –lb. loads. Right-angle sheave allows you to stand it out of the direct line of force. 15X788 and 15X797 use Greenlee ⅞" double-braided composite rope. Pulling speed ranges from 2000 lb. at 8 fpm (feet per minute) to 8000 lb. at 6 fpm. 4HEA6 features 6,5000 max. capacity.

SHEAVES

Aluminum alloy hook sheaves allow user to configure the direction cable and wire is to be pulled through conduit. Welded steel frames with forged steel closure-type hooks. Self-lubricated bearings.

Fish Tapes and Wire/Cable Pullers

FISH TAPES

Steel—Nonmetallic case will not dent or rust. Winder slide is included for rewind of tape.

Smart Mark—Laser etched ft. and meter distance markings every 1 ft./0.3m (fist mark is at 2 ft./0.6m). Speed Flex leader lets you fish farther and faster.

Magnum Pro Steel—Corrosion-resistant tape.

Flex-O-Twist—Tape slips through lateral locking and vertical bends.

Fiberglass—Nonconductive tape has low-friction coating and noncoiling properties.

Nylon—Curl-resistant nylon tape has 200 to 250-lb. tensile strength.

FISH LINE

Center feed assures payout without tangling. Can be pulled into the run with the wire, making it easy to add wires at a later date. Strong, lightweight nylon is mildew-resistant.

FISH STICKS

Push or pull wires over long distances, including subfloors, crawl spaces, and attics.

FISH RODS

Fiberglass rods provide added rigidity when multiple sections are threaded together. Glow-in-the-dark fishing stick 1FAH7 provides high visibility in dark spaces and includes three 5-ft. pieces for a total of 15 ft.

Vacuum/Blower Power Fishing Systems

FISHING SYSTEMS

Vacuum/Blower Power Fishing System—Everything necessary to blow or vacuum fish line, poly line, or measuring tape.

Li'L Fisher® Vacuum/Blower Power Fishing System—Compact unit has vacuuming and blowing capabilities, moving line through the conduit run. Power unit detaches from canister for easy cleaning. Includes unit and hose only.

CONDUIT PISTONS

Fit all types and sizes of conduit, ½ through 2" (including rigid, IMC, and EMT).

POLY LINE

Tangle-resistant line pulls rope through conduit with power fish tape systems.

Note: Not for pulling wire or cable.

ACCESSORIES

Conduit Measuring Tape—Measurements are permanently printed at every foot—from 0 to 3000 ft.—to measure lengths of conduit runs. Waterproof polyester has 130-lb. breaking strength.

Note: Dispenser available; go to Grainger.com®

Gel and Cream Lubricants—Adhere to cable and wire without dripping and are compatible with all insulation types. Clean up using only soap and water.

Accessory Kit—Includes 85-lb. x 2150-ft. fish line, pistons for ½", ¾",1, 1¼", 1½, and 2" conduit, adapter cones for ½" to 1" and 1¼" to 2½" conduit, adapter nozzle for measuring tape.

Pipe and Conduit Rack, Wire Carts, and Caddy

MOBILE PIPE AND CONDUIT RACK

Rack has 7 individual storage compartments. Folds and stacks for easy storage and transport. 100-lb. capacity.

WIRE CART

Large-capacity cart can be used vertically or horizontally; a built-in wire guide permits horizontal dispensing. Tubular-steel welded construction. Features 5 reel axles with spring-clip retainers and includes 2 positions for axle storage. Can configure for large reels with no loose parts. Handles 6" spools. Can pass through 28"W openings.

HAND TRUCK/WIRE CART

Includes five ⅝"-dia. spindles for storing and dispensing up to fifteen 500-ft. reels of #14 THHN wire. Has storage space for 3 spindles and clips when not in use. Lay flat when dispensing, stand upright to use as a hand caddy. Cap.: two 1000-ft. (305m) spools up to 22" (558.8mm) dia. x 16⅜" wide; three 2500-ft. (762m) spools up to 14" (355.6mm) dia. x 16⅜" (416mm) wide; ten 500-ft. (152m) spools up to 7" (177.8mm) dia. x 8" (203.2mm) wide; and fifteen 500-ft. (152m) spools up to 7" (177.8mm) dia. x 5⅜" (136.5mm) wide. Can roll through 23"W openings.

Expander Kit—Expands the capacity of 2MDN8 by up to 60%. Bolts on without drilling holes. 41"H x 12⅝"W. Includes 2 supports, 3 spindles, and mounting hardware. Dispenses up to 24 spools up to 7" dia. x 5⅜"W; 16 spools up to 7" dia. x 8"W; 5 spools up to 12" dia. x 16⅜"W; 3 spools up to 14" dia. x 16⅜"W; or 2 spools up to 22" dia. x 16⅜"W.

6-SPINDLE WHEELED WIRE CADDY

Holds 6 spools of wire up to 18" dia. Steel welded frame and large 8" wheels with front locking caster for easy movement under heavy load.

Bending Equipment

ELECTRIC BENDERS

The 555 Series, commonly referred to as "triple nickel", are portable units bending ½" to 2" dia Rigid, IMC, and EMT conduit up to 180°. Built-in bend charts guide for accurate bends. Operate with a remote pendant control.

Combos include bender and shoe listed on same line.

PROGRAMMABLE BENDER

Intellibender offers conduit capacity: ¾" rigid, 1 to 2" rigid, EMT, or IMC. Sensors automatically adjust for conduit dia. and type. LCD interface.

MECHANICAL BENDERS

Standard—Ratchet action and built-in 0° to 90° bending gauge. Capacities: ½", ¾", and 1" IMC and rigid conduit. Welded frame and wheels. Handle not included. Use 5 ft. of 1" rigid conduit for handle.

Heavy-Duty—Independent ratchet mechanism simplifies both conduit bending and shoe changes. Each shoe has its own "swing-away" clamp to lock pipe in place. Conduit capacities: ¾" to 2" EMT, ½" to 1¼" IMC, ½" to 1½" rigid, and ½" to 1½" aluminum. Includes frame and heavy-duty undercarriage with wheels, 5 shoes, 2 EMT follow bars, EMT follow bar roller, roller, and roller pin.

Little Kicker Offset Bender—Bends offsets for ½" EMT.

GREENLEE

Stud Punches

Metal Stud Punch
4A735

Metal Stud Punch—Automatically centers holes on standard studs. Self-stripping design eliminates punch hang-ups. 1 11/32" punched size dia.

BX Stud Punch—Manually punches a square hole and rolls the edges over for smooth installation.

Plumber Stud Punch—Punches a 2 5/8" dia. hole and removes slug. Use to install 2" waste water vent pipes.

Insulated Nut Drivers

Comfortable cushion grips are coded for size. Sets are rated 1000V.

Klein Tools—Tip-Ident quickly identifies nut driver size. Cordura nylon case included with sets. 2-layer insulation.

Westward—Insulation molded around blade and handle. Handles feature tri-lobular, high-torque grips. Full-length insulated shafts.

Wiha—Soft Finish handles. Molded-on insulation meets applicable EN/IEC, ASTM, NFPA and VDE standards.

Ergonomic Cushion-Grip Insulated Screwdrivers

Intended for protection from accidental tool contact with voltage up to 1000V.

Westward—Trilobular (3-sided) grips provide high torque and have full-length insulation on the shanks.

Wiha SoftFinish —Molded-on insulation. Meets applicable EN/IEC, ASTM, NFPA, and VDE Standards.

Klein Tools—Sure-grip handles have 2 layers of insulation.

Tether-Ready Tools

When working at heights, it's imperative to secure hand tools to a fixed point to prevent injuries caused by dropping. Proto® SkyHook™ Tether and Transfer systems provide positive control of hand tools at height, secure tool transfers, and a free range of motion. SkyHook™ switch connector tethers to the tool on a short lanyard and is compatible with screw-gate carabiners. Allows hands-free tool transfer. SkyDock™ attachment anchors SkyHook connector to the wrist, belt, apron, or station. Tools can be tethered with shrink loops, tool collars, lanyards, or bungees for use with the system.

Easy hands-free tool transfer

Keep tools securely connected to wrist or belt

Tethered Ratchets and Sockets

Sockets attach securely to ratchets using the Positive Control Pin Detent System that requires a separate tool to attach or remove the socket. Sockets cannot be removed without specific intent. Pin detent will engage correctly regardless of the direction the socket is placed on the square drive.

Tool Lanyards

ergodyne

- Third party certified with 2:1 safety factor
- Tools not included

Squids lanyards are designed to help reduce the risk of dropped tools. With features like hi tensile strength webbing and reinforced stitching, they are made to hold up to harsh environmental conditions.

AMPCO® Nonsparking, Nonmagnetic, Corrosion Resistant Safety Tools Information

OSHA's new Hazard Communication Standard now requires nonsparking tools with flammable liquids. For our full offering of nonsparking hand tools go to Grainger.com® and search for "nonsparking tools."

Note: Static sparks can ignite flammable vapors, liquids, dusts and residues. The alloys used to make Ampco Safety Tools are highly conductive and must be grounded if there is concern for static-electric charge. AMPCO® and other copper based tools should not be used in direct contact with acetylene and some explosives such as amatol, azide salts, lead azide and DBX.

NONSPARKING
OSHA, NFPA, MSHA and other Standards Developing Organizations require and recommend the use of nonsparking tools where flammable vapors, liquids, dusts or residues are present.

NONMAGNETIC
Prevent accidents and protect property in military, medical, and electronics manufacturing locations. Excellent for use in highly sensitive magnetic equipment and in clean room environments. Meet ASTM F2503 and ASTM A342 standards.

CORROSION RESISTANT
Chemicals, acids and salt water over time diminish the effectiveness of steel tools. Ampco Safety Tools provide durability, longevity and personnel safety in severe corrosive environments.

Nonsparking Tool Kits

Kits contain nonsparking tools that should be used wherever there may be flammable or combustible dusts, liquids, powders, or residue present. It is recommended that nonsparking hand tools are kept in specially designed kits and inventoried routinely. This process helps to ensure that steel tools are not used accidentally by first responders.

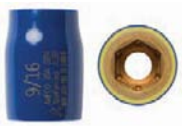
Diagonal Cutting Pliers

24Y884
Ratchet



24Y881
⅜" Drive Socket

- Meets NFPA 70E standard

Insulated, nonsparking hand tools protect against hazards of mechanical sparks, friction and impact sparks. Charging batteries produce hydrogen gas which is extremely flammable and is not easily detected by humans. These tools are exceptional for battery manufacturers, electrical safety consultants, and maintenance personnel who maintain battery systems, as well as those requiring uninterrupted power systems (UPS) and battery rooms for mission critical operations including government, hospitals, hazardous industrial processing and controls, data centers, computer rooms, and network operations.

MRI Nonmagnetic Tools

Magnetic steel tools have the ability to be unexpectedly launched through the air causing serious injuries and significant damage to expensive MRI equipment. Using MRI-certified nonmagnetic tools helps protect employees and equipment for maintenance and repair work.

Closet, Urinal, and Drain Augers

Auger helps for unclogging toilets, floor traps and aids in blockage removal. Flexible cable resists kinking and has an Integrated locking device, holding cable in place for easy telescoping extension. Milwaukee units feature electronically controlled rpm and torque power for tough clogs in tight traps. 31XN16 combination auger has left-hand wound cable with C-cutter head.

6ATX9

Hand Spinners

Clean drain lines up to 1½ in.

Description	Item No.
Hand Spin Drain Cleaner	6ATX9
Manual/Power Drain Cleaner	6ATY1

Drain Cleaning Guns

Durable 2-pc. steel canister has an interchangeable inner drum for easy cable changes. Soft start. A slide-action chuck. Single-action feed automatically extends the cable down the pipe. Cable can be retrieved without reversing the drill motor.

Air Drain Cleaning Guns

Clears clogged drains while leaving fixtures and drain covers intact. Power air flushes water out of pipes, removes grease and sludge from pipe walls. For 1" to 4" drain lines. Provides variable pressure dial control, allowing maximm force to clear drain lines up to 35 ft. or less forceful power for use on delicate pipe systems.

Water Jetters

Propels a highly flexible hose through soap, sludge, and grease blockages. Two pulse actions push the hose through difficult bends and traps. Corrosion-resistant pump with forged brass head minimizes leaks. Pressure control value allows quick and easy pressure adjustment while power scrubbing, flushing out debris, and restoring drain lines back to free-flowing capacity. 13C596 includes two-wheeled cart, easily fits through most standards size doors and maneuvers with ease.

Drain Cleaning Machines

Drum Machines—Have high-torque, long-running motors that combine with durable cables and cutters to eliminate blockages. Inner drum minimizes the potential of the cable flipping. Universal motor automatically slows cable and increases torque when met with obstructions.

Sectional Machines—Feature high-speed cutting action that allow you to drill through drain blockages quickly. Push the handle down and the cable spins at 710 rpm. Release the handle and the cable stops instantly.

Note: To order additional cable see page 863. Additional drums and cable sizes are available; call 1-800-GRAINGER (472-4643). Accessories available at Grainger.com.

Camera Systems

RIDGID Milwaukee ROTHENBERGER

CAMERA REELS

Waterproof, 3-pin SeeSnake reels feature abrasion-resistant wrapped inner core with integrated power/video signal. Hardened stainless steel camera head spring assembly provides optimum durability. In-line transmitter is located behind camera head. Scratch-resistant lens cover is made of sapphire crystal. Rugged, high-intensity light provides exceptional viewing. Include footage counter on monitor and fiberglass push rod. Reels have metal frame, polyethylene drum, and centering guides. They're designed to create a custom inspection camera system based on specific applications, and work with monitors on this page. Self-leveling cameras provide clear images that stay upright.

MONITORS

Laptop Interface monitors work with SeeSnake reels to provide recording, monitoring, and reporting. Clean keys control pad lets you keep gloved hands off your laptop while controlling camera recording and operation. Battery power allows you to inspect when AC power is not available. Include SeeSnake HQ monitoring/recording software, AC power cable, and battery charger. SeeSnake HQ software lets you edit, archive, and deliver reports in print, on DVD, or online.

INSPECTION CAMERAS

Rigid—Handheld Inspection Camera 26C165 features pistol grip, 3 ft. RCA cable (video out), and 180° image rotation. 17mm aluminum camera head and cable are waterproof up to 10 ft. Includes 2.4" color LCD screen, 4 adjustable LEDs in camera head, hook, magnet, mirror, and case. Pipe Inspection Systems 26C163 and 26C164 include camera reel and CA-300 inspection camera. Feature monitoring capability and interchangeable drums. 26C163 includes rechargeable lithium-ion battery, 2 ball guides, and reel 6EEE0. 26C164 includes rechargeable lithium-ion battery, 2 ball guides, and reel 6DNY3.

Milwaukee—High-resolution color LCD and automatic shutoff. 12V lithium-ion battery and 30-min. quick charger included. Replacement battery and charger sold on page 681.

ROTHENBERGER—Multifunction ROSCOPE 1000 technology features 720 x 480 pixel resolution (JPEG) and 5-pin connection for previous Rothenberger modules to be used. Function keys are arranged for single hand use. Includes headset connection for personal audio commentary, lithium-ion battery for 3 to 5 hr. battery life, and SD card slot for storage.

Pipe and Utility Locating Equipment

ROTHENBERGER RIDGID

Pipe/Cable/Sonde Locator—Locate inline transmitters, remote transmitters (sondes), and energized direct buried cables. Push-button readings up to 15 ft. depending on soil conditions and signal strength. Features weatherproof membrane buttons, speaker, low battery warning, and manual gain control.

NaviTrack Scout Sonde/Line Locator—Sends signals out in multiple directions to maintain contact with transmitters for fast, easy locating at depths of more than 15 ft. Use it to locate SeeSnake camera systems, so you can find the blockages that the camera is seeing, as well as to trace bare utility lines. Includes advanced search function, advanced map function, and depth measurement. Automatic or manual gain control.

SeekTech Line Locator—Lightweight, rugged receiver traces frequencies from 10 Hz to 35 kHz through just about any terrain. Target line and guidance arrows help quickly identify distortion.

SeekTech Line Transmitter—Energizes metallic lines for tracing with a locator. An easy-to-read LCD and an audio signal provide feedback that allows confirmation of a good circuit before beginning a trace.

Strap Wrench 5PV87

Chain and Strap Wrenches

Chain Tongs—Turn large-diameter pipe during heavy-duty applications. Designed and sized to provide extra leverage. 4CPE4 has a single-end tong. Double-end jaw styles can be reversed.

Chain Wrenches—Double jaw provides ratchet-like action in either direction.

Strap Wrenches—RIDGID tools have a woven nylon polyurethane-coated strap. Westward tools have a reinforced neoprene rubber strap.

Universal Chain Wrench—Forged steel handle has deep milled teeth. 6200-lb. chain capacity.

Cordless Press Tools

M12 M18

FORCE LOGIC delivers enhanced productivity by allowing you to cut, fasten, and connect using one interchangeable battery platform. Compact and light, these tools work on most major brands of fittings. In-line design provides access to nearly anywhere you can fit your arm. Brushless motor for 50,000 cycle calibration intervals and faster cycle time. Include 2 batteries and charger. 53AY77 includes 3 attachable jaws.

Tubing Benders

Geared—For bending aircraft-grade stainless steel and all other metal tubing of bending temper. Calibrated angle markings from 0° to 180°. Worm gear with 50:1 ratio. Crank handle has revolving hand grip.

Ratcheting—High-geared mechanical ratios to bend heavy-wall steel tube, stainless steel tube, and hard copper water tube (types K and L). Produce uniform bends up to 180°. Calibrated at 15° from 0° to 180°.

Compound—Bend copper, brass, steel, and aluminum thin-wall tubing, soft wire, and rod 180° in a single action. Calibrated angle markings from 0° to 180° for left, right, and offset bends. 90° start angle.

Lever-Type—Make smooth, tight radius bends in soft copper and aluminum tubing up to 180°. Open side slips over tube at any point. No scoring or flattening of tubing. Calibrated to show angle of bend. Nonslip grip handle.

Foot-Operated—20UX03 programmable tube bender shapes material while reducing delays with extremely fast automatic bending. Runs on 220V with single-phase power and bends up to 2.5" tubing and 2' schedule 40 pipe. Stores up to 170 internal programs of 10 bends each and has unlimited storage memory. Touch screen or foot-pedal operates the bender when not in manual mode. 20UX05 low pressure system runs on 220V with 3-phase power bends pipe up to 206° without stopping or ratcheting. Foot-operated pedal lets you control the bender at variable speed. Feature digital auto-stop lets you choose the desired bend degree for easy and accuracy. Handles a maximum capacity of 3" schedule 40 pipe, 3" square, and 3.5" round tube.

Flaring and Swaging Tools

Tube Expander Kits—4A524 creates joints in soft copper, aluminum, and soft steel tube. Eliminates fitting and reduces solder consumption. Can be used to recalibrate damaged tubing. Comes in plastic case. 38EY29 is for expansion of PEX-a and ProPEX tubing for termination to fitting. Built-in auto rotation provides accurate, one-handed expansion, precision expansion with rapid return, integrated magnesium housing, and D-handle design for durability. Tool-free head change compatible with Milwaukee and Uponor heads.

Swaging Tools—For joining copper and other thin-walled tubing. Eliminate need for coupling. Precision tapered. Hex body for use with wrench.

Flaring Tools—Use single flare tools in most non-high pressure applications. Use double flare tools in high-pressure applications such as automotive, AC, and refrigeration.

Valve Exercisers and Pipe Cutters

Portable Valve Exercisers—Frame is designed to absorb all torque to help protect the operator. With fingertip controls, digital counter, and 2" ball hitch coupling. Auxiliary connections allow use as a hydraulic power source for other tools.

Manual Tube Cutters

- For additional tube cutter replacement wheels, see Grainger.com

Midget—Use in restricted spaces on small-dia. hard and soft copper, aluminum, brass, and plastic.

Ratcheting—Cut copper, brass, stainless steel, plastics, and PVC. Facilitates work in tight areas.

Screw Feed and Enclosed Screw Feed—Enclosed screw feed cutters for thin-wall conduit have grooved rolls for close-to-flare cuts, fold-away reamer, and spare cutter. Hi-Duty tools are for copper, brass, aluminum, and thin-wall steel conduit. 6X858 also cuts steel and stainless steel.

Telescoping—Feature grooved rollers with flare cutoff groove and fold-away reamer. Enclosed-feed cutting action for aluminum and steel with a special cutting wheel for copper.

Pipe- and Tube-Cutting Machines

EZ Cutter—Cuts copper, brass, aluminum, thin-walled steel, and plastic-coated pipe. Include foot switch and pipe cutter wheel. 6RRU6 also includes 2 roller supports and 2 stationary supports.

Portable Electric Pipe Cutter—Cuts Schedule 40 steel pipe, galvanized pipe, and rigid conduit. 2 included ball transfer stands keep pipe level during cutting. Requires Model 700 Power Drive threader 1AC02, sold separately on page 870.

Hydraulic-Powered Pipe Cutters—Cut larger dia. cast iron, tile and concrete pipe. Like the hand-operated cutters, hydraulic cutters are not rotated around pipe. Remotely operated hydraulic pumps provide the required power. A 2"–3" minimum clearance required to wrap cutter chain around pipe. Cutters include pump, hose and case.

Copper Tube Cutting Machine—Cuts, deburrs, and cleans copper tube and fittings. Includes reamer, 6 cleaning brushes, storage rack, and quick-change collet. Can be mounted on tripod stand 1VTV2, sold separately on page 871.

M12 Cordless Copper Tube Cutter—Cuts copper tubing, wet or dry. Runs on a 12V lithium ion battery; fuel gauge displays the remaining run time. Includes 1 battery, charger, and case.

Transport Cart—Engineered to help move compatible electric pipe cutters to and from the jobsite. 250-lb. load capacity. 14¾" W x 15" D x 42¾" H".

ROTHENBERGER Malco

PEX II Wire Tools and Clips

This tool lets you layout an in-floor radiant heating system. It secures PEX (polyethylene cross-linked tubing) to a wire grid with propriety Malco Clips. Features 25-clip capacity magazine. Smooth stapling mechanism quickly feeds and installs 12-ga. wire clips with a single one-handed pump of the ergonomic, nonslip handle. Wire Clips are for PEX tubing from ⅜" to ⅝" inside diameters. Heavy-duty clips will not jam, break, or damage PEX.

Manual Pipe Threading Machines

MANUAL PIPE THREADERS

Deluxe Plumber's Kit

For black, galvanized pipe, IMC, and heavy-wall conduit up to 1". Includes ½", ¾", and 1" quick-change die heads, 1¼" steel pipe cutter, 10" water pump pliers, 14" heavy-duty pipe wrench, and pipe tape.

Super Cut

Slim, compact design with ratchet angle of 22.5°. Features simple insertion and removal of die heads, retainer locking, optimized cutting geometry, and easy operation in hard-to reach places with offset lever. Convenient, lockable reversal of the ratchet direction.

600 Power Drive

Heavy-duty motor for threading ½" to 1¼" pipe and conduit. Includes ½" and 1¼" right-hand die heads. Use with RIDGID 11R die heads and 12R replacement dies.

700 Power Drive

Drive large-geared threaders and cut pipe threads with drop-head dies through 2". Motor with spur gear reduction. RIDGID®\ model 12R die heads fit without adapter.

MANUAL PIPE THREADING ACCESSORIES

Universal Threading Machine Die Heads

¼" to 2" universal die head and 2½" to 4" receding die head allow cutting of tapered or straight right hand NPT/NPSM or BSP/BSPP threads. For use with 4CW39 threading machine, see page 871. Features automatic release for repeatable number of threads through-the-head oiling. Automatically opens when pipe is threaded to proper length.

Self-Opening Die Head

Feature through-the-head oiling. Open automatically after completion of the proper thread length.

Note: Automatic-open feature does not function below ½" size.

Quick-Opening Die Head

Uses universal right-hand pipe or bolt dies. (Included in 3Z987, 3RY43, and 3FE64, sold on page 871.)

Nipple Chuck Kit

Chuck and 5 included adapters accept ½" to 2" prethreaded pipe ends or studs to be cut to size and threaded down. For use with threading machines 3FE64, 3Z987, 3RY43, and 4CW39, see page 871. Includes wrench.

Roll Groovers

Model 918—Mounts on 3FE64, 3Z987, and 4CPC4 power drives, see page 871. Requires 300 power drive and clearance for turning handle. Includes 2" to 6" (schedule 10 and 40) roll set, 8" to 12" schedule 10 (8" schedule 40) roll set, tools for roll set change, and carrying case for roll sets.

Model 916—Integral depth-adjustment screw is separate from feed mechanism.

Model 975—Used for in-place applications or mount to a RIGID 300 power drive. Works with 3FE64 and 3Z987, see page 871. Auto tracking holds pipe into unit. Requires 6½" clearance to travel around pipe, minimum 2½" of exposed pipe for grooving.

Model 915—Easy roll set changeout, cast-in handle for transport. Ratchet (included) has 90° bend in handle. Depth setting gauge. Includes ½" ratchet wrench to feed screw.

Power Pipe Threading Machines

PIPE THREADING AND CUTTING MACHINES

22A—Machine has a 2.75-HP motor. 5-blade conical reamer.

50R—1-HP motor. Features ball detent die system.

300—Include sets of ½" to ¾" and 1" to 2" alloy universal dies.

535A—3-speed motor, large chip tray, and 1.75-gal. oil reservoir.

535M—Includes universal Quick-Opening Die Head 4Z974, 1 set of ½" to ¾" and 1" to 2" NPT universal dies, reamer, cutter, 1 gal. oil, spare cutter wheel, and integral foot switch.

1215—Compact machine for portable use.

1224—Includes RIDGID 2½" to 4" die head Model 714 die head, ¼" to 2" Self-Opening Die Head 4CW40, one set of ½" to ¾", 1" to 2", and 2½" to 4" high-speed dies, reamer, cutter, spare cutter wheel, tool box, ¾" combination wrench, 1-gal. Nu-Clear oil, and integral foot switch.

1250 Handheld—Push-button reverse. Includes pipe clamp, ROFIX adapter, ½", ¾", 1", and 1¼" precision die heads and dies.

Pipe Threading Stands and Vises

Roller Head Pipe Stands—Roller heads support pipe weighing up to 2500 lb. The rollers allow the pipe to be turned while work is in progress. Additional stands are recommended for longer and heavier lengths of pipe. 22XP99 and 3FE65 allow height adjustment from 32" to 55".

Pipe Threading Machine Stands—Wheel stands feature 16" wheels. 2ZB62 features equipment cabinet for storage and includes 2 internal shelves and a large external shelf. For use with RIDGID Pipe Threading Machines 3RY43, 3FE64, and 4CW39, sold on page 871.

V-Head Pipe Stands—Allow height adjustments up to 52" on select models.

RIDGID ROTHENBERGER

Pipe Freezing/Thawing Units

Superfreeze Pipe Freezing Unit—Make repairs without shutting down water systems. System acts as a mini-refrigeration unit that circulates refrigerant to its aluminum freeze heads. Self-contained unit uses no consumables. Pipe capacity: ½" to 2" steel, ½" to 2½" copper tube.

Pipe Thawing Unit—Electric current clears frozen metal pipes in minutes without digging or breaking through walls. Two 25-ft. cables clamp on to provide continuous heat for 4 ft. to 150 ft. of ½" to 1½" dia. pipes. Adjustable current output.

Oil Gauging Tape Measures

Single Duty for Use on Derricks—Open reel with extra large winding drum that provides rapid line recovery.

- ¼"W Chrome Clad blade

Single and Double Duty for Oils—Open reel with heavy-duty frame. Blade is recessed beneath multiple layers of nickel and chrome electroplating for strong wear and corrosion resistance. Tape reads right to left.

- ½"W Chrome Clad blade with black markings

Plumb Bobs—Designed for submersion in oils and viscous liquids. Use to determine verticals. Innage method gives actual depth of the liquid in the tank.

KESON MAKE YOUR MARK · WESTWARD® · STANLEY®

Hand-Winding Measuring Tapes

BLADE TYPE

Fiberglass—Lightweight, inexpensive blades are rust-resistant and will not conduct electricity, making them an excellent choice for use in corrosive environments and in areas with electrical hazards.

Steel—Heavier, durable steel blades will not stretch. Provide a more accurate measurement than fiberglass. Excellent for surveying and engineering applications.

REEL TYPE

Both open and closed reels have a standard 1:1 rewind, as well as a 3:1 gear rewind.

Open—Open reels can be easily cleaned of dirt and debris, making them an excellent choice for outdoor, dirty, or dusty environments. Replacement blades are available at Grainger.com.

Closed—Closed-reel tapes have a compact profile that makes them well suited for indoor applications, particularly in tight spaces.

Mechanical Measuring and Measuring/Marking Wheels

Keson RR Series—Easy-to-read magnified 5-digit counter, measuring up to 9999 ft. 11" without resetting. 3-pc. handle with cam lock adjusts to comfortable height.

Keson MP Series—Have metal frames with a centerline design for wheel balance.

Keson RRT Series—Feature a gearshaft center-aligned geared counter with a handle brake and reset.

Rolatape 32 Series—All-steel construction provides heavy-duty strength and durability.

Rolotape RT Series—Feature durable aluminum wheel and telescoping handle for storage.

Westward—Made of high-impact polycarbonate material.

Laser Distance Meters

Precise laser technology accurately measures distances to, in, and around all types of surfaces, equipment, and structures by transmitting and receiving laser reflection. Ideal for when greater accuracy is required for quick measurements. For indoor and outdoor use.

Bosch—Meters provide fast, easy, accurate measurements with a full range of features including; real-time distance, area, volume, indirect lengths and angles. Select models offer Bluetooth connectivity.

Milwaukee—Designed to provide the easiest measurements from all orientations. Screens offer maximum visibility in low light conditions. Impact-resistant overmold provides protection from tough jobsite conditions. Side-shot button allows an easier, more ergonomic experience when measuring in all directions. 489K09 includes memory storage for 3 reading. 489K10 and 489K11 include memory storage for 30 readings.

Leica DISTO—With ranges of up to 650 ft. and better than ±1⁄16" accuracy, per ISO standards, these units can be used in all areas of construction and MRO. All are ruggedly built and designed for site conditions. Multiple units incorporate view screens for outdoor use, and tilt sensors to help acquire additional calculations in hard-to-reach areas.

Leica Accessories—Target plates are made of gray plastic with reflective coatings to increase the effective range of the meter on nonreflective surfaces.

Rotary Laser Levels

BOSCH JOHNSON

All kits include batteries, instruction manual, and carrying case.

LEVELING TYPES

Horizontal or Vertical Leveling: Rotary lasers that include vertical leveling can be rotated onto their side for vertical alignment and plumb applications.

Electronic and Pendulum Self-Leveling: More accurate results than manual lasers, and have an out-of-level indicator or alarm.

Manual-Leveling: External leveling screws and level vials are used to manually level the laser.

BEAM COLORS

Red Laser Beams: Cost effective and ideal for indoor use, most visible in low light situations.

Green Laser Beams: More visible than red beams, particularly in brighter light situations.

Sheave, Industrial, Mining, and Pipe Alignment Lasers

JOHNSON

Industrial Alignment—Lasers are used to assist with installing and aligning heavy equipment, conveyors, and paint lines.

Mining Lasers—MSHA (Mining Safety and Health Administration) approved.

Pipe Laser—Waterpoof laser with easy grade input.

Sheave Alignment—Use 3 precision-ground magnetic targets and 1 precision line laser to assist with belt and sheave installation.

Optical Levels and Transit Levels

- For additional laser and optical laser level accessories, see Grainger.com®

OPTICAL LEVELS

DeWalt Auto Level—Magnetically dampened compensator for optimum range and accuracy. Heavy-duty leveling base is fast and easy to set up and level. 360° horizontal circle for precise measuring of horizontal angles.

DeWalt Builder's Level—Protected leveling vial for jobsite durability. Heavy-duty leveling base is fast and easy to set up and level. 360° horizontal circle with vernier scale for precise measuring of horizontal angles.

Johnson Automatic Levels—Wire-hung compensator with reinforced housing has a large aperture for crisp images. Durable scope and bubble vial. Horizontal circle with easy-to-read black-on-white graduations. Large, stable base.

Johnson Builder's Levels—Has a horizontal circle graduated to single degrees and lens with protective sun shade. Horizontal tangent screw for precise movement control. Top-mounted leveling vial with large, easy-to-turn leveling screws. Suitable for light construction work.

TRANSIT LEVELS

DeWalt Transit Level—Transit capability allows user to determine vertical angles. 360° horizontal circle with vernier scale for precise measuring of horizontal angles. Protected leveling vial for jobsite durability. Heavy-duty leveling base is fast and easy to set up and level.

Johnson Builder's Transit Levels—Graduated circle reads to single degree and to ¼-degree by vernier. Vernier arc reads 0° to 45°. Clamp and tangent screws for positive leveling action when used as a level.

Levels

Box Beam—Extruded aluminum box beam profile. Solid acrylic vials with easy read green vial fluid. Rubberized shock protecting end caps.

Box Beam, Magnetic—Extruded aluminum box beam profile. Strong holding rare earth magnets. Solid acrylic vials with green vial fluid. Rubberized shock protecting end caps.

I-Beam, Top-Reading—Aluminum frame with green acrylic vials. Top-read window and protective end caps.

I-Beam, Magnetic—All models have a full-length, strong holding magnetic strip.

Big J I-Beam—Oversized aluminum frames, and oversized acrylic barrel vials with green vial fluid.

Big J I-Beam, Magnetic—Magnetic edge holds level securely to ferrous surfaces. Rubberized, antishock, antislip end caps protect frame.

Bamboo Hardwood Levels—Easy-to-clean laminated bamboo frames have excellent tensile strength and durability. Won't absorb moisture, and resist heat and extreme cold without cracking or warping. Feature 6 acrylic vials, shock-resistant rubberized end caps, and metal binding frame.

Plastic Levels—Structo-Cast plastic frame is nonconductive and will not scratch fine wood or painted surfaces.

Laser and Electronic Levels

Include batteries, carrying case, and instruction manual.

Laser Torpedo Levels—Levels have aluminum frames with acrylic vials and rare earth magnets. 1YRR9 has a rotating swivel head with laser beam that projects a point, or a vertical or horizontal line. Reads plumb, level, 45°, and cross check. 1YRT1 projects 3 continuous beams reading plumb, level, and 90°. Includes a leveling base.

Digital Electronic Levels/Inclinometers—1TLH7 has large LCD that simultaneously displays level and angle. Beep sound signals plumb and level. Feature automatic digit inversion, hold function, magnetic base, ¼-20" tripod thread, low-battery warning, and automatic shutoff. Angle displays in degrees; inclination displays in degrees or percent. Features lockable arm and laser beam. Magnetic base. 1TLH8 and 1TLH6 provide 4 x 90° readings of level, and tilt in degrees or percent slope with audible alert. 1TLH8 has a laser beam. Display can rotate up to 180°.

Wall Sensors, Scanners, and Stud Finders

MultiScanner x85 OneStep—Detects temp. changes in water-filled hydronic radiant heating. The ultra-bright LCD screen, SpotLite Pointer, and audio tone indicate target location.

MultiScanner i520 OneStep—Locates both the center and edges of wood or metal studs. The ultra-bright LCD screen, SpotLite Pointing System, and audio tone indicate target location. ACT technology directs users back if starting was over a stud.

StudSensor Pro LCD—Features SpotLite Pointing System with LCD indicator and audio signal. Also features TruCal instant calibration.

StudSensor Pro SL—Stud Scan mode locates the edges of wood or metal studs up to ¾" (19mm) deep. DeepScan mode doubles the scanning depth to 1½" (38mm). SpotLite Pointing System shines a beam of light on the wall to identify the target.

MetalliScanner m40—Locate ferrous and nonferrous metal. Use Pinpoint Scan to locate small metal objects. Use Wide Scan to detect metal in walls or concrete.

Stud Finder Plus Stud Finder—Locates metal studs or nails with indicator magnet. Has built-in level vial.

FATMAX Stud Sensor 300—Designed with auto calibration, AC detection for live wires up to 2" D, and marking channel. OnePass technology locates stud centers. Deep scan senses metal up to 3" through material

Stud Sensors—24A379 has visual indicators and indicates edges of stud. 24A378 feature AC detection, for live wires up to 2" D. I. 24A378 features OnePass technology locating studs, and a marking channel.

GMS 120 Multi-Scanner—Finds magnetic and nonmagnetic metals, power cables, wood, and plastic pipes. Includes 9V battery and hand strap.

Construction Calculators

All calculators come with batteries, slide covers or doors, paperless tape, auto shutoff, and user's guides.

MATERIAL ESTIMATORS

All calculators work in feet-inch-fractions, decimals, metric, linear, area, volume, and right angle solutions.

Advanced, Desktop, and Contractors Calculator with Trig—Provides circle, arc, dms, blocks, panels, and footings.

Material Estimating Calculator—2WJE6 estimates materials and costs for concrete, fences, decks, bricks, tile, flooring, gravel painting, drywall, and paneling. 9XG03 designed for metric measurements. Stores user-defined materials and sizes in the memory. Provides instant calculation also for bulk bags, BTUs, flooring, and tile.

DIGITAL PLAN MEASURES

Basic Handheld Plan Measure—Calculates linear, area, and volume in imperial and metric scales.

Advanced Handheld Plan Measure—Features expanded custom scales with optional PC interface.

ELECTRICIANS AND PIPE TRADES CALCULATORS

Come with protective case with cover.

Electricians Calculator—Provides wire and conduit sizes, voltage drops, and is updatable for code changes.

Pipe Trades Math Calculator—4MHJ3 calculates right angles, offsets, complex rolling offsets, fitting angles, bends, slopes percent grades, drops, parallel pipe cutbacks, feet-inch fractions, trigonometry, weight/volume conversions, flow rates, and pressures. 22UN69 calculates dimensional math, fractions (ruler, proper, improper, and mixed), unit conversions, ratios and proportions, trigonometry/trig and plane geometry (right triangles/angles, circular, and polygonal shapes). Works with exponents, square roots, and reciprocals.

MEASURING AND CONVERSION CALCULATORS

Feet-Inch-Fraction-Metric Dimensional Calculator—Provides calculations and material estimating for linear, area, volume, circles, and arcs.

Unit Conversion Calculator—Features 400 built-in standard to metric unit conversion combinations.

Mobile Workstation
3FRA9

Workmate Project Center
6Z842

Workstations

FATMAX Mobile Workstation—4-in-1 unit includes toolbox, part bins, portable tray, and large lower bin. Structural foam construction with front locking latch.

Workmate Project Centers—Can be used as a workbench, tool stand, sawhorse, and working vise. Steel frame with adjustable jaws for clamping.

Sawhorse Legs—Legs on 8UYY8 and 8PXG9 are welded steel and attach to a 2 x 4 to make any length sawhorse needed. They have gripping teeth and set-up requires no screws or nails. 23TL83 and 23TL81 were designed for maintenance workers and contractor tradesman. They include a fast and easy width adjustment feature.

Concrete Mixers

WESTWARD WHEELBARROW MIXERS

Mixers feature metal blades and a gear locking system. 10N693 features a heavy-duty frame and removable handles for compact storage. 10N694 has a welded steel frame, torsion bar suspension, and easy-to-use dump mechanism.

MARSHALLTOWN MIXERS

Wheelbarrow Mixer—Hand-tow mixer includes stand and has removable handles for easy storage. Tires are made of flat-free rubber.

Tow-Behind Concrete Electric Mixers, 18F334 and 18F335—25-rpm mixers feature reinforced square tubular frame with steel channel yoke; wheel- and hand-brake tilting mechanism; and any-position frictional hand brake.

KUSHLAN WHEELBARROW MIXERS

21-rpm electric mixers feature 8" power cords and 5⁄16"-thick, easy-clean polyethylene drums that resist dents, cracking, and rust. Welded steel frames. Steel mixing blades.

KUSHLAN PEDESTAL-MOUNTED MIXERS

21-rpm electric mixers swivel 360° and can be discharged in any direction. Drums can be adjusted to the correct angle for particular mixes. Welded steel frames are easily broken down without tools. 8" power cords included.

22DA24—This mixer is designed with polyethylene drum, heavy-gauge steel tubing frame, and telescoping handles.

2DCL5—This mixer has a steel frame that's easy to move from place to place. Food-grade liner extracts easily from basket. 10" x 2¼" flat-free tires.

2DCL7—Drum holds ten 80-lb. bags of premix concrete. Driven by a 20:1 gear box with a chain sprocket drive system. Aggressive mixing blades. 16" x 4" flat-free tires.

ACCESSORIES

Mixer Stand 6LCX9 converts mixer to a stationary unit.

Collomix®

Handheld Concrete Mixers

HEXAFIX coupling lets you change the mixing paddle quickly without tools. Feature reduced noise and electronic speed control. Easy-to-operate with straight back and ergonomic grip handles. Double-action trigger has safety lock-off to prevent unintentional machine start-up. 29UK09 can be used with cement, plaster, and ready-mixed mortar. 29UK11 is for plaster, mortar, screed, concrete, and quartz-filled epoxy resins. Counter-rotating mixer 29UK12 has no counter-torque, making it easy to move in heavy and viscous material. Ideal for miscellaneous mortars, slightly moist mixes, plaster, screed, coverings, filler, filled and unfilled epoxy resin, cement, and bitumen mixes.

Hydraulic and Lubricant Oil

Hydraulic oils are specially formulated to resist changes in volume and viscosity to keep hydraulic systems running efficiently, even when subjected to harsh conditions. They also lubricate the system to reduce friction between moving parts and help prevent wear and tear on them.

Windshield Wiper Blades

Note: Find more wiper blades on Grainger.com®. Search for "Windshield Wiper Blades."

Trico Force™—Features an aerodynamic spoiler that cuts through excessive wind speeds of up to 135 mph caused by cross and truck winds, and general traffic turbulence.

HD®—These wide saddle blades are designed for use on heavy-duty trucks, RVs, and buses

Exact Fit®—Provide the exact same fit as original factory blades for vehicles with conventional metal wiper blades.

Tech®—Feature Memory Curve Steel® beam that provides uniform pressure for a clean wipe.

30 Series—Have a precision-cut rubber edge for outstanding wiping action and conforms to highly curved windshields of later-model vehicles.

Sponges, Mitt, Cloths, and Pads

Microfiber Cloths—2ZPF1 has an absorbent waffle weave to reduce the frequency of wringing.

Microfiber Pads—2ZPE2 has an elastic band to hold pad to hand securely. 2ZPE7 and 2ZPE8 are for polishes.

Sponges—Lift and hold dust, dirt, and grease. Use 2ZPE6 to polish surfaces.

Mitt—Features microfiber on 1 side for cleaning and honeycomb mesh on the other for scrubbing.

Polishing Pads and Detailing Cloths

Perfect-It Polishing Pads—Single-sided high-performance pads attach to Hookit Back Up Pads 2EXY4 and 2EXY5 (sold separately) to fit all ⅝"-shaft slow-speed polishers.

Perfect-It Detailing Cloths—2-ply polyester/nylon microfiber won't scratch or streak paint, chrome, glass, dashboards, or other vehicle surfaces.

Wool Compound Pads—Use these double-sided pads with adapter 2EXY3 (sold separately) to refine paint surface defects.

Hookit Back-Up Pads and Adapter—Backup pad allows quick attachment, accurate centering, and easy removal of single-sided compounding or polishing pads.

Autobody Sanding Block Kit, Discs, Rolls, and Pads

Finishing Block Sanding Kit and Refills—The ergonomic design provides maximum control and comfort. The steel reinforcement plate helps improve finishing results, with reduced sanding effort.

Gold Sanding Discs and Rolls—Multipurpose grain is ideal for all automotive finishes as well as wood, metal, fiberglass, and painted surfaces. The "anticlog" coating prevents loading to increase cutting performance.

- Pressure-sensitive adhesive paper backing

G2 Abrasive Disc—Designed for automotive and marine finishes, wood, metal, fiberglass, and painted surfaces. The durable backing resists tearing and provides ultimate durability. Anticlog coating prevents "loading" of abrasive surface. Feature "Quick-Change" hook-and-loop holding system.

- Film backing

G2 Waterproof Sanding Sheets—Made with a specially treated, waterproof backing for increased "wet" performance and flexibility.

- Film backing

Scuffing Pads—Nonwoven synthetic flexible pads are ideal for scuff sanding and finishing of automotive and marine finishes, wood, metal, and fiberglass.

Bondo Auto Body Repair

Body Filler and Repair Kit—Nonshrinking formula repairs dents, patches rust holes and leaks, and fills in chips. Spreads easily and sands in just 20 min. 3RAR1 includes body filler, red cream hardener, self-adhesive metal body patch, and spreader.

Fiberglass Resin with Hardener—Use alone or with fiberglass tape, cloth, or mat to repair fiberglass boats, snowmobiles, jet skis, bathtubs, and showers.

Bondo-Glass—Repairs dime-size or smaller rusted-out metal holes and shattered fiberglass body parts.

Bondo-Hair Long-Strand Fiberglass-Reinforced Filler—Recommended for use on up to 1" rust holes, shattered fiberglass and dents where extra strength is required. Ideal for vehicle restoration.

Fiberglass Mat and Fiberglass Cloth—Provide extra reinforcement for large repairs. Can be used with fiberglass resin or two-part adhesive.

Dynatron Dynalite Body Filler and Creme Hardeners—3RAR3 is a lightweight, nonseparating body filler that has good featheredge capabilities. 6KHA9 and 2CTR1 are creme hardener agents that mix easily and quickly and are designed to be used with all 3M Body Repair Fillers.

Manual Jaw Pullers

These pullers enable you to remove and install parts for fast, effective repairs. The pullers are forged from quality steel, heat treated, and subjected to rigorous tests which exceed their rated capacity.

Nonreversible jaws have deeper jaws for fan blades and blower wheels.

ROBINAIR

A/C RRR Machines

Refrigerant (RRR) Machine for Hybrid and Nonhybrid Vehicles—Efficiently recovers, recycles, evacuates, leak tests, and recharges R-134A refrigerant. Automatic features include leak testing, refilling, and oil draining.

407K04 recovers 95% of refrigeration in vehicle A/C system and programs +/-1/2 oz. of programmable charge.

38UP51services hybrid vehicles with high voltage electric compressors.

38UP52 has ability to add printer and refrigerant identifier.

52ET95 has the capability of charging without continual monitoring.

1234YF Recovery, Recycle, Recharge (RRR) Machine—Integrated refrigerant identifier samples R1234YF refrigerant in an A/C system before recovery. Fully automatic operation, services both standard and hybrid vehicle A/C systems without continual monitoring. Include automatic internal tank refill, oil drain, and color display. 416L15 has a 2.5 reservoir capacity.

A/C Flushing—Eases flushing of condensers, evaporators, and lines. Features pulsing action to loosen corrosion, dirt, and debris, while unit injects air bubbles into liquid stream for greater cleaning action. Includes adapters to mate with ¼" flare and ⅜" quick-disconnect fitting kits.

OTC

OBD II Auto Scanners

OTC Evolve Professional Diagnostic Tool—Diagnoses drivability issues on virtually any vehicle produced in the last 30 years. Dual Wi-Fi® allows you to check and test components while moving freely around the vehicle with secure connection. Includes wiring diagrams for most vehicles, model years 1986 to present, available directly on the tool. Comes with one-year, renewable diagnostics subscription, which provides updated vehicle coverage. Once subscription expires, all vehicle coverage remains with the tool but the wiring diagrams will no longer function.

- Bravo software and Android™ operating system
- Includes rugged tablet with 10.4-inch screen

OTC Encore Professional Diagnostic Tool—Performs diagnostics and auto-identifies vehicles to help diagnose issues. Touch screen display provides codes and related information, and can also browse the Internet for related info. Comes with one-year, renewable diagnostics subscription, which provides updated vehicle coverage, tests, and resets. Once subscription expires, all vehicle coverage remains with the tool but new coverage updates will cease.

- Android™ operating system
- Rubber overmolded grips
- 8GB internal storage
- Integrated Wi-Fi® and Bluetooth®

Trilingual OBD II ABS and Airbag Scan Tool—Features multilingual menu and definitions with English, Spanish, and French displayed on the LCD. Shows ABS and Airbag codes for most 1996–2013 GM, Ford, Chrysler, Toyota, Honda, Nissan, and Hyundai vehicles. Also monitors battery, alternator, and charging systems. Automatically populates vehicle data for most 2000 and newer vehicles. USB cable included.

52GY69

45NU67

22A834

416L19

OBD II Auto Scanner with CodeConnect®—Displays Diagnostic Trouble Codes (DTCs) and also helps troubleshoot with top-reported fixes specific to vehicle make, model, year, and engine. Also monitors battery, alternator, and charging system.

OBD II Scan Tool Kit—Performs On-Board Diagnostics (OBD) and can relearn and reprogram new or existing replacement sensors.

- OBDII TPMS Device
- Wall Mount Battery Charger
- Carrying Case
- USB Cable
- Bluetooth OBDII Dongle
- RJ45 Cable
- Lithium Battery
- Installation CD
- Relearn Magnet
- Instruction Manual

OBDII PocketScan—Reads OBD II DTCs from the on-board computers of 1996 and newer cars and light trucks. Helps determine the cause of Check Engine lights. Allows the user to clear the DTCs and turn off the Check Engine light once repairs are made.

Battery & Starter/Charger System Tester—For use with OTC Encore and Evolve scan tools. Performs battery and system tests on 6V and 12V automotive batteries, including regular flooded, enhanced flooded, AGM, EV, and start-stop. Creates health reports. Communicates wirelessly with Encore and Evolve software version 2.10 via Bluetooth®.

Battery Testers

WESTWARD

Hand-Held Load Testers—Use to test the state and condition of 6 and 12V batteries.

Compact Charging and Starting Tester—Durable all-metal housing with color-coded meter and heavy-duty 18"L cable.

Universal Charging and Starting Tester—This universal 6 and 12V tester features four scales: battery percent of charge, battery load, charging system test, and starting system test. Unit has a heavy-duty steel case and 6-ft. cables with nylon thermo clamps.

Battery Load Testers

45NU82 features convenient, portable, and easy-to read scales and tests batteries on or off the car in just 10 seconds. Determines state-of-charge, cranking, charging volts, and good/bad status. Also includes a load safety switch to prevent arcing.

45NU84 is lightweight and compact and helps to produce more accurate results. Features large, easy-to-read display, ergonomic handle, alternator test lead, and ripple detection light. Determines state of charge and tests battery load, starter and charging system, and alternate ripple.

Handheld Portable Jump Starters

These devices are compact enough to fit in a vehicle's glove box and can start a vehicle having a dead battery without the use of another car or power source. Starters provide a quick burst of power to the dead battery to start the vehicle. Once the vehicle's engine has started the alternator turns on to begin charging the dead battery.

Portable Jump Starters and Power Stations

Jump starters are designed to start a vehicle having a dead battery without the use of another car or power source. They provide a quick burst of power to the dead battery to start the vehicle. Once the vehicle's engine has started the alternator turns on to begin charging the dead battery. Models can also fully charge a weak or dead battery.

Solar Battery Maintainer, Charger Maintainers, and Controller

Use to help keep 12V lead-acid batteries fully charged without the need for electricity. The maintainer can operate under most weather conditions and even when skies are cloudy. 14N888 built-in blocking diode helps protect against battery discharge at night and includes a 16W542 controller that protects batteries against overcharge and discharge while being charged from a solar panel, and to automatically assure a full charge.

Handheld Portable Battery Chargers

These compact battery chargers are easily stowed in a vehicle when not in use. They can fully charge a vehicle battery and then maintain it at the proper storage voltage.

Charging—The charger allows a weak or dead battery to be become fully charged. The charging procedure may take several hours to complete.

Maintaining—In this mode the charger detects when a battery drops below a certain threshold and then supplies a very low-amperage charge to the battery. Ideal for vehicle batteries that are used infrequently.

Mounted Battery Chargers

ASSOCIATED Battery DOCTOR WESTWARD

These chargers are wall mountable and plug into a wall outlet to charge up to four batteries at once. LED indicators show when batteries are completely charged. Automatic current selection adjusts to the battery capacity.

Maintaining—Charger detects when a battery drops below a certain threshold and then supplies a very low-amperage charge to the battery. Suitable for vehicle batteries that are used infrequently.

Charging—In this mode the charger allows a weak or dead battery to be become fully charged. The charging procedure may take several hours to complete.

Bank Charging Stations

Battery Tender DSR Schumacher Electric

Designed to simultaneously charge and/or maintain multiple 12V batteries with independent charging banks.

Charging—Allows a weak or dead battery to be become fully charged. The charging process may take several hours to complete.

Maintaining—Detects when a battery drops below a certain threshold and then supplies a very low-amperage charge to the battery. Used to help maintain the charge for vehicle batteries that are used infrequently.

Benchtop Battery Chargers

These chargers are portable and can boost, charge, and maintain batteries in cars, light- and medium-duty trucks, and tractors with 6V systems.

Boosting—Provides high-amperage power for starting a the vehicle if the battery has enough power to turn the engine over, but not sufficient to start the vehicle's engine.

Charging—Allows a weak or dead battery to be become fully charged. The charging procedure may take several hours to complete.

Maintaining—Detects when a battery drops below a certain threshold and then supplies a very low-amperage charge to the battery. Used for vehicle batteries that are used infrequently.

Wheeled Battery Chargers

Provide battery charging and maintenance to help keep fleet vehicles powered up and ready to drive. Chargers are wheeled and have a handle to ease transport from different locations and ease maneuverability over uneven surfaces or on the shop floor.

Boosting—Provides high-amperage power to start the vehicle if the battery has enough power to turn the engine over, but not sufficient to start the engine.

Charging—Allows a weak or dead battery to be become fully charged. The procedure may take several hours to complete.

Maintaining—Detects when a battery drops below a certain threshold and then supplies a very low-amperage charge to the battery. Suitable for vehicle batteries that are used infrequently.

Power Inverters

These inverters convert direct current (DC) input from a vehicle's battery into an alternating current (AC) output for use to charge devices in a vehicle like a cellphone or portable computer. They also have built-in, low-battery alarms and shutdowns.

Modified Sine Wave—Suitable for use in charging equipment that is less sensitive to power fluctuations such as lights and some tools.

Pure Sine Wave—Deliver high quality electric current similar to utility standards and suitable for use with most electronic devices such as a cell phones or portable computers.

Automotive Primary Wire

- 100-ft. spool length

Plastic insulated, bare copper stranded primary wire for low-voltage, transportation applications. High-heat, cross-linked, wire provides resistance to chemicals, abrasion, and moisture. Meet SAE J1128 and RoHS Compliant.

Automotive Fuses and Circuit Breakers

EATON BUSSMANN SERIES

ATM Fuses—0.64"L x 0.43"W—Universal color coding. Enclosed element protects against shocks, sparks, and corrosion. For late-model vehicles. Illuminated versions glow when fuse is opened.
- Fast-acting
- 1kA IR

FMX and FMX Low-Profile—1"L x 0.47"W—Meet OEM demand for smaller components, and offer high-amp protection in compact packages.

MAX Fuses—1.7"L x 1.2"W—Used to protect circuits in wiring harness. For domestic and imported vehicles.

AGA Fuses—¼" dia. x ⅝"W—Size rejects insertion of other fuse types.
- Fast-acting

ATC Fuses—¾"L x ¾"W—Feature enclosed element. Illuminated versions glow when fuse is opened.
- Fast-acting
- 1kA IR

UCB Circuit Breakers—UCB series replace ATC fuses.

Manual Grease Guns

- Cartridge capacity 14½ oz.
- Bulk capacity 16 oz.
- Cartridge or bulk grease loading

Flip-over follower on select guns provides a superior seal for easy filling.

Lever models have a cast iron pump head, precision-fit plunger, and extra-heavy follower spring to withstand rough duty.

Pistol models have a die-cast aluminum head.

WESTWARD®

Manual Grease Guns

- Cartridge capacity 14½ oz. (except 4BY82 uses 3-oz. cartridge)
- Bulk capacity 16 oz. (except 4BY82 4-oz. capacity)
- Cartridge or bulk grease loading

Feature die-cast aluminum head and handle. 4BY82 is a toolbox-size gun with dual discharge ports (front and top). 4BY74 comes with a handy filler nipple. 13X046 is ideal for use in cold weather and has a large inlet port with venturi action. Clear barrel models provide 100% positive grease identification and color-coded ends help identify which fluid is in each gun. Additional color options on Grainger.com®.

Cordless Grease Guns

- Battery powered
- Pistol Grip
- Cartridge or bulk grease loading
- Cartridge capacity 14½ oz.
- Bulk capacity 16 oz.

Feature air bleeder valves for quick priming. Flex hose nozzle extensions help access hard-to-reach fittings. 25DU72 and 25DU73 have variable-speed triggers for controlled grease flow and are suitable for grease types up to NLGI Grade 2. 45L187 to 45L189 have 2-speed design to select between max. pressure and max. flow rate. All except 6FKP5 and 4PKY9 have LED lights for low-light conditions.

Cordless and Air-Operated Grease Gun Kits

- Cartridge capacity 14½ oz.
- Bulk capacity 16 oz.
- Cartridge or bulk grease loading

For grease types up to NLGI Grade 2. Silver-color tube.

Cordless—49CT89, 49CT90, 30HL30, and 30HL31 feature stable 3-point stance. 1260 Series have an air purge valve and integrated hose holder.

1440 Series cycle indicator pin helps monitor grease output. 1840 Series with high-torque motor and high-capacity battery dispense up to 10 grease cartridges with a single charge.

Air-Operated—Variable-speed trigger. Advanced pump design helps eliminate priming problems. ¼" FNPT air inlet. Air operating range: 40 to 150 psi. 40:1 ratio.

ARO® WESTWARD® Legacy

Heavy-Duty High Flow (Oil, ATF) Pumps

ARO Thunder Pumps—Stall-free, ice-free air motor design. 85dB. Include 2" bung adapter. ¼" FNPT air inlet.

Westward Pumps—Oil pumps come complete with bung nut. 3APF2 features all-metal, industrial-quality construction. With spigot and piping connectors. 3APE7 composite construction allows the pump to operate without using a lubricator unit in the air supply.

Pump Packages—4ZT12 and 5TCU6 include pump, control handle, meter (pts.), drum cover, and 6-ft. hose. 4TZ12 also has a band dolly.

45CT51's 3:1 pump transfers oils up to SAE 130 up to 30m; with 3.5m hose. 45CT52's 5:1 pump dispenses oils up to SAE 240 up to 50m; with hose reel. Both include steel trolley, air-operated oil pump, digital oil control gun, and miniature filter-regulator/lubricator combo with gauge.

WESTWARD® Legacy LubriMatic®

Fluid Transfer Pumps

Lever-Action—5NUD4 is for dispensing oils and antifreeze from 15- to 55-gal. drums.

5NUD5 is for dispensing heavy oils from 5-gal. pails. Handle has 3 settings for use with oils of different viscosities.

Rotary—Westward pumps come complete with 2" cast-iron bung nut and 3-pc. threaded suction tube for use on 15- to 55-gal. drums. 5NUD6 works in both directions, to empty and refill drums.

41AA65 transfers light- to medium-viscosity noncorrosive petroleum-based fluids from 55-gal. containers. 1 gal. per 18 revolutions. Spout O.D. 1$\frac{1}{16}$".

High Flow Transfer Pumps

LINCOLN Legacy

LINCOLN

Single-Acting Oil Pumps—Self-priming. 1XGN6 is designed for placement in 25- to 275-gal. bulk tanks with supplied bung bushing.

Bare Stub Oil Pumps—1XGP1 self-priming pump develops a suction head up to 25 ft. of oil after priming.

LEGACY

Stub Design—Pumps are nonicing and have muffled exhaust. Each includes 2" bung adapter. Optional Telescopic Suction Tube 4ZT43 is available to fit bulk tank containers. (Not for use with waste oil.)

1XGN6

Note: Choose the pump ratio for your particular application: 1:1 High Volume for transfer through short runs with small pressure drops. 3:1 Medium Volume for use in portable and stationary oil distribution systems composed of pipelines and/or hose reels and fluid meters. 5:1 Heavy-Duty High Volume for use in oil distribution systems with long pipelines and/or hose reels and fluid meters. Pump to multiple bays simultaneously.

Solvent-Based Parts Washers

ZEP PROFESSIONAL

- All steel construction
- Spring-loaded lids with 165° fire link
- Directional spouts with On/Off control

Washers circulate solvents to remove grease and oil from automotive parts. Filters trap contaminants to extend solvent life. Dyna-Trap filter bags remove oils and greases from solvent. Only the filter elements are disposed of. Fire links close lids automatically in the event of a fire.

Solvent-Based Parts Washers and Chemicals

- Powder-coated steel construction
- 115V/60 Hz

Manual washers feature fusible safety link that closes the lid in event of fire. Deluxe Drum-Mount and Clean-O-Matic washers comply with most freeboard compliance regulations. All units are ETL Certified for U.S. and Canada.

Clean-O-Matic—Provide 3-way cleaning action delivered by directed steam, flush hose, or in-tank agitation. 4KTX1 also includes casters. 4KTX2 is sized for engine blocks, transmissions, and compressors.

Handi-Kleen—Tanks have bottom drains for easy cleanout. 3Z746 work shelf supports parts above fluid level and is removable for access to soak tank. Features flush hose and filter basket.

Solvent Drum Mount—Can be placed at jobsite for on-the-spot cleaning. Proprietary retractable pump reduces lifting height to minimize back strain.

Aqueous—Heated washer converts soak-to-sink and back again for configurations tailored to your needs. Corrosion-resistant construction with thermostatically controlled heat up to 110°F and GFCI protection.

Parts Washer Chemicals

Bio-Circle®—Bio-remediating parts cleaners and degreasers safely remove grease, oil, and grime from all steels and most aluminum alloys. Cleaners are nontoxic, VOC-free, and safe on skin.

B'laster®—Removes oil, grease, and grime from metals, most plastics, and painted surfaces without leaving any residue.

CRC®—Aqueous, industrial-strength degreasing solutions are PH-neutral, VOC-free, noncorrosive, and biodegradable. For parts cleaning in preventative maintenance and repair facilities, industrial manufacturing plants, automotive repair shops, and metal fabrication facilities.

Graymills—Solvents are for cleaning in Graymills parts washers. Biodegradable aqueous cleaners remove organic and inorganic soils including grease, oil, epoxy, paint, plating salt, and rust. Bioremediating aqueous cleaners are pH-neutral to help the microbial process in Graymills parts washers.

Oil Eater®—Powerful formulas dissolve grease and grime from almost any surface; feature anticorrosion chemistry.

ZEP—Solvents are safe to use on all metals. They leave a light oil film to protect against rust and corrosion. Solvents with citrus are for extra cleaning power. Recirculating spray wash detergent is for hot vat or recirculating spray wash cabinets.

Service Jacks

48NU10

- Side frame handles allow easy carrying
- Extra-wide wheels add stability under stress
- U-joint assembly for precise load control on 48NU10 and 48NU12
- Dual-piston speedy lift on 48NU11

48NU10 is all aluminum for strength and stability. 48NU11 and 48NU12 aluminum/steel design combines lighter weight and strength for long life.

End Lift 11N135

Truck Jack Stand 4CWL6

Air/Hydraulic Jacks

AXLE JACKS

5M459 has a capacity of 35 tons and a lift range up to 15⅜" on first ram piston. Second ram system has a capacity of 22 tons and a lift range up to 19½".

END LIFTS

4CWK6 and 4CWK5 feature a 3-way heavy-duty air valve for precise control. Lifting arms can be extended for greater versatility. Safety latch design has 5 auto safety lock positions to help prevent unintended lowering of load. 11N135 provides up to 30" of stroke. Pneumatic wheels ease maneuvering unit into position. Lifting saddles extend easily for a variety of lifting positions.

TRUCK JACK STANDS

Air jack and support stand all in 1 unit. Adjustable ram allows a variety of starting heights. 11N164 includes 10-ft. air hose and removable handle.

Dyna Beads

Tire Balancing Beads

Reusable ceramic beads eliminate the need for spin balancing or rebalancing for the life of the tire. The beads reposition themselves as the tire wears to help maintain a smooth, vibration-free ride.

Wheel Locks

California Immobilizer™ PROTECTING YOUR INVESTMENT

The Protector™—Powerful theft deterrent that offers a level of security to standard car wheel boots.

TNT Trailer Lock—Thick wall, steel construction lock can be installed on either side of trailer.

39C431

39C433

Description	Use With	Item No.
The Protector Anti-Theft Wheel Lock	0 to 13 in wide, Adjustable	**39C431**
TNT Truck/Trailer Lock	Single or Dual 22½ to 24½ in Wheels	**39C433**

LASER TOOLS CHECKPOINT™ PROFESSIONAL

Loose Wheel Nut Indicators

Use these convenient indicators to improve the safety by providing a visual indication of nut movement where it is critical, such as on commercial vehicle wheels. Can also help to identify if a wheel is overheating.
